5503-504

This is 4.0 per cent lower than production in the same month last year and would make the total estimate of production during the first four months of the year 4,796,000,000 pounds. This is 1.3 per cent below production in the January-April period a year ago.

Slightly more than 58 per cent of the milk produced in April, or 863,000,000 pounds, was used for dairy factory products. This was 6.0 per cent below factory utilization in April, 1966. Creamery butter production during the month accounted for 567,000,000 pounds of milk, 10.1 per cent less than in April a year ago, while milk used for factory cheese and concentrated whole milk products declined 0.9 and 2.6 per cent, respectively. Approximately 25.8 per cent more milk was used for ice cream mix than in April, 1966. During the January-April period, 2.0 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
April and January to April, 1966 and 1967

		April		January - April			
Product	1966	1967	Percentage change	1966	1967	Percentage change	
	'0	00 lb.	%	'000 lb.		%	
Creamery butter Factory cheese Concentrated whole	630,793	566,865 162,749	- 10.1 - 0.9	1,679,559 451,929	1,613,336 444,550	- 3.9 - 1.6	
milk products	75,758 47,256	73,796 59,458	- 2.6 + 25.8	260,284 151,002	247,879 186,141	- 4.8 + 23.3	
Totals	918,097	862,868	- 6.0	2,542,774	2,491,906	- 2.0	

Fluid sales of milk and cream during April, for the purpose of the preliminary estimate, are calculated at 437,000,000 pounds, a decline of 0.5 per cent from fluid sales in April, 1966. This assumes the same relationship to year-earlier estimates as for the month of March.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.6 per cent below the quantity used in April, 1966, while milk used for livestock feeding was 2.5 per cent below that of a year ago. Reports from farm dairy correspondents participating in the survey, indicate 0.8 per cent fewer cows kept on farms at April 15, but the same number of cows being milked as at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 2.3 per cent above the level at April 15, 1966. The estimate of total milk production is not based on the farm sample but is the sum of the estimates of milk utilization.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MARCH, 1967

Farm Milk production: The estimated quantity of milk produced on farms in March amounted to 1,229 million pounds, a decrease of 33 million pounds or 2.6 per cent below that of March, 1966. Of this amount, 631 million pounds or 51 per cent was utilized in factory production, and approximately 452 million pounds or 37 per cent was used for fluid sales. During the January-March period, the estimated production was 3,314 million pounds, a decrease of 1 million pounds below that produced in the same period of the previous year. The quantity of milk utilized for factory production in the January-March period amounted to 1,629 million pounds while fluid sales accounted for 1,306 million pounds.

Fluid Sates: Sales of fluid milk and cream, the latter expressed as milk, amounted to 452 million pounds in March, a decrease of approximately 2 million pounds in comparison with March of the previous year. This included about 384 million pounds of fluid milk, comprising about 31 per cent of the farm milk supply, and fluid cream sales of 68 million pounds representing about 6 per cent. During the three month period, fluid sales totalled 1,306 million pounds, an increase of 6 million pounds over those of the corresponding 1966 period.

Farm Butter: Butter made on farms in March amounted to 249,000 pounds, decreasing 3 per cent from the corresponding month in 1966. For the January-March period, 727,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in March amounted to \$41,728,000. This represented an increase of 1.6 per cent or \$647,000 in comparison with the same month last year. The weighted average value of \$3.85 per hundred pounds of milk was 15 cents higher than in March, 1966. Fluid milk at \$5.67 per hundred was 51 cents higher than in March, 1966. Creamery butterfat decreased from 78.4 cents to 74.6 cents per pound, and farm butter at 60 cents per pound was 2 cents higher than in March, 1966. Milk used in manufacture averaged \$3.18 per hundred, 1 cent higher than in March, 1966. Cheese milk decreased to \$3.19 per hundred, a decrease of 11 cents per hundred in comparison with the same month a year earlier.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payments during the 1965-66 dairy year commenced in August and amounted to approximately 20 cents per bundred pounds for manufacturing milk and cream. Commencing on April 1, 1966 these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound for butterfat or cream. On April 1, 1966 the Quebec government started to make direct payments to farmers which consisted of 5 cents per pound fat for the period April to September inclusive and 10 cents per pound for the months of October 1966 to March 1967. Effective from October 1, 1966 to March 31, 1967, Ontario producers also receive 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent milk fat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound fat on all cream grading Special and First Grade.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN MARCH, 1967

Creamery Butter

Production: Creamery butter production amounted to 17.2 million pounds in March 1967, a decrease of approximately 997 thousand pounds as compared to production in the same month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on April 1, 1967, amounted to 26.9 million pounds, approximately 7.1 million pounds lower than at April 1 last year. On March 1, 1967, stock holdings at 38.2 million pounds were 8.3 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on March 1, plus production and imports during the month, amounted to 55.4 million pounds of butter at March 31, 1967. This was a decrease of approximately 9.3 million pounds compared to the corresponding supply figure at March 31, 1966.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in March amounted to 28.4 million pounds of butter, a decrease of 2.2 million pounds or 7.1 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.40 pounds as compared with 1.53 pounds in March, 1966.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 61 1/2 cents per pound in March, as against 56 7/8 cents in March, 1966.

Cheddar Cheese

Production: Cheddar cheese production in March amounted to approximately 8.0 million pounds, a decrease of about 537 thousand pounds compared to production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 1/4 cents per pound in March. The comparative price in 1966 was 42 1/2 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in March was approximately 1.9 million gallons or 86 thousand gallons less than that produced a year ago.

⁽¹⁾ See paragraph 5, page 4, re farm cash receipts. (2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream. (3) January and February prices should have read \$2.90 and \$2.93 per cwt. instead of \$2.94 and \$2.97 per cwt., respectively. (4) Not fully comparable to other provinces, weighted according to relative quantities of milk and cream deliveries. (5) Based on Class III accounting value.
