PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

MAY 15th 1967

MAY 15th 1966

Preliminary Indications of the Dairy Situation, May, 1967

The preliminary estimate of milk produced in May is 1,766,000,000 pounds which is 2.2 per cent lower than production in the corresponding month last year. This would make the total estimate of production during the first five months of the year 6,556,000,000 pounds or 1.6 per cent below production in the January - May period a year ago.

Slightly more than 65 per cent of the milk produced in May, or 1,156,000,000 pounds, was used for dairy factory products. This is 2.9 per cent below factory utilization in May, 1966. Creamery butter production during the month accounted for 780,000,000 pounds of milk, 5.7 per cent less than in May a year ago; however, milk used for factory cheese, concentrated whole milk products, and ice cream mix increased 0.5, 1.5, and 16.9 per cent, respectively, over May, 1966. During the January-May period, 2.3 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, May and January to May, 1966 and 1967

Product	May			January - May		
	1966	1967	Percentage Change	1966	1967	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	827,026	779,571	- 5.7	2,506,585	2,392,907	- 4.5
Factory Cheese	220,611	221,711	+ 0.5	672,540	666,151(1)	- 0.9
Concentrated Whole Milk Products	83,779	85,070	+ 1.5	344,063	332,949	- 3.2
Ice Cream Mix	59,842	69,935	+ 16.9	210,844	256,076	+ 21.5
Totals	1,191,258	1,156,287	- 2.9	3,734,032	3,648,083(1)	- 2.3

(1) Includes a downward adjustment of 110,000 lb. of milk for April as a result of a revision to cheddar cheese production in Prince Edward Island.

Fluid sales of milk and cream during May, for the purpose of the preliminary estimate, are calculated at 436,000,000 pounds, a decline of 0.6 per cent from fluid sales in May, 1966. This assumes the same relationship to year-earlier estimates as for the February-April period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.5 per cent above that used in May, 1966, while milk used for livestock feeding dropped 3.0 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.7 per cent fewer cows kept on farms at May 15, and 0.8 per cent less cows being milked than at the same date a year earlier. Milk production per cow, for cows milked on farms in the sample, increased 1.3 per cent from the level at May 15, 1966.

Cool, wet weather prevailed over most of Canada during May and, despite adequate moisture conditions, plant growth was slow in pastures and development late in all provinces. Pastures came through the winter in good condition and winterkill was light. Regional pasture conditions at May 15, 1966 and 1967, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN APRIL, 1967

Farm Milk production: The estimated quantity of milk produced on farms in April amounted to 1,476 million pounds, a decrease of 68 million pounds or 4.4 per cent below that of April, 1966. Of this amount, 863 million pounds or 58 per cent was utilized in factory production, and approximately 431 million pounds or 29 per cent was used for fluid sales. During the January-April period, the estimated production was 4,790 million pounds, a decrease of 70 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-April period amounted to 2,492 million pounds while fluid sales accounted for 1,737 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 431 million pounds in April, a decrease of approximately 8 million pounds from April of last year. This included about 367 million pounds of fluid milk, comprising about 25 per cent of the farm milk supply, and fluid cream sales of 64 million pounds representing about 4 per cent. During the four month period, fluid sales totalled 1,737 million pounds, a decrease of 2 million pounds from those of the corresponding 1966 period.

Farm Butter: Butter made on farms in April amounted to 266,000 pounds, decreasing 1 per cent from the corresponding month in 1966. For the January-April period, 993,000 pounds were produced, a decrease of 3 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in April amounted to \$48,024,000. This represented an increase of 3.1 per cent or \$1,422,000 from the corresponding month last year. The weighted average value of \$3.71 per hundred pounds of milk was 28 cents higher than in April, 1966. Fluid milk at \$5.66 per hundred was 48 cents higher than in April, 1966. Creamery butterfat increased from 74.7 cents to 78.0 cents per pound, and farm butter at 60 cents per pound was 2 cents higher than in April, 1966. Milk used in manufacture averaged \$3.31 per hundred, 26 cents higher than in April, 1966. Cheese milk increased to \$3.27 per hundred, an increase of 17 cents per hundred from the corresponding month a year earlier. Approximately 92 per cent of all milk utilized for factory dairy products was eligible for Federal government Subsidy in April, 1967.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1966-67 dairy year commenced on April 1, 1966, and amounted to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound of butterfat. On April 1, 1967, these payments were increased to \$1.10 per hundred pounds for milk and 31.42 cents per pound of butterfat. Unlike the previous program, manufacturing milk and cream shippers will be allotted a quota based on their 1966-67 shipments and will not be eligible if any portion of their deliveries is used for fluid purposes. Effective April 1, 1967, the Quebec government discontinued to make direct payments to farmers for manufacturing milk and cream. These payments had amounted to approximately 5 and 10 cents per pound butterfat depending on the period of the year. Also, effective the same date, direct payments of 25 cents on all industrial, secondary and excess milk and 10 cents on cream were stopped by the Ontario government.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN APRIL, 1967

Creamery Butter

Production: Creamery butter production amounted to 24.2 million pounds in April 1967, a decrease of approximately 2.7 million pounds from production in the corresponding month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on May 1, 1967, amounted to 28.2 million pounds, approximately 7.4 million pounds lower than at May 1 last year. On April 1, 1967, stock holdings at 26.9 million pounds were 7.1 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on April 1, plus production and imports during the month, amounted to 51.2 million pounds of butter at April 30, 1967. This was a decrease of approximately 9.8 million pounds compared to the corresponding supply figure at April 30, 1966.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in April amounted to 22.9 million pounds of butter, a decrease of 2.1 million pounds or 8.3 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.13 pounds as compared with 1.25 pounds in April, 1966.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in April, as against 59 cents in April, 1966.

Cheddar Cheese

Production: Cheddar cheese production in April amounted to approximately 12.4 million pounds, a decrease of about 491 thousand pounds from production in the corresponding month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 43 1/4 cents per pound in April, the same as in April, 1966.

Ice Cream Mix

The quantity of ice cream mix manufactured in April was approximately 2.3 million gallons or 121 thousand gallons more than that produced a year ago.
