PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

JULY 15th 1966

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

Preliminary Indications of the Dairy Situation, July, 1967

The preliminary estimate of milk produced in July is 1,979,000,000 pounds which is 1.3 per cent above production in the corresponding month last year. This would make the total estimate of production during the first seven months of the year 10,620,000,000 pounds or 1.5 per cent below that for the January - July period a year ago.

Approximately 71 per cent of the milk produced in July, or 1,410,000,000 pounds, was used for dairy factory products. This is 1.5 per cent above factory utilization in July, 1966. Creamery butter production during the month accounted for 975,000,000 pounds of milk, 0.2 per cent less than in July a year ago; however, milk used for factory cheese, concentrated whole milk products and ice cream mix increased 1.9, 2.7 and 18.8 per cent, respectively, over July, 1966. During the January - July period 2.4 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE	1.	Preliminary Estimates of Milk Equivalent of Dairy Factory Produc	cts,
		July and January to July, 1966 and 1967	

		July		January - July			
Product	1966	1967	Percentage Change	1966	1967	Percentage Change	
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	76	
Creamery Butter	976,997	974,984	- 0.2	4,604,419	4,385,791	- 4.7	
Factory Cheese Concentrated Who	246,161	250,941	+ 1.9	1,196,681	1,197,723	+ 0.1	
Milk Products	84,447	86,763	+ 2.7	532,568	512,492	- 3.8	
Ice Cream Mix	81,763	97,175	+18.8	375,110	451,699	+20.4	
Totals	1,389,368	1,409,863	+ 1.5	6,708,778	6,547,705	- 2.4	

Fluid sales of milk and cream during July, for the purpose of the preliminary estimate, are calculated at 432,000,000 pounds of milk, an increase of 0.3 per cent from the sales in July, 1966. This assumes the same relationship to year - earlier estimates as for the April - June period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.1 per cent above that used in July, 1966, while milk used for livestock feeding rose 4.6 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 4.6 per cent fewer cows kept on farms at July 15, but 3.1 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 2.2 per cent from the level at July 15, 1966.

Pasture conditions during July were generally only fair throughout most of Western Canada, due to continuous warm dry weather. Drought was evident in many areas particularly in Saskatchewan. In contrast pasture conditions were good to excellent throughout Eastern Canada. Regional pasture conditions at July 15, 1966 and 1967, are shown by the maps on the opposite page. FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JUNE, 1967

Farm Milk production: The estimated quantity of milk produced on farms in June amounted to 2,081 million pounds, a decrease of 85 million pounds or 3.9 per cent below that of June, 1966. Of this amount, 1,490 million pounds or 72 per cent was utilized in factory production, and approximately 443 million pounds or 21 per cent was used for fluid sales. During the January-June period, the estimated production was 8,642 million pounds, a decrease of 190 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-June period amounted to 5,138 million pounds while fluid sales accounted for 2,620 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 443 million pounds in June, an increase of approximately 11 million pounds from June of last year. This included about 373 million pounds of fluid milk, comprising about 18 per cent of the farm milk supply, and fluid cream sales of 70 million pounds representing about 3 per cent. During the six month period, fluid sales totalled 2,620 million pounds, slightly more than for the corresponding period a year earlier.

Farm Butter: Butter made on farms in June amounted to 283,000 pounds, decreasing 5 per cent from the corresponding month in 1966. For the January-June period, 1,570,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in June amounted to \$68,147,000. This represented an increase of 6.4 per cent or \$4,104,000 from the corresponding month last year. The weighted average value of \$3.53 per hundred pounds of milk was 36 cents higher than in June, 1966. Fluid milk at \$5.84 per hundred was 60 cents higher than in June, 1966. Creamery butterfat increased from 74.2 cents to 80.6 cents per pound, and farm butter at 61 cents per pound was 3 cents higher than in June, 1966. Milk used in manufacture averaged \$3.29 per hundred, 27 cents higher than in June, 1966. Cheese milk increased to \$3.29 per hundred, an increase of 28 cents per hundred from the corresponding month a year earlier. Approximately 100 per cent of all milk utilized for factory dairy products was eligible for Federal government Subsidy in June, 1967.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1966-67 dairy year commenced on April 1, 1966, and amounted to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound of butterfat. On April 1, 1967, these payments were increased to \$1.10 per hundred pounds for milk and 31.42 cents per pound of butterfat. Unlike the previous program, manufacturing milk and cream shippers will be allotted a quota based on their 1966-67 shipments and will not be eligible if any portion of their deliveries is used for fluid purposes. Effective April 1, 1967, the Quebec government discontinued to make direct payments to farmers for manufacturing milk and cream. These payments had amounted to approximately 5 and 10 cents per pound butterfat depending on the period of the year. Also, effective the same date, direct payments of 25 cents on all industrial, secondary and excess milk and 10 cents on cream were stopped by the Ontario government. PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JUNE, 1967

Creamery Butter

Production: Creamery butter production amounted to 43.5 million pounds in June, 1967, a decrease of approximately 4.4 million pounds from production in the corresponding month of the previous year.

- 5 -

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on July 1, 1967, amounted to 49.2 million pounds, approximately 8.6 million pounds lower than at July 1 last year. On June 1, 1967, stock holdings at 33.5 million pounds were 7.4 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on June 1, plus production and imports during the month, amounted to 77.0 million pounds of butter at June 30, 1967. This was a decrease of approximately 11.8 million pounds compared to the corresponding supply figure at June 30, 1966.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in June amounted to 27.8 million pounds of butter, a decrease of 3.2 million pounds or 10.3 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.37 pounds as compared with 1.55 pounds in June, 1966.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in June, as against 59 cents in June, 1966.

Cheddar Cheese

Production: Cheddar cheese production in June amounted to approximately 23.0 million pounds, an increase of about 56 thousand pounds from production in the corresponding month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in June. The comparative price in 1966 was 42 3/4 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in June was approximately 3.6 million gallons or 302 thousand gallons more than that produced a year ago.
