PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

AUGUST 15th 1967

AUGUST 15th 1966

Preliminary Indications of the Dairy Situation, August, 1967

The preliminary estimate of milk produced in August is 1,874,000,000 pounds which is 0.2 per cent below production in the corresponding month last year. This would make the total estimate of production during the first eight months of the year 12,494,000,000 pounds or 1.3 per cent below that for the January - August period a year ago.

Almost 70 per cent of the milk produced in August, or 1,308,000,000 pounds, was used for dairy factory products. This is 0.8 per cent below factory utilization in August 1966. Creamery butter production during the month accounted for 923,000,000 pounds of milk, 0.1 per cent less than in August a year ago; however, milk used for factory cheese and concentrated whole milk products decreased 5.8 and 11.3 per cent respectively from August 1966. Approximately 19.2 per cent more milk was used for ice cream mix than in August 1966. During the January - August period 2.1 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, August and January to August, 1966 and 1967

Product	August			January - August		
	1966	1967	Percentage Change	1966	1967	Percentage Change
	'000 lb.	'000 lb.	%	'000 lb.	'000 lb.	%
Creamery Butter	923,831	922,873	- 0.1	5,528,250	5,308,664	- 4.0
Factory Cheese	235,711	222,023	- 5.8	1,432,392	1,419,746	- 0.9
Concentrated Whole Milk Products	84,252	74,725	- 11.3	616,820	587,217	- 4.8
Ice Cream Mix	74,147	88,414	+ 19.2	449,257	540,113	+ 20.2
Totals	1,317,941	1,308,035	- 0.8	8,026,719	7,855,740	- 2.1

Fluid sales of milk and cream during August, for the purpose of the preliminary estimate, are calculated at 436,000,000 pounds of milk, an increase of 1.1 per cent from the sales in August 1966. This assumes the same relationship to year-earlier estimates as for the month of July.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.2 per cent above that used in August 1966, while milk used for livestock feeding rose 3.9 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 3.9 per cent fewer cows kept on farms at August 15, and 2.4 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 2.6 per cent from the level at August 15, 1966.

Hot, dry weather had an adverse effect on pastures throughout most areas of Western Canada, particularly in British Columbia and southern Saskatchewan where pasture conditions were generally poor at August 15. In contrast, abundant moisture combined with warm weather resulted in very good pasture growth in Eastern Canada. Regional pasture conditions at August 15, 1966 and 1967, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JULY, 1967

Farm Milk Production: The estimated quantity of milk produced on farms in July amounted to 1,978 million pounds, an increase of 25 million pounds or 1.3 per cent over that of July, 1966. Of this amount, 1,410 million pounds or 71 per cent was utilized in factory production, and approximately 432 million pounds or 22 per cent was used for fluid sales. During the January-July period, the estimated production was 10,620 million pounds, a decrease of 165 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-July period amounted to 6,548 million pounds while fluid sales accounted for 3,052 million pounds.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 432 million pounds in July, an increase of approximately 1 million pounds from July of last year. This included about 359 million pounds of fluid milk, comprising about 18 per cent of the farm milk supply, and fluid cream sales of 73 million pounds representing about 4 per cent. During the seven month period, fluid sales totalled 3,052 million pounds, an increase of 12 million pounds or 0.4 per cent over those of the corresponding period a year earlier.

Farm Butter: Butter made on farms in July amounted to 267,000 pounds, decreasing 8 per cent from the corresponding month in 1966. For the January-July period, 1,837,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Receipts: Cash receipts from the sale of dairy products in July amounted to \$65,054,000. This represented an increase of 9.8 per cent or \$5,796,000 from the corresponding month last year. The weighted average value of \$3.53 per hundred pounds of milk was 28 cents higher than in July, 1966. Fluid milk at \$5.83 per hundred was 44 cents higher than in July, 1966. Creamery butterfat increased from 74.8 cents to 81.2 cents per pound, and farm butter at 61 cents per pound was 3 cents higher than in July, 1966. Milk used in manufacture averaged \$3.27 per hundred, 26 cents higher than in July, 1966. Cheese milk increased to \$3.25 per hundred, an increase of 29 cents per hundred from the corresponding month a year earlier. Approximately 92 per cent of all milk utilized for factory dairy products was eligible for Federal government Subsidy in July, 1967.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1966-67 dairy year commenced on April 1, 1966, and amounted to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound of butterfat. On April 1, 1967, these payments were increased to \$1.10 per hundred pounds for milk and 31.42 cents per pound of butterfat. Unlike the previous program, manufacturing milk and cream shippers will be allotted a quota based on their 1966-67 shipments and will not be eligible if any portion of their deliveries is used for fluid purposes. Effective April 1, 1967, the Quebec government discontinued to make direct payments to farmers for manufacturing milk and cream. These payments had amounted to approximately 5 and 10 cents per pound butterfat depending on the period of the year. Also, effective the same date, direct payments of 25 cents on all industrial, secondary and excess milk and 10 cents on cream were stopped by the Ontario government.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JULY, 1967

Creamery Butter

Production: Creamery butter production amounted to 41.7 million pounds in July, 1967, a decrease of approximately 86 thousand pounds from production in the corresponding month of the previous year.

Stocks: Combined holdings of creamery butter and butter oil (in butter equivalent) in store and transit on August 1, 1967, amounted to 66.1 million pounds, approximately 9.8 million pounds lower than at August 1 last year. On July 1, 1967, stock holdings at 49.2 million pounds were 8.6 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on July 1, plus production and imports during the month, amounted to 90.9 million pounds of butter at July 31, 1967. This was a decrease of approximately 8.7 million pounds compared to the corresponding supply figure at July 31, 1966.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in July amounted to 24.8 million pounds of butter, an increase of 1.1 million pounds or 4.8 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.22 pounds as compared with 1.18 pounds in July, 1966.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in July, as against 59 cents in July, 1966.

Cheddar Cheese

Production: Cheddar cheese production in July amounted to approximately 20.4 million pounds, an increase of about 65 thousand pounds from production in the corresponding month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in July. The comparative price in 1966 was 43 cents.

Ice Cream Mix

The quantity of ice cream mix manufactured in July was approximately 3.8 million gallons or 275 thousand gallons more than that produced a year ago.
