WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA

BY MONTHS 1967 AND 1968

Preliminary Indications of the Dairy Situation, November 1968

The preliminary estimate of milk produced in November is 1,291,000,000 pounds which is 5.1 per cent above production in the corresponding month last year. This would make the total estimate of production during the first eleven months of the year 17,259,000,000 pounds or 0.9 per cent above that for the January-November period a year ago.

Approximately 57 per cent of the milk produced in November, or 736,000,000 pounds, was used for dairy factory products. This is 8.5 per cent above factory utilization in November 1967. Creamery butter production during the month accounted for 475,000,000 pounds of milk, 9.8 per cent more than in November a year ago; however milk used for factory cheese, concentrated whole milk products and ice cream mix increased 3.0, 1.9 and 22.4 per cent, respectively. During the January-November period, 1.1 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

(1) Includes an upward adjustment of 771,000 lb. of milk for October as a result of a revision to ice cream mix in Alberta.

Fluid sales of milk and cream during November, for purposes of the advance preliminary estimate, are calculated at 440,000,000 pounds of milk, an increase of 0.8 per cent from the sales in November 1967. This assumes the same relationship to year-earlier estimates as for the month of October.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.1 per cent above the quantity used in November 1967, while milk used for livestock feeding was 3.0 per cent above that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.8 per cent fewer cows kept on farms at November 15, and 0.8 per cent less cows being milked than at the same date a year earlier. Milk production per cow, for cows milked on farms in the sample, increased 7.0 per cent from the level at November 15, 1967.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN OCTOBER 1968

Farm Milk Production. — The estimated quantity of milk produced on farms in October amounted to 1,604 million pounds, an increase of 75 million pounds or 4.9 per cent over that of October 1967. Of this amount, 1,031 million pounds or 64 per cent was utilized in factory production, and approximately 454 million pounds or 28 per cent was used for fluid sales. During the January-October period, the estimated production was 15,967 million pounds, an increase of 89 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-October period amounted to 10,166 million pounds while fluid sales accounted for 4,430 million pounds.

Fluid Sales. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 454 million pounds in October, an increase of approximately 3 million pounds from October of last year. This included about 387 million pounds of fluid milk, comprising about 24 per cent of the farm milk supply, and fluid cream sales of 67 million pounds representing about 4 per cent. During the ten month period, fluid sales totalled 4,430 million pounds, an increase of 43 million pounds or 1.0 per cent over those of the corresponding period a year earlier.

Farm Butter. — Butter made on farms in October amounted to 253,000 pounds, decreasing 6 per cent from the corresponding month in 1967. For the January-October period, 2,568,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Receipts. — Cash receipts from the sale of dairy products in October amounted to \$20,757,000. This represented an increase of 10.3 per cent or \$1,940,000 from the corresponding month last year. The weighted average value of \$3.93 per hundred pounds of milk was 4 cents higher than in October 1967. Fluid milk at \$6.18 per hundred was 24 cents higher than in October 1967. Cream for butter at 65.3¢ per pound butterfat was 1.2¢ higher than in October 1967, and farm butter at 62 cents per pound was 1 cent higher than in October 1967. Milk used in the manufacture of all dairy products averaged \$3.39 per hundred, 1 cent lower than in October 1967. Cheese milk decreased to \$3.48 per hundred, a decrease of 8 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in October 1968, not more than 76 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1966-67 dairy year amounted to approximately 75 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1967, these payments were increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat, and on April 1, 1968, further increased to \$1.16 per hundred pounds for 3.5 per cent processing milk or 36.42 cents per pound butterfat. Effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per cwt. of milk. Subsidy payments to cream shippers remained unchanged. On April 1, 1966, the Quebec government started

to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October 1966 to March 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.
