WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA  
BY MONTHS 1967 AND 1968

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, FEBRUARY, 1968

The preliminary estimate of milk produced in February is 1,023,000,000 pounds which is 2.8 per cent above production in the corresponding month last year. This would make the total estimate of production during the first two months of the year 2,121,000,000 pounds or 1.8 per cent above production in the January-February period a year ago.

Almost 47 per cent of the milk produced in February, or 479,000,000 pounds, was used for dairy factory products. This is 2.4 per cent above factory utilization in February 1967. Creamery butter production during the month accounted for 309,000,000 pounds of milk, 1.6 per cent more than in February a year ago, however milk used for factory cheese, concentrated whole milk products and ice cream mix increased 2.7, 5.1 and 5.1 per cent, respectively, from that of a year ago. During January and February, 1.3 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

(1) Includes a downward adjustment of 2,990,000 lb. of milk for January as a result of a revision to ice cream mix in British Columbia.

Fluid sales of milk and cream during February, for the purpose of the preliminary estimate, are calculated at 430,000,000 pounds of milk, an increase of 3.8 per cent from the sales in February 1967. This assumes the same relationship to year-earlier estimates as for the November-January period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.8 per cent above that used in February 1967, while milk used for livestock feeding dropped 0.9 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 1.0 per cent fewer cows kept on farms at February 15, and 0.9 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, decreased 0.7 per cent from the level at February 15, 1967.

## FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JANUARY, 1968

**Farm Milk Production:** The estimated quantity of milk produced on farms in January amounted to 1,098 million pounds, an increase of 10 million pounds or 0.9 per cent over that of January, 1967. Of this amount, 535 million pounds or 49 per cent was utilized in factory production, and approximately 444 million pounds or 40 per cent was used for fluid sales.

**Fluid Sales:** Sales of fluid milk and cream, the latter expressed as milk, amounted to 444 million pounds in January, an increase of approximately 9 million pounds from January of last year. This included about 381 million pounds of fluid milk, comprising about 34 per cent of the farm milk supply, and fluid cream sales of 63 million pounds representing 6 per cent.

**Farm Butter:** Butter made on farms in January amounted to 231,000 pounds, decreasing 3 per cent from the corresponding month in 1967.

**Farm Cash Receipts:** Cash receipts from the sale of dairy products in January amounted to \$41,120,000. This represented an increase of 8.0 per cent or \$3,063,000 from the corresponding month last year. The weighted average value of \$4.20 per hundred pounds of milk was 27 cents higher than in January, 1967. Fluid milk at \$5.93 per hundred was 37 cents higher than in January, 1967. Cream for butter increased from 62.4 cents to 64.0 cents per pound and farm butter at 61 cents per pound was 1 cent higher than in January, 1967. Milk used in manufacture averaged \$3.48 per hundred, 29 cents higher than in January, 1967. Cheese milk increased to \$3.56 per hundred, an increase of 22 cents per hundred from the corresponding month a year earlier. Approximately 74 per cent of all milk utilized for factory dairy products was eligible for Federal government Subsidy in January, 1968.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1965-66 dairy year commenced in August 1965 and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966, these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound butterfat, and on April 1, 1967, further increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October, 1966 to March, 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

On January 1, 1968, stock holdings at 57.2 million pounds were 4.0 million pounds less than at the same date a year earlier.

Supply: The combined quantity of creamery butter and butter oil represented by stocks on January 1, plus production and imports during the month, amounted to 72.0 million pounds of butter at January 31, 1968. This was a decrease of approximately 3.8 million pounds compared to the corresponding supply figure at January 31, 1967.

Domestic Disappearance: The combined domestic disappearance of creamery butter and butter oil in January amounted to 28.1 million pounds of butter, an increase of 2.0 million pounds or 7.7 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.36 pounds as compared with 1.28 pounds in January, 1967.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in January, as against 61 cents in January, 1967.
