THE DAIRY REVIEW

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, APRIL, 1968

The preliminary estimate of milk produced in April is 1,513,000,000 pounds which is 0.3 per cent below production in the corresponding month last year. This would make the total estimate of production during the first four months of the year 4,848,000,000 pounds or 0.1 per cent above that for the January — April period a year ago.

Almost 60 per cent of the milk produced in April, or 907,000,000 pounds, was used for dairy factory products. This is 0.2 per cent below factory utilization in April 1967. Creamery butter production during the month accounted for 598,000,000 pounds of milk, 1.7 per cent less than in April a year ago; however, milk used for factory cheese, concentrated whole milk products and ice cream mix increased 2.9, 0.5 and 5.5 per cent, respectively, over April 1967. During the January — April period, 1.2 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, April and January to April, 1967 and 1968

Fluid sales of milk and cream during April, for purposes of the advance preliminary estimate, are calculated at 435,000,000 pounds of milk, an increase of 1.6 per cent from the sales in April 1967. This assumes the same relationship to year-earlier estimates as for the month of March.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.5 per cent below the quantity used in April 1967, while milk used for livestock feeding was 2.4 per cent below that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.9 per cent fewer cows kept on farms at April 15, and 1.1 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, was 1.0 per cent above the level at April 15, 1967.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MARCH, 1968

Farm Milk Production. — The estimated quantity of milk produced on farms in March amounted to 1,202 million pounds, a decrease of 39 million pounds or 3.2 per cent below that of March, 1967. Of this amount, 604 million pounds or 50 per cent was utilized in factory production, and approximately 458 million pounds or 38 per cent was used for fluid sales. During the January — March period, the estimated production was 3,328 million pounds, an increase of 4 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January — March period amounted to 1,618 million pounds while fluid sales accounted for 1,336 million pounds.

<u>Fluid Sales</u>. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 458 million pounds in March, an increase of approximately 7 million pounds from March of last year. This included about 392 million pounds of fluid milk, comprising about 33 per cent of the farm milk supply, and fluid cream sales of 66 million pounds representing about 5 per cent. During the three month period, fluid sales totalled 1,336 million pounds, an increase of 37 million pounds or 2.8 per cent over those of the corresponding period a year earlier.

Farm Butter. — Butter made on farms in March amounted to 240,000 pounds, decreasing 4 per cent from the corresponding month in 1967. For the January — March period, 700,000 pounds were produced, a decrease of 4 per cent from the same period last year.

<u>Farm Cash Receipts</u>. — Cash receipts from the sale of dairy products in March amounted to \$43,803,000. This represented an increase of 3.3 per cent or \$1,401,000 from the corresponding month last year. The weighted average value of \$4.13 per hundred pounds of milk was 26 cents higher than in March, 1967. Fluid milk at \$5.92 per hundred was 24 cents higher than in March, 1967. Cream for butter increased from 62.6 cents to 64.1 cents per pound, and farm butter at 61 cents per pound was 1 cent higher than in March, 1967. Milk used in the manufacture of all dairy products averaged \$3.34 per hundred, 20 cents higher than in March, 1967. Cheese milk increased to \$3.38 per hundred, an increase of 14 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in March 1968, not more than 82 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1965-66 dairy year commenced in August 1965 and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966, these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound butterfat, and on April 1, 1967, further increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October, 1966 to March, 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN MARCH, 1968

Creamery Butter:

Production: Creamery butter production amounted to 16.4 million pounds in March 1968, a decrease of approximately 1.3 million pounds from production in the same month of the previous year.

Stocks: Holdings of creamery butter in store and transit on April 1, 1968, amounted to 19.1 million pounds, approximately 8.0 million pounds lower than at April 1 last year. On March 1, 1968, stock holdings at 28.0 million pounds were 10.0 million pounds less than at the same date a year earlier.

Supply: Stocks of creamery butter on March 1, plus production and imports during the month, amounted to 44.5 million pounds of butter at March 31, 1968. This was a decrease of approximately 11.3 million pounds compared to the corresponding supply figure at March 31, 1967.

Domestic Disappearance: The domestic disappearance of creamery butter in March amounted to 25.4 million pounds of butter, a decrease of 3.3 million pounds or 11.5 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.23 pounds as compared with 1.41 pounds in March, 1967.

Prices at Montreal: Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in March, as against 61-1/2 cents in March, 1967.

Cheddar Cheese:

Production: Cheddar cheese production in March amounted to approximately 7.1 million pounds, a decrease of about 1.0 million pounds from production in the same month of the previous year.

Prices: The Belleville price of Ontario coloured cheese averaged 44-1/4 cents per pound in March. The comparative price in 1967 was 43-1/4 cents.

Ice Cream Mix:

The quantity of ice cream mix manufactured in March was approximately 2.0 million gallons or 52 thousand gallons more than that produced a year ago.

TABLE13. Principal Concentrated Milk Products, Supply and Disposition, Canada,
March and Cumulative January to March, 1964 to 1968

(1) Data for 1968 are preliminary and subject to revision.

(2) Disappearance for the period cannot be estimated because ending stocks and exports (with inevitable lag) exceed total supply.

(3) Includes adjustment for February exports.
