THE DAIRY REVIEW

FAIR POOR

MAY 15th 1968

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, MAY 1968

The preliminary estimate of milk produced in May is 1,769,000,000 pounds which is 1.1 per cent below production in the corresponding month last year. This would make the total estimate of production during the first five months of the year 6,626,000,000 pounds or 0.1 per cent below that for the January — May period a year ago.

Almost 65 per cent of the milk produced in May, or 1,146,000,000 pounds, was used for dairy factory products. This is 2.2 per cent below factory utilization in May 1967. Creamery butter production during the month accounted for 764,000,000 pounds of milk, 3.7 per cent less than in May a year ago, while milk used in the manufacture of concentrated whole milk products declined 2.4 per cent. Approximately 1.4 and 3.0 per cent more milk was used for factory cheese and ice cream mix, respectively, than in May 1967. During the January — May period, 1.5 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, May and January to May, 1967 and 1968

		May		January - May			
Product	1967	1968	Percentage change	1967	1968	Percentage change	
	1000	1b.	%	1000	lb.	%	
Creamery butter Factory cheese Concentrated whole	793,868 220,768	764,455 223,846	- 3.7 + 1.4	2,463,459 670,762		- 2.5 - 0.5	
milk products Ice cream mix	87,260 70,448	85,209 72,583	- 2.4 + 3.0	333,988 257,920		- 1.0 + 4.9	
Totals	1,172,344	1,146,093	- 2.2	3,726,129	3,670,172	- 1.5	

Fluid sales of milk and cream during May, for purposes of the advance preliminary estimate, are calculated at 457,000,000 pounds of milk, an increase of 3.4 per cent from the sales in May 1967. This assumes the same relationship to yearearlier estimates as for the February — April period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 4.2 per cent below the quantity used in May 1967, while milk used for livestock feeding was 4.3 per cent below that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.9 per cent fewer cows kept on farms at May 15, but no change in the percentage being milked, compared to the same date last year. Milk production per cow, for cows milked on farms in the sample, was 4.8 per cent above the level at May 15, 1967.

Despite below normal temperatures over most of Canada during May, pasture conditions were generally rated as good except for the northern parts of Alberta and the lower St. Lawrence region of Quebec. This compares with the generally poor conditions which prevailed in May last year. Regional pasture conditions at May 15, 1967 and 1968, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN APRIL 1968

Farm milk production. — The estimated quantity of milk produced on farms in April amounted to 1,528 million pounds, an increase of 10 million pounds or 0.7 per cent over that of April, 1967. Of this amount, 907 million pounds or 59 per cent was utilized in factory production, and approximately 444 million pounds or 29 per cent was used for fluid sales. During the January — April period, the estimated production was 4,857 million pounds, an increase of 14 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January — April period amounted to 2,524 million pounds while fluid sales accounted for 1,780 million pounds.

Fluid sales. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 444 million pounds in April, an increase of approximately 16 million pounds from April of last year. This included about 378 million pounds of fluid milk, comprising about 25 per cent of the farm milk supply, and fluid cream sales of 66 million pounds representing about 4 per cent. During the four month period, fluid sales totalled 1,780 million pounds, an increase of 53 million pounds or 3.0 per cent over those of the corresponding period a year earlier.

Farm butter. — Butter made on farms in April amounted to 258,000 pounds, decreasing 3 per cent from the corresponding month in 1967. For the January — April period, 958,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm cash receipts. — Cash receipts from the sale of dairy products in April amounted to \$51,977,000. This represented an increase of 3.8 per cent or \$1,903,000 from the corresponding month last year. The weighted average value of \$3.85 per hundred pounds of milk was 11 cents higher than in April, 1967. Fluid milk at \$5.91 per hundred was 24 cents higher than in April, 1967. Cream for butter decreased from 64.4 cents to 64.3 cents per pound, and farm butter at 61 cents per pound was 1 cent higher than in April, 1967. Milk used in the manufacture of all dairy products averaged \$3.29 per hundred, 1 cent lower than in April, 1967. Cheese milk decreased to \$3.23 per hundred, a decrease of 6 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in April 1968, not more than 87 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1965-66 dairy year commenced in August 1965 and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966, these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound butterfat, and on April 1, 1967, further increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October, 1966 to March, 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN APRIL 1968

Creamery butter

Production. — Creamery butter production amounted to 25.6 million pounds in April 1968, a decrease of approximately 452 thousand pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store and transit on May 1, 1968, amounted to 18.1 million pounds, approximately 10.5 million pounds lower than at May 1 last year. On April 1, 1968, stock holdings at 19.1 million pounds were 8.0 million pounds less than at the same date a year earlier.

Supply. — Stocks of creamery butter on April 1, plus production and imports during the month, amounted to 44.6 million pounds of butter at April 30, 1968. This was a decrease of approximately 8.5 million pounds compared to the corresponding supply figure at April 30, 1967.

Domestic disappearance. — The domestic disappearance of creamery butter in April amounted to 26.6 million pounds of butter, an increase of 2.0 million pounds or 8.3 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.29 pounds as compared with 1.20 pounds in April, 1967.

Prices at Montreal. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in April, the same as in April, 1967.

Cheddar cheese

<u>Production</u>. — Cheddar cheese production in April amounted to approximately 12.8 million pounds, an increase of about 15 thousand pounds from production in the same month of the previous year.

<u>Prices</u>. — The Belleville price of Ontario coloured cheese averaged 44-1/4 cents per pound in April. The comparative price in 1967 was 43-1/4 cents.

Ice cream mix

The quantity of ice cream mix manufactured in April was approximately 2.3 million gailons or 98 thousand gallons more than that produced a year ago.
