PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

JUNE 15th 1967

DERIVED FROM REPORTS BY ABOUT 4,500 CORRESPONDENTS

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, JUNE 1968

The preliminary estimate of milk produced in June is 2,057,000,000 pounds which is 2.7 per cent below production in the corresponding month last year. This would make the total estimate of production during the first six months of the year 8,669,000,000 pounds or 0.9 per cent below that for the January — June period a year ago.

Slightly more than 71 per cent of the milk produced in June, or 1,466,000,000 pounds, was used for dairy factory products. This is 3.6 per cent below factory utilization in June 1967. Creamery butter production during the month accounted for 995,000,000 pounds of milk, 5.2 per cent less than in June a year ago, while milk used in the manufacture of ice cream mix declined 14.0 per cent. Approximately 3.3 and 3.9 per cent more milk was used for factory cheese and concentrated whole milk products, respectively, than in June 1967. During the January - June period, 2.1 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, June and January to June, 1967 and 1968

Fluid sales of milk and cream during June, for purposes of the advance preliminary estimate, are calculated at 445,000,000 pounds of milk, an increase of 0.3 per cent from the sales in June 1967. This assumes the same relationship to year-earlier estimates as for the month of May.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.7 per cent below the quantity used in June 1967, while milk used for livestock feeding was 0.2 per cent above that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.9 per cent fewer cows kept on farms at June 15, and 0.9 per cent less cows being milked than at the same date a year earlier. Milk production per cow, for cows milked on farms in the sample, increased 0.6 per cent from the level at June 15, 1967.

Cool, wet weather prevailed over most of eastern Canada and British Columbia during June, as a result pasture conditions at June 15 were generally good to excellent. Conditions were much more variable in the Prairies, however, due to warm, dry weather. Regional pasture conditions at June 15, 1967 and 1968, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MAY 1968

Farm milk production. — The estimated quantity of milk produced on farms in May amounted to 1,755 million pounds, a decrease of 33 million pounds or 1.9 per cent below that of May 1967. Of this amount, 1,146 million pounds or 65 per cent was utilized in factory production, and approximately 443 million pounds or 25 per cent was used for fluid sales. During the January — May period, the estimated production was 6,612 million pounds, a decrease of 19 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January — May period amounted to 3,670 million pounds while fluid sales accounted for 2,224 million pounds.

<u>Fluid sales.</u> — Sales of fluid milk and cream, the latter expressed as milk, amounted to 443 million pounds in May, an increase of approximately 1 million pounds from May of last year. This included about 375 million pounds of fluid milk, comprising about 21 per cent of the farm milk supply, and fluid cream sales of 68 million pounds representing about 4 per cent. During the five month period, fluid sales totalled 2,224 million pounds, an increase of 54 million pounds or 2.5 per cent over those of the corresponding period a year earlier.

Farm butter. - Butter made on farms in May amounted to 276,000 pounds, decreasing 6 per cent from the corresponding month in 1967. For the January - May period, 1,234,000 pounds were produced, a decrease of 4 per cent from the same period last year.

<u>Farm cash receipts</u>. — Cash receipts from the sale of dairy products in May amounted to \$58,891,000. This represented an increase of 0.1 per cent or \$45,000 from the corresponding month last year. The weighted average value of \$3.70 per hundred pounds of milk was 6 cents higher than in May 1967. Fluid milk at \$5.90 per hundred was 18 cents higher than in May 1967. Cream for butter decreased from 64.3 cents to 63.8 cents per pound, and farm butter at 60 cents per pound was 1 cent lower than in May 1967. Milk used in the manufacture of all dairy products averaged \$3.29 per hundred, the same as in May 1967. Cheese milk decreased to \$3.20 per hundred, a decrease of 6 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in May 1968, not more than 86 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1965-66 dairy year commenced in August 1965 and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966, these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound butterfat, and on April 1, 1967, further increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October, 1966 to March, 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN MAY 1968

Creamery butter

<u>Production</u>. — Creamery butter production amounted to 32.7 million pounds in May 1968, a decrease of approximately 1.3 million pounds from production in the same month of the previous year.

<u>Stocks</u>. — Holdings of creamery butter in store and transit on June 1, 1968, amounted to 24.9 million pounds, approximately 9.5 million pounds lower than at June 1 last year. On May 1, 1968, stock holdings at 18.1 million pounds were 10.5 million pounds less than at the same date a year earlier.

<u>Supply</u>. — Stocks of creamery butter on May 1, plus production and imports during the month, amounted to 50.7 million pounds of butter at May 31, 1968. This was a decrease of approximately 11.8 million pounds compared to the corresponding supply figure at May 31, 1967.

Domestic disappearance. — The domestic disappearance of creamery butter in May amounted to 25.9 million pounds of butter, a decrease of 2.2 million pounds or 7.9 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.25 pounds as compared with 1.37 pounds in May 1967.

Prices at Montreal. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in May, the same as in May 1967.

Cheddar cheese

Production. - Cheddar cheese production in May amounted to approximately 17.6 million pounds, a decrease of about 245 thousand pounds from production in the same month of the previous year.

<u>Prices</u>. — The Belleville price of Ontario coloured cheese averaged 47 cents per pound in May. The comparative price in 1967 was 46 cents.

Ice cream mix

The quantity of ice cream mix manufactured in May was approximately 2.7 million gallons or 32 thousand gallons more than that produced a year ago.

TABLE 11. Average Farm Values of Cream, Milk and Farm Butter, by Province, May 1967 and 1968(1) - Concluded

(1) See paragraph 5, page 4, re farm cash receipts.

(2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.

(3) Based on class III qualifying milk. Accounting value for May 1968 adjusted for difference between 3.5 per cent milk and that of natural milk received at plants. Values published prior to April 1968 are subject to review and possible change.

(4) Based on Class I qualifying milk.
