Price: \$2.00 per year

WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA
BY MONTHS 1967 AND 1968

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

JULY 15th 1968

JULY 15th 1967

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, JUNE 1968

The preliminary estimate of milk produced in July is 1,985,000,000 pounds which is practically the same as production in the corresponding month last year. This would make the total estimate of production during the first seven months of the year 10,644,000,000 pounds or 0.8 per cent below that for the January - July period a year ago.

Slightly more than 71 per cent of the milk produced in July, or 1,415,000,000 pounds, was used for dairy factory products. This is 0.2 per cent below factory utilization in July 1967. Creamery butter production during the month accounted for 981,000,000 pounds of milk, 0.9 per cent less than in July a year ago, while milk used in the manufacture of concentrated whole milk products declined 6.2 per cent. Approximately 1.6 and 7.9 per cent more milk was used for factory cheese and ice cream mix, respectively, than in July 1967. During the January - July period, 1.7 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, July and January to July 1967 and 1968

Product	July			January - July		
	1967	1968	Per-centage change	1967	1968	Per-centage change
	'000 lb.		%	'000 lb.		%
Creamery butter	990,218	981,256	- 0.9	4,503,612	4,377,930	- 2.8
Factory cheese	251,394	255,413	+ 1.6	1,203,887	1,213,941	+ 0.8
Concentrated whole milk products	83,113	77,989	- 6.2	509,543	504,623	- 1.0
Ice cream mix	92,904	100,274	+ 7.9	448,259	454,671	+ 1.4
Totals	1,417,629	1,414,932	- 0.2	6,665,301	6,551,165	- 1.7

Fluid sales of milk and cream during July, for purposes of the advance preliminary estimate, are calculated at 434,000,000 pounds of milk, an increase of 0.7 per cent from the sales in July 1967. This assumes the same relationship to year-earlier estimates as for the April-June period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.7 per cent below the quantity used in July 1967, while milk used for livestock feeding was 1.8 per cent above that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 1.8 per cent fewer cows kept on farms at July 15, and 2.6 per cent less cows being milked than at the same date a year earlier. Milk production per cow, for cows milked on farms in the sample, increased 1.2 per cent from the level at July 15, 1967.

Pasture conditions during July were generally good throughout most areas of Canada, except for Saskatchewan and Alberta where conditions were generally only fair. However, late July rains helped to improve pasture prospects in these two provinces. Regional pasture conditions at July 15, 1967 and 1968, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JUNE 1968

Farm Milk Production. — The estimated quantity of milk produced on farms in June amounted to 2,047 million pounds, a decrease of 66 million pounds or 3.1 per cent below that of June 1967. Of this amount, 1,466 million pounds or 72 per cent was utilized in factory production, and approximately 435 million pounds or 21 per cent was used for fluid sales. During the January-June period, the estimated production was 8,659 million pounds, a decrease of 85 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-June period amounted to 5,136 million pounds while fluid sales accounted for 2,659 million pounds.

Fluid Sales. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 435 million pounds in June, a decrease of approximately 8 million pounds from June of last year. This included about 366 million pounds of fluid milk, comprising about 18 per cent of the farm milk supply, and fluid cream sales of 69 million pounds representing about 3 per cent. During the six month period, fluid sales totalled 2,659 million pounds, an increase of 45 million pounds or 1.7 per cent over those of the corresponding period a year earlier.

Farm Butter. — Butter made on farms in June amounted to 275,000 pounds, decreasing 4 per cent from the corresponding month in 1967. For the January-June period, 1,509,000 pounds were produced, a decrease of 4 per cent from the same period last year.

Farm Cash Receipts. — Cash receipts from the sale of dairy products in June amounted to \$68,102,000. This represented a decrease of 2.6 per cent or \$1,783,000 from the corresponding month last year. The weighted average value of \$3.58 per hundred pounds of milk was 2 cents higher than in June 1967. Fluid milk at \$5.90 per hundred was 6 cents higher than in June 1967. Cream for butter decreased from 64.0 cents to 63.6 cents per pound, and farm butter at 61 cents per pound was the same as in June 1967. Milk used in the manufacture of all dairy products averaged \$3.30 per hundred, the same as in June 1967. Cheese milk decreased to \$3.20 per hundred, a decrease of 8 cents per hundred from the corresponding month a year earlier. Practically all of the milk utilized for factory dairy products in June 1968 was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1965-66 dairy year commenced in August 1965 and amounted to approximately 20 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1966, these payments were increased to 75 cents per hundred pounds for 3.5 per cent processing milk or the equivalent of 21.43 cents per pound butterfat, and on April 1, 1967, further increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October 1966 to March 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JUNE 1968

Creamery butter

Production. — Creamery butter production amounted to 42.5 million pounds in June 1968, a decrease of approximately 2.3 million pounds from production in the same month of the previous year.

Stocks. — Holdings of creamery butter in store and transit on July 1, 1968, amounted to 43.8 million pounds, approximately 6.0 million pounds lower than at July 1 last year. On June 1, 1968, stock holdings at 24.9 million pounds were 9.5 million pounds less than at the same date a year earlier.

Supply. — Stocks of creamery butter on June 1, plus production and imports during the month, amounted to 67.4 million pounds of butter at June 30, 1968. This was a decrease of approximately 11.9 million pounds compared to the corresponding supply figure at June 30, 1967.

Domestic disappearance. — The domestic disappearance of creamery butter in June amounted to 23.6 million pounds of butter, a decrease of 5.8 million pounds or 19.8 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.14 pounds as compared with 1.44 pounds in June 1967.

Prices at Montreal. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 63 cents per pound in June, the same as in June 1967.

Cheddar cheese

Production. — Cheddar cheese production in June amounted to approximately 23.5 million pounds, an increase of about 528 thousand pounds from production in the same month of the previous year.

Prices. — The Belleville price of Ontario coloured cheese averaged 47 1/4 cents per pound in June. The comparative price in 1967 was 46 1/4 cents.

Ice cream mix

The quantity of ice cream mix manufactured in June was approximately 3.1 million gallons or 586 thousand gallons less than that produced a year ago.

(1) See paragraph 5, page 4, re farm cash receipts.

(2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.

(3) Includes columns 2, 3 and 4.

(4) Includes columns 1, 2, 3 and 4.

(5) Based on class III qualifying milk. Accounting value for June 1968 adjusted for difference between 3.5 per cent milk and that of natural milk received at plants. Values published prior to April 1968 are subject to review and possible change.

(6) Based on Class I qualifying milk.
