Preliminary Indications of the Dairy Situation, February 1969

The preliminary estimate of milk produced in February is 1,049,000,000 pounds which is 3.2 per cent above production in the corresponding month last year. This would make the total estimate of production during the first two months of the year 2,161,000,000 pounds or 3.1 per cent above production in the January-February period a year ago.

Slightly more than 49 per cent of the milk produced in February, or 516,000,000 pounds, was used for dairy factory products. This is 7.2 per cent above factory utilization in February 1968. Creamery butter production during the month accounted for 338,000,000 pounds of milk, 11.1 per cent more than in February a year ago; however milk used for factory cheese and ice cream mix increased 7.8 and 8.7 per cent, respectively. Approximately 17.7 per cent less milk was used for concentrated whole milk products than in February 1968. During January and February, 7.9 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

Fluid sales of milk and cream during February, for purposes of the advance preliminary estimate, are calculated at 411,000,000 pounds, a decrease of 2.3 per cent from the sales in February 1968. This assumes the same relationship to year-earlier estimates as for the month of January.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 6.4 per cent above that used in February 1968, while milk used for livestock feeding was 8.8 per cent above that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 1.6 per cent fewer cows kept on farms at February 15, but 0.8 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 3.8 per cent from the level at February 15, 1968.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JANUARY 1969

**Farm Milk Production:** The estimated quantity of milk produced on farms in January amounted to 1,111 million pounds, an increase of 32 million pounds or 2.9 per cent over that of January 1968. Of this amount, 574 million pounds or 52 per cent was utilized in factory production, and approximately 421 million pounds or 38 per cent was used for fluid sales.

**Fluid Sales:** Sales of fluid milk and cream, the latter expressed as milk, amounted to 421 million pounds in January, a decrease of approximately 10 million pounds from January of last year. This included about 360 million pounds of fluid milk, comprising about 32 per cent of the farm milk supply, and fluid cream sales of 61 million pounds representing 6 per cent.

**Farm Butter:** Butter made on farms in January amounted to 222,000 pounds, decreasing 4 per cent from the corresponding month in 1968.

**Farm Cash Receipts.** — Cash receipts from the sale of dairy products in January amounted to \$42,916,000. This represented an increase of 6.4 per cent or \$2,597,000 from the corresponding month last year. The weighted average value of \$4.31 per hundred pounds of milk was 11 cents higher than in January 1968. Fluid milk at \$6.34 per hundred was 41 cents higher than in January 1968. Cream for butter at 65.9¢ per pound butterfat was 1.5¢ higher than in January 1968, and farm butter at 61 cents per pound was the same as in January 1968. Milk used in the manufacture of all dairy products averaged \$3.37 per hundred, 1 cent higher than in January 1968. Cheese milk decreased to \$3.48 per hundred, a decrease of 4 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in January 1969, not more than 69 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1966-67 dairy year amounted to approximately 75 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1967, these payments were increased to \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat, and on April 1, 1968, further increased to \$1.16 per hundred pounds for 3.5 per cent processing milk or 36.42 cents per pound butterfat. Effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per cwt. of milk. Subsidy payments to cream shippers remained unchanged. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October 1966 to March 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JANUARY 1969

Creamery butter

Production. — Creamery butter production amounted to 16.1 million pounds in January 1969, an increase of approximately 1.6 million pounds from production in the same month of the previous year.

Stocks. — Holdings of creamery butter in store on February 1, 1969, amounted to 50.9 million pounds, approximately 8.0 million pounds higher than at February 1 last year. On January 1, 1969, stock holdings at 62.5 million pounds were 6.1 million pounds more than at the same date a year earlier.

Supply. — Stocks of creamery butter on January 1, plus production and imports during the month, amounted to 78.6 million pounds of butter at January 31, 1969. This was an increase of approximately 7.8 million pounds compared to the corresponding supply figure at January 31, 1968.

Domestic disappearance. — The domestic disappearance of creamery butter in January amounted to 27.7 million pounds of butter, a decrease of 0.3 million pounds or 1.0 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.32 pounds as compared with 1.35 pounds in January 1968.

Prices at Montreal. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in January, as against 63 cents in January 1968.

Cheddar cheese

Production. — Cheddar cheese production in January amounted to approximately 7.1 million pounds, an increase of about 909 thousand pounds from production in the same month of the previous year.

Prices. — The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in January. The comparative price in 1968 was 44 1/4 cents.

Ice cream mix

The quantity of ice cream mix manufactured in January was approximately 1.5 million gallons or 16 thousand gallons more than that produced a year ago.

(1) Data for 1969 are preliminary and subject to revision.

(2) Due to lagged reporting of export data, disappearance probably under-estimated.

(3) Disappearance for the month cannot be estimated because month-end stocks and exports (with inevitable lag) exceed total supply.
