## THE DAIRY REVIEW

## Preliminary Indications of the Dairy Situation, April 1969

The preliminary estimate of milk produced in April is $1,573,000,000$ pounds which is 2.7 per cent above production in the corresponding month last year. This would make the total estimate of production during the first four months of the year $4,991,000,000$ pounds or 3.5 per cent above production in the January - April period a year ago.

Slightly less than 63 per cent of the milk produced in April, or $984,000,000$ pounds, was used for dairy factory products. This is 6.3 per cent above factory utilization in April 1968. Creamery butter production during the month accounted for $675,000,000$ pounds of milk, 9.8 per cent more than in April a year ago, while milk used in the manufacture of ice cream mix advanced 2.6 per cent. Approximately 0.7 and 3.1 per cent less milk was used for factory cheese and concentrated whole milk products, respectively, than in April 1968. During the January - April period, 9.0 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, April and January to April 1968 and 1969

(1) Includes a downward adjustment of $121,000 \mathrm{lbs}$. of milk for Cheddar Cheese in Prince Edward Island for the month of March.

Fluid sales of milk and cream during April, for purposes of the advance preliminary estimate, are calculated at $415,000,000$ pounds, a decrease of 3.3 per cent from the sales in April 1968. This assumes the same relationship to year-earlier estimates as for the January - March period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 0.5 per cent below that used in April 1968, while milk used for livestock feeding dropped 2.3 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 1.0 per cent fewer cows kept on farms at April 15, but 1.0 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 2.5 per cent from the level at April $15,1968$.

## FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MARCH 1969

Farm Milk Production. - The estimated quantity of milk produced on farms in Warch amounted co 1,280 million pounds, an increase of 86 million pounds or 7.2 per cent over that of March 1968. Of this amount, 699 million pounds or 55 per cent was utilized in factory production, and approximately 434 million pounds or 34 per cent was used for fluid sales. During the January-March period, the estimated production was 3,418 million pounds, an increase of 128 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-March period amounted to 1,789 million pounds while fluid sales accounted for 1,255 million pounds.

Fluid Sales. - Sales of fluid milk and cream, the latter expressed as milk, amounted to 434 million pounds in March, a decrease of approximately 11 million pounds from March of last year. This included about 370 million pounds of fluid milk, comprising about 29 per cent of the farm milk supply, and fluid cream sales of 64 million pounds representing about 5 per cent. During the three month period, fluid sales totalled 1,255 million pounds, a decrease of 42 million pounds or 3.3 per cent less than the corresponding period a year earlier.

Farm Butter. - Butter made on farms in March amounted to 219,000 pounds, decreasing 9 per cent from the corresponding month in 1968. For the January-March period, 656,000 pounds were produced, a decrease of 6 per cent from the same period last year.

Farm Cash Receipts. - Cash receipts from the sale of dairy products in March amounted to
 last year. The weighted average value of $\$ 4.17$ per hundred pounds of milk was 6 cents higher than in March 1968. Fluid milk at $\$ 6.31$ per hundred was 38 cents higher than in March 1968. Cream for butter at 66.06 per pound butterfat was 1.56 higher than in March 1968 , and farm butter at 62 cents per pound was 1 cent higher than in March 1968. Milk used in the manufacture of all dairy products averaged $\$ 3.33$ per hundred, the same as in March 1968. Cheese milk decreased to $\$ 3.30$ per hundred, a decreasid of 6 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in March 1969, not more than 70 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal payment during 1966-67 dairy year amounted to approximately 75 cents per hundred pounds for manufacturing milk and cream. Commencing on April 1, 1967, these payments were increased to $\$ 1.10$ per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat, and on April 1, 1968, further increased to $\$ 1.16$ per hundred pounds for 3.5 per cent processing milk or 36.42 cents per pound butterfat. Effective with August 1968 deliveries, payments were reduced from $\$ 1.16$ to $\$ 1.10$ per cwt. of milk. Subsidy payments to cream shippers remained unchanged. On April 1, 1966, the Quebec government started to make direct payments to farmers on the basis of 5 cents per pound butterfat for the period April to September inclusive, and 10 cents per pound butterfat for the period October 1966 to March 1967 inclusive. Effective from October 1, 1966 to March 31, 1967, Ontario producers also received 25 cents a hundred on all industrial or manufactured milk, basis 3.5 per cent butterfat, and 25 cents a hundred on all secondary and excess milk delivered to the dairy, as well as 10 cents per pound butterfat on all cream grading Special and First Grade. Effective April 1, 1967, Quebec and Ontario discontinued to make direct payments to farmers for manufacturing milk and cream.

Production. - Creamery butter production amounted to 19.3 million pounds in March 1969 , an increase of approximately 2.8 million pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on April 1, 1969, amounted to 32.1 million pounds, approximately 13.7 million pounds higher than at April last year. On March 1, 1969, stock holdings at 40.4 million pounds were 12.9 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on March 1, plus production and imports during the month, amounted to 59.7 million pounds of butter at March 31, 1969. This was an increase of approximately 15.7 million pounds compared to the corresponding supply figure at March 31, 1968.

Domestic disappearance. - The domestic disappearance of creamery butter in March amounted to 27.6 million pounds of butter, an increase of 2.0 million pounds or 7.8 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.32 pounds as compared with 1.23 pounds in March 1968.

Prices at Montreal. - Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in March, as against 63 cents in March 1968.

## Cheddar cheese

Production. - Cheddar cheese production in March amounted to approximately 8.3 million pounds, an increase of about 799 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged $451 / 4$ cents per pound in March. The comparative price in 1968 was $441 / 4$ cents.

## Ice cream mix

The quantity of ice cream mix manufactured in March was approximately 2.2 million gallons or 148 thousand gallons more than that produced a year ago.

TABLE 12. Cheese, Supply and Disposition, Canada, March and Cumulative January to March 1965 to 1969

(1) Data for 1969 are preliminary and subject to revision.

TABLE 13. Principal Concentrated Milk Products, Supply and Disposision, Canada, March and cumulative January to March 1965 to 1969

(1) Data for 1969 are preliminary and subject to revision.
(2) Disappearance for the month cannot be estimated because month-end stocks and exports (with inevitable lag) exceed total supply.

TABLE 15. Production of Other Products in Ice Cream Industry, Canada, April and Cumulative January to April 1968 and 1969

| Year | Milkshake mix |  | Sherbet |  | Water ices |  | Ice milk |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Apri 1 | Jan. - Apr. | April | Jan. - Apr. | April | Jan. - Apr. | April | Jan. - Apr |
|  | thousand gallons |  |  |  |  |  |  |  |
| 1968 | 78.3 | 234.6 | 75.1 | 230.7 | 346.2 | 753.7 | 129.8 | 363.7 |
| 1969 | 86.8 | 256.2 | 71.3 | 222.3 | 311.9 | 712.7 | 106.5 | 357.7 |

TABLE 16. Total Reported Domestic Sales of Skim Milk Powder with Related Price Data, Quebec and Ontario, April 1969 (1)
(Data on Export Sales not included due to disclosure provisions of Statistics Act)

| Province and classification | Domestic sales of skim milk powder |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Total reported | Range of reported prices(2) | Weighted average selling price F.O.B. plant (net) | Price range of "bulk of sales" |
|  | '000 lb. | $k$ per 1 l . | k per 1 lb . | k per 1 l . |
| Quebec: |  |  |  |  |
| Spray ........ | 7,353 | 15.1-23.8 | 19.45 | 19.6-20.0 |
| Roller ....... | 703 | 14.1-18.8 | 17.65 | 18.1-18.5 |
| Feed | 501 | $9.6-18.0$ | 14.23 | 15.6-16.0 |
| Ontario: |  |  |  |  |
| Spray ........ | 6,140 | 14.1-24.5 | 19.91 | $19.6-20.0$ |
| Roller ....... | 716 | 17.6-19.5 | 18.58 | 18.6-19.0 |
| Feed ......... | 254 | 5.8-17.0 | 14.87 | 16.1-16.5 |

(1) At time of publication reports had not been received from 5 of 60 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.
(2) Mid-points of lowest and highest half cent range in which sales were reported.
