Price: \$2.00 per year

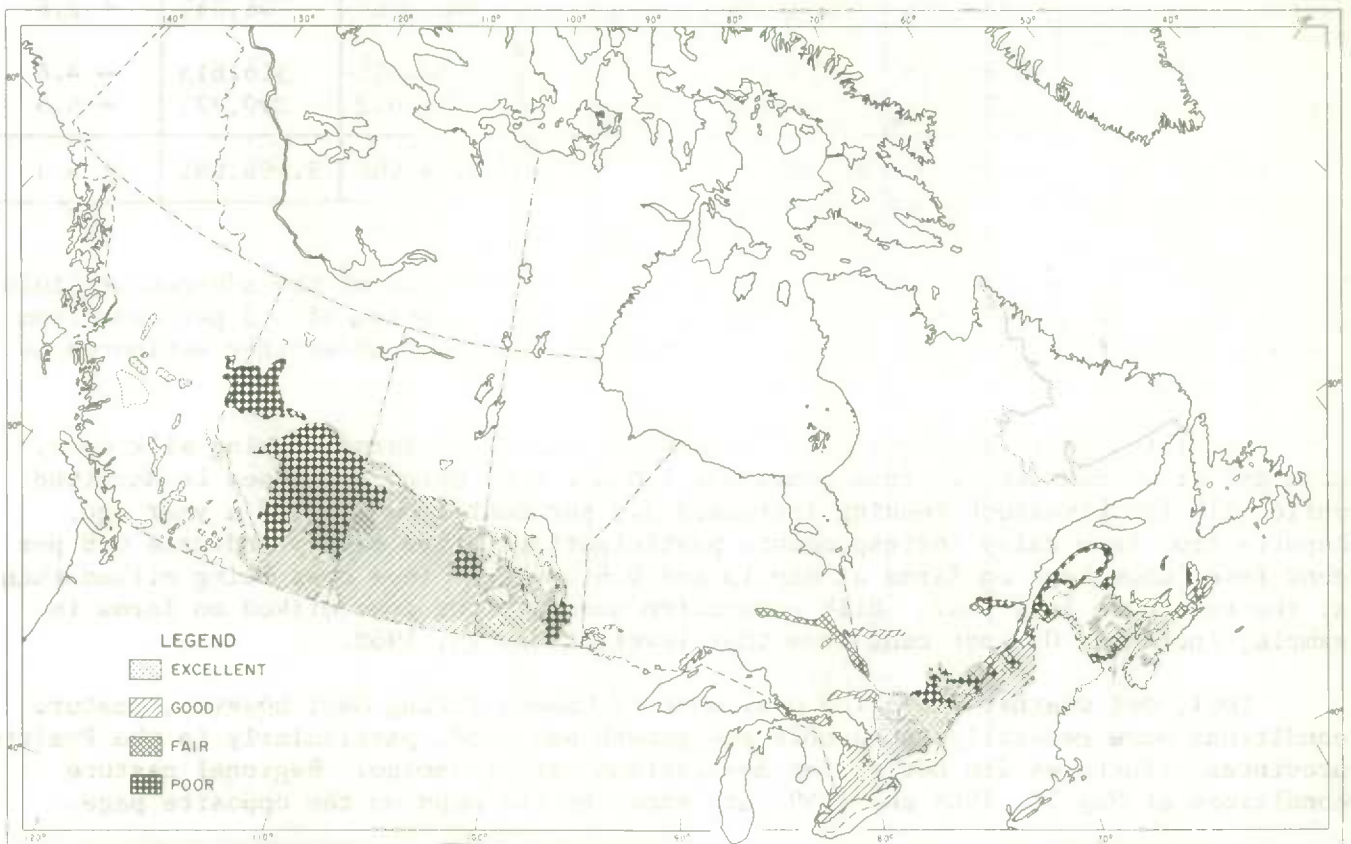

WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA
BY MONTHS 1968 AND 1969

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

MAY 15th 1969

MAY 15th 1968

DERIVED FROM REPORTS BY ABOUT 4,500 DAIRY CORRESPONDENTS

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS
Preliminary Indications of the Dairy Situation, May 1969

The preliminary estimate of milk produced in May is 1,805,000,000 pounds which is 0.8 per cent below production in the corresponding month last year. This would make the total estimate of production during the first five months of the year 6,795,000,000 pounds or 2.3 per cent above production in the January-May period a year ago.

Almost 68 per cent of the milk produced in May, or 1,226,000,000 pounds, was used for dairy factory products. This is slightly less than factory utilization in May 1968. Creamery butter production during the month accounted for 842,000,000 pounds of milk, 1.0 per cent more than in May a year ago, while milk used in the manufacture of ice cream mix advanced 7.2 per cent. Approximately 4.6 and 3.9 per cent less milk was used for factory cheese and concentrated whole milk products, respectively, than in May 1968. During the January-May period, 6.1 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
 May and January to May 1968 and 1969

Product	May			January - May		
	1968	1969	Percentage change	1968	1969	Percentage change
	'000 lb.		%	'000 lb.		%
Creamery butter .	833,531	842,143	+ 1.0	2,476,631	2,684,238	+ 8.4
Factory cheese ..	232,975	222,199	- 4.6	688,954	706,859	+ 2.6
Concentrated whole milk products .	86,716	83,352	- 3.9	332,011	316,615	- 4.6
Ice cream mix ...	72,817	78,039	+ 7.2	272,072	290,973	+ 6.9
Totals	1,226,039	1,225,733	-	3,769,668	3,998,685	+ 6.1

Fluid sales of milk and cream during May, for purposes of the advance preliminary estimate, are calculated at 412,000,000 pounds, a decrease of 3.5 per cent from sales in May 1968. This assumes the same relationship to year-earlier estimates as for the month of April.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.8 per cent below that used in May 1968, while milk for Livestock feeding increased 3.3 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.8 per cent fewer cows kept on farms at May 15 and 0.8 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in sample, increased 0.9 per cent from that level at May 15, 1968.

Cool, wet weather prevailed over most of Canada during May; however, pasture conditions were generally favourable and growth was good, particularly in the Prairie provinces. Pastures did not suffer any serious winter damage. Regional pasture conditions at May 15, 1968 and 1969, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN APRIL 1969

Farm Milk Production. — The estimated quantity of milk produced on farms in April amounted to 1,572 million pounds, an increase of 39 million pounds or 2.6 per cent over that of April 1968. Of this amount, 984 million pounds or 63 per cent was utilized in factory production, and approximately 414 million pounds or 26 per cent was used for fluid sales. During the January-April period, the estimated production was 4,990 million pounds, an increase of 167 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-April period amounted to 2,773 million pounds while fluid sales accounted for 1,669 million pounds.

Fluid Sales. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 414 million pounds in April, a decrease of approximately 15 million pounds from April of last year. This included about 351 million pounds of fluid milk, comprising about 22 per cent of the farm milk supply, and fluid cream sales of 63 million pounds representing about 4 per cent. During the four month period, fluid sales totalled 1,669 million pounds, a decrease of 57 million pounds or 3.3 per cent below those of the corresponding period a year earlier.

Farm Butter. — Butter made on farms in April amounted to 228,000 pounds, decreasing 12 per cent from the corresponding month in 1968. For the January-April period, 884,000 pounds were produced, a decrease of 8 per cent from the same period last year.

Farm Cash Receipts. — Cash receipts from the sale of dairy products in April amounted to \$54,722,000. This represented an increase of 5.3 per cent or \$2,775,000 from the corresponding month last year. The weighted average value of \$3.91 per hundred pounds of milk was 8 cents higher than in April 1968. Fluid milk at \$6.31 per hundred was 40 cents higher than in April 1968. Cream for butter at 65.9¢ per pound butterfat was 1.3¢ higher than in April 1968, and farm butter at 62 cents per pound was 1 cent higher than in April 1968. Milk used in the manufacture of all dairy products averaged \$3.31 per hundred, 1 cent higher than in April 1968. Cheese milk at \$3.21 per hundred, was the same as in the corresponding month a year earlier. Of all the milk utilized for factory dairy products in April 1969, not more than 70 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1967-68 dairy year amounted to approximately \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. Commencing on April 1, 1968, these net payments were increased to \$1.16 and 36.42 cents, respectively, for milk and cream; however, effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per hundred for milk but that for cream remained unchanged. On April 1, 1969, average payments were reduced to approximately 96 cents per hundred pounds of milk and 34.71 cents for cream, dependent on deliveries up to quota and on those in excess of quota during the dairy year and under certain conditions subject to adjustment.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN APRIL 1969

Creamery butter

Production. - Creamery butter production amounted to 28.9 million pounds in April 1969, an increase of approximately 2.6 million pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on May 1, 1969, amounted to 34.9 million pounds, approximately 17.1 million pounds higher than at May 1, last year. On April 1, 1969, stock holdings at 32.1 million pounds were 13.7 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on April 1, plus production and imports during the month, amounted to 61.0 million pounds of butter at April 30, 1969. This was an increase of approximately 16.3 million pounds compared to the corresponding supply figure at April 30, 1968.

Domestic disappearance. - The domestic disappearance of creamery butter in April amounted to 26.1 million pounds of butter, a decrease of 0.8 million pounds or 3.1 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.25 pounds as compared with 1.30 pounds in April 1968.

Prices at Montreal. - Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in April, as against 63 cents in April 1968.

Cheddar cheese

Production. - Cheddar cheese production in April amounted to approximately 12.5 million pounds, a decrease of about 461 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged 45 1/2 cents per pound in April. The comparative price in 1968 was 44 1/4 cents.

Ice cream mix

The quantity of ice cream mix manufactured in April was approximately 2.3 million gallons or 9 thousand gallons less than that produced a year ago.
