JUNE 1969

Price: \$2.00 per year

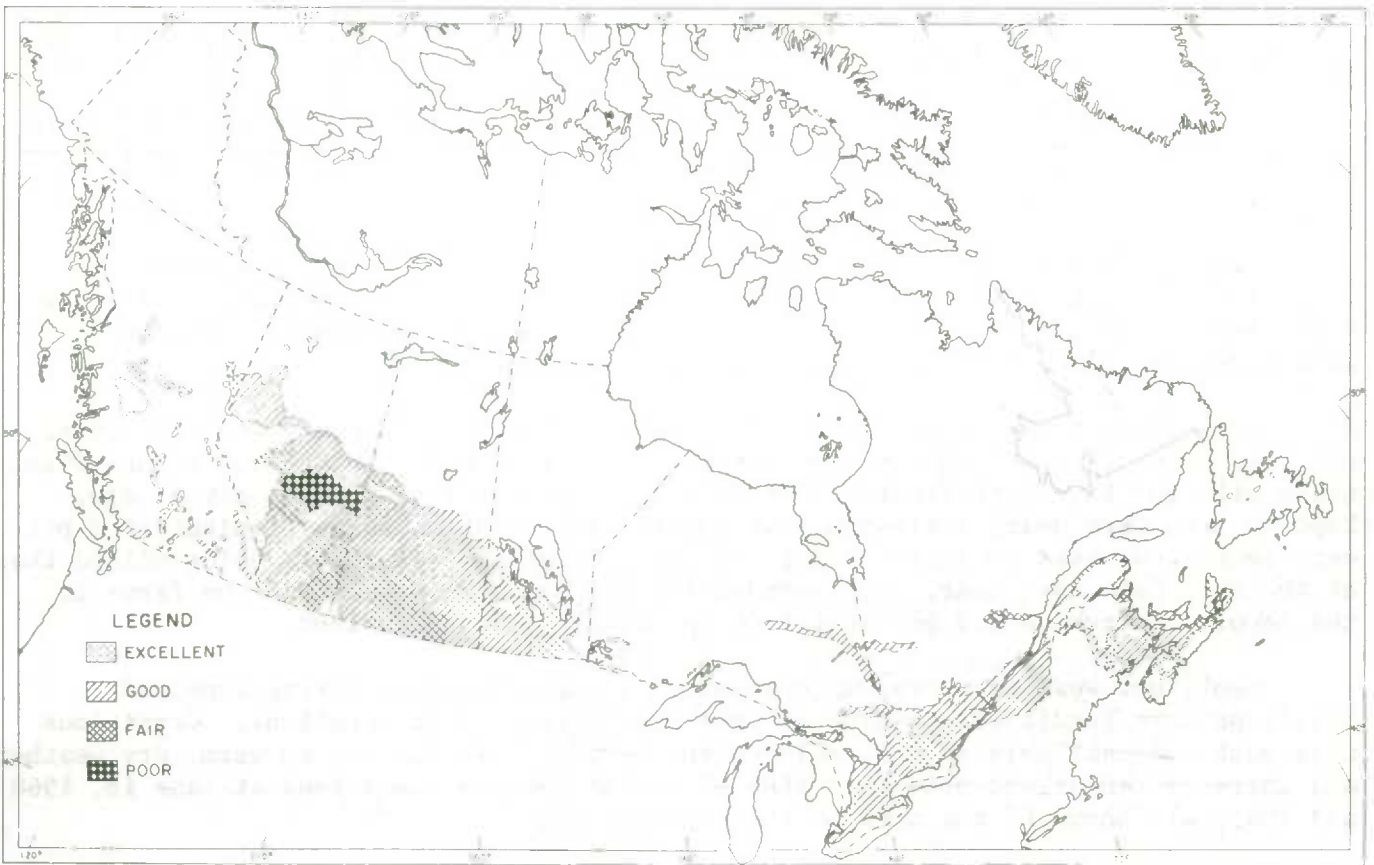

WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA
BY MONTHS 1968 AND 1969

PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

JUNE 15th 1969

JUNE 15th 1968

Preliminary Indications of the Dairy Situation, June 1969

The preliminary estimate of milk produced in June is 2,085,000,000 pounds which is 1.2 per cent above production in the corresponding month last year. This would make the total estimate of production during the first six months of the year 8,893,000,000 pounds or 2.2 per cent above production in the January-June period a year ago.

Slightly more than 72 per cent of the milk produced in June, or 1,511,000,000 pounds, was used for dairy factory products. This is 1.2 per cent above factory utilization in June 1968. Creamery butter production during the month accounted for 1,059,000,000 pounds of milk, 2.7 per cent more than in June a year ago, while milk used in the manufacture of ice cream mix advanced 7.5 per cent. Approximately 2.6 and 9.7 per cent less milk was used for factory cheese and concentrated whole milk products, respectively, than in June 1968. During the January-June period, 4.5 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, June and January to June 1968 and 1969

Products	June			January - June		
	1968	1969	Per-centage change	1968	1969	Per-centage change
	'000 lb.		%	'000 lb.		%
Creamery butter	1,030,746	1,058,967	+ 2.7	3,507,377	3,734,009(1)	+ 6.5
Factory cheese	284,393	277,030	- 2.6	973,347	983,889	+ 1.1
Concentrated whole milk products	96,075	86,714	- 9.7	428,086	403,329	- 5.8
Ice cream mix	82,042	88,200	+ 7.5	354,114	379,173	+ 7.1
Totals	1,493,256	1,510,911	+ 1.2	5,262,924	5,500,400(1)	+ 4.5

(1) Includes a downward adjustment of 9,196,000 lbs. of milk for creamery butter in Manitoba for the month of February.

Fluid sales of milk and cream during June, for purposes of the advance preliminary estimate, are calculated at 426,000,000 pounds, an increase of 1.7 per cent from the sales in June 1968. This assumes the same relationship to year-earlier estimates as for the month of May.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.3 per cent below that used in June 1968, while milk for Livestock feeding increased 3.6 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.7 per cent fewer cows kept on farms at June 15 and 0.6 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 3.3 per cent from the level at June 15, 1968.

Cool, wet weather prevailed over most of eastern Canada during June, as a result pasture conditions at June 15 were generally good to excellent. Conditions were much more variable in the Prairies and British Columbia due to warm, dry weather and there was an urgent need for rain. Regional pasture conditions at June 15, 1968 and 1969, are shown by the maps on the opposite page.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN MAY 1969

Farm milk production. - The estimated quantity of milk produced on farms in May amounted to 1,827 million pounds, an increase of 8 million pounds or 0.4 per cent over that of May 1968. Of this amount, 1,226 million pounds or 67 per cent was utilized in factory production, and approximately 434 million pounds or 24 per cent was used for fluid sales. During the January - May period, the estimated production was 6,808 million pounds, an increase of 166 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January - May period amounted to 3,989 million pounds while fluid sales accounted for 2,103 million pounds.

Fluid sales. - Sales of fluid milk and cream, the latter expressed as milk, amounted to 434 million pounds in May, an increase of approximately 7 million pounds from May of last year. This included about 367 million pounds of fluid milk, comprising about 20 per cent of the farm milk supply, and fluid cream sales of 67 million pounds representing about 4 per cent. During the five month period, fluid sales totalled 2,103 million pounds, a decrease of 50 million pounds or 2.3 per cent below those of the corresponding period a year earlier.

Farm butter. - Butter made on farms in May amounted to 254,000 pounds, decreasing 8 per cent from the corresponding month in 1968. For the January - May period, 1,138,000 pounds were produced, a decrease of 8 per cent from the same period last year.

Farm cash receipts. - Cash receipts from the sale of dairy products in May amounted to \$62,990,000. This represented an increase of 4.2 per cent or \$2,537,000 from the corresponding month last year. The weighted average value of \$3.79 per hundred pounds of milk was 13 cents higher than in May 1968. Fluid milk at \$6.30 per hundred was 39 cents higher than in May 1968. Cream for butter increased from 63.9 cents to 65.2 cents per pound, and farm butter at 62 cents per pound was 1 cent higher than in May 1968. Milk used in the manufacture of all dairy products averaged \$3.30 per hundred, 4 cents higher than in May 1968. Cheese milk at \$3.18 per hundred was the same as in the corresponding month a year earlier. Of all the milk utilized for factory dairy products in May 1969, not more than 70 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1967-68 dairy year amounted to approximately \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. Commencing on April 1, 1968, these net payments were increased to \$1.16 and 36.42 cents, respectively, for milk and cream; however, effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per hundred for milk but that for cream remained unchanged. On April 1, 1969, average payments were reduced to approximately 96 cents per hundred pounds of milk and 34.71 cents for cream, dependent on deliveries up to quota and on those in excess of quota during the dairy year and under certain conditions subject to adjustment.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN MAY 1969

Creamery butter

Production. - Creamery butter production amounted to 36.0 million pounds in May 1969, an increase of approximately 0.4 million pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on June 1, 1969, amounted to 45.1 million pounds, approximately 20.6 million pounds higher than at June 1, last year. On May 1, 1969, stock holdings at 34.9 million pounds were 17.1 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on May 1, plus production and imports during the month, amounted to 71.0 million pounds of butter at May 31, 1969. This was an increase of approximately 17.5 million pounds compared to the corresponding supply figure at May 31, 1968.

Domestic disappearance. - The domestic disappearance of creamery butter in May amounted to 25.8 million pounds of butter, a decrease of 3.1 million pounds or 10.9 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.23 pounds as compared with 1.39 pounds in May 1968.

Prices at Montreal. - Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in May as against 63 cents in May, 1968.

Cheddar Cheese

Production. - Cheddar cheese production in May amounted to approximately 17.1 million pounds, a decrease of about 1,126 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged 45 1/2 cents per pound in May. The comparative price in 1968 was 47 cents.

Ice cream mix

The quantity of ice cream mix manufactured in May was approximately 2.9 million gallons or 129 thousand gallons more than that produced a year ago.
