# PASTURE CONDITIONS ON FARMS KEEPING MILK COWS

# Preliminary Indications of the Dairy Situation, July 1969

The preliminary estimate of milk produced in July is 2,037,000,000 pounds which is 2.8 per cent above production in the corresponding month last year. This would make the total estimate of production during the first seven months of the year 10,922,000,000 pounds or 2.3 per cent above production in the January - July period a year ago.

Slightly more than 73 per cent of the milk produced in July, or 1,489,000,000 pounds, was used for dairy factory products. This is 4.3 per cent above factory utilization in July 1968. Creamery butter production during the month accounted for 1,040,000,000 pounds of milk. 4.4 per cent more than in July a year ago; however, milk used for factory cheese, concentrated whole milk products and ice cream mix increased 2.5, 11.6 and 2.8 per cent, respectively. During the January - July period, 4.6 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, July and January to July 1968 and 1969

(1) Includes an upward adjustment of 6,391,000 lbs. of milk in June as a result of a revision to cheddar cheese in Quebec.

Fluid sales of milk and cream during July, for purposes of the advance preliminary estimate, are calculated at 412,000,000 pounds, a decrease of 1.1 per cent from the sales in July 1968. This assumes the same relationship to year-earlier estimates as for the April - June period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 2.3 per cent below that used in July 1968, while milk for Livestock feeding increased 1.7 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.7 per cent fewer cows kept on farms at July 15 and 1.0 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 5.4 per cent from the level at July 15, 1968.

Pasture conditions during July were generally good throughout most areas of Canada, except for sections of central and north-eastern British Columbia where conditions were generally poor. Regional pasture conditions at July 15, 1968 and 1969, are shown by the maps on the opposite page.

## FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JUNE 1969

<u>Farm milk production</u>. — The estimated quantity of milk produced on farms in June amounted to 2,078 million pounds, an increase of 19 million pounds or 0.9 per cent over that of June 1968. Of this amount, 1,517 million pounds or 73 per cent was utilized in factory production, and approximately 413 million pounds or 20 per cent was used for fluid sales. During the January-June period, the estimated production was 8,886 million pounds, an increase of 185 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-June period amounted to 5,507 million pounds while fluid sales accounted for 2,516 million pounds.

<u>Fluid sales.</u> — Sales of fluid milk and cream, the latter expressed as milk, amounted to 413 million pounds in June, a decrease of approximately 6 million pounds from June of last year. This included about 347 million pounds of fluid milk, comprising about 17 per cent of the farm milk supply, and fluid cream sales of 66 million pounds representing about 3 per cent. During the six month period, fluid sales totalled 2,516 million pounds, a decrease of 56 million pounds or 2.2 per cent below those of the corresponding period a year earlier.

<u>Farm butter</u>. — Butter made on farms in June amounted to 252,000 pounds, decreasing 8 per cent from the corresponding month in 1968. For the January-June period, 1,390,000 pounds were produced, a decrease of 8 per cent from the same period last year.

Farm cash receipts. - Cash receipts from the sale of dairy products in June amounted to \$70,711,000. This represented an increase of 4.3 per cent or \$2,908,000 from the corresponding month last year. The weighted average value of \$3.66 per hundred pounds of milk was 11 cents higher than in June 1968. Fluid milk at \$6.30 per hundred was 40 cents higher than in June 1968. Cream for butter at 64.6 per pound butterfat was 1.0 cent higher than in June 1968, and farm butter at 62 cents per pound was 1 cent higher than in June 1968. Milk used in the manufacture of all dairy products averaged \$3.31 per hundred, 5 cents higher than in June 1968. Cheese milk decreased to \$3.19 per hundred, a decrease of 1 cent per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in June 1969, not more than 85 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1967-68 dairy year amounted to approximately \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. Commencing on April 1, 1968, these net payments were increased to \$1.16 and 36.42 cents, respectively, for milk and cream; however, effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per hundred for milk but that for cream remained unchanged. On April 1, 1969, average payments were reduced to approximately 96 cents per hundred pounds of milk and 34.71 cents for cream, dependent on deliveries up to quota and on those in excess of quota during the dairy year and under certain conditions subject to adjustment.

#### PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JUNE 1969

## Creamery butter

Production. - Creamery butter production amounted to 45.3 million pounds in June 1969, an increase of approximately 1.2 million pounds from production in the same month of the previous year.

<u>Stocks.</u> — Holdings of creamery butter in store on July 1, 1969, amounted to 64.4 million pounds, approximately 21.1 million pounds higher than at July 1, last year. On June 1, 1969, stock holdings at 45.1 million pounds were 20.6 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on June 1, plus production and imports during the month, amounted to 90.4 million pounds of butter at June 30, 1969. This was an increase of approximately 21.8 million pounds compared to the corresponding supply figure at June 30, 1968.

Domestic disappearance. - The domestic disappearance of creamery butter in June amounted to 25.9 million pounds of butter, an increase of 0.1 million pounds or 2.7 per cent more than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.24 pounds as compared with 1.21 pounds in June 1968.

Prices at Montreal. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in June as against 63 cents in June 1968.

## Cheddar Cheese

<u>Production</u>. - Cheddar cheese production in June amounted to approximately 22.7 million pounds, a decrease of about 202 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged 47 1/4 cents per pound in June, the same as in June 1968.

#### Ice cream mix

The quantity of ice cream mix manufactured in June was approximately 3.3 million gallons or 228 thousand gallons more than that produced a year ago.

TABLE 12. Average Farm Values of Cream, Milk and Farm Butter, by Province, June 1968 and 1969(1) - Concluded

(1) See paragraph 5, page 4, re farm cash receipts.

(2) Includes the milk equivalent of cheddar and other factory cheese made from whole milk and cream.

(3) Includes columns 2, 3 and 4.(4) Includes columns 1, 2, 3 and 4.

(5) Based on class III qualifying milk.

(6) Based on class I qualifying milk.

\* Respective values for May should have read \$5.30, \$5.11 and \$2.74 per cwt.

TABLE 18: Total Reported Domestic Sales of Skim Milk Powder with Related Price Data, Quebec and Ontario, July 1969(1)

(Data on Export Sales not included due to disclosure provisions of Statistics Act)

	Domestic sales of skim milk powder								
Province and classification	Total reported	Range of reported prices(2)	Weighted average selling price F.O.B. plant (net)	Price range of "bulk of sales"					
-	'000 lb.	∉ per lb.	¢ per 1b.	¢ per 1b.					
Quebec:									
Spray	18,083	14.8 - 23.8	19.55	19.6 - 20.0					
Roller	1,143	14.8 - 19.8	17.33	18.1 - 18.5					
Feed	1,083	8.8 - 17.8	14.63	15.1 - 15.5					
Ontario:									
Spray	9,699	14.8 - 24.3	19.87	19.6 - 20.0					
Roller	1,165	15.8 - 19.3	18.26	18.1 - 18.5					
Feed	94	4,8 - 17,8	15.07	15.6 - 16.0					

(1) At time of publication reports had not been received from 6 of 60 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

(2) Mid-points of lowest and highest half cent range in which sales were reported.
