WHOLE MILK EQUIVALENT OF DAIRY FACTORY PRODUCTS, CANADA BY MONTHS 1969 AND 1970

Preliminary Indications of the Dairy Situation, February 1970

The preliminary estimate of milk produced in February is 1,071,000,000 pounds which is 5.3 per cent above production in the corresponding month last year. This would make the total estimate of production during the first two months of the year 2,243,000,000 pounds or 5.0 per cent above production in the January-February period a year ago.

Almost 52 per cent of the milk produced in February, or 554,000,000 pounds, was used for dairy factory products. This is 8.2 per cent above factory utilization in February 1969. Creamery butter production during the month accounted for 348,000,000 pounds of milk, 5.9 per cent more than in February a year ago; however milk used for factory cheese and ice cream mix increased 28.1 and 3.8 per cent, respectively. Approximately 12.7 per cent less milk was used for concentrated whole milk products than in February 1969. During January and February, 7.0 per cent more milk was utilized for dairy products than in the corresponding period a year ago.

Fluid sales of milk and cream during February, for purpose of the advance preliminary estimate, are calculated at 405,000,000 pounds, an increase of 2.6 per cent from the sales in February 1969. This assumes the same relationship to year-earlier estimates as for the November-January period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 1.7 per cent above that used in February 1969, while milk used for livestock feeding increased 1.2 per cent from that of a year ago. Reports from farmdairy correspondents participating in the survey indicate 2.2 per cent fewer cows kept on farms at February 15, and 1.0 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 6.6 per cent from the level at February 15, 1969.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JANUARY 1970

Farm Milk Production: The estimated quantity of milk produced on farms in January amounted to 1,172 million pounds, an increase of 54 million pounds or 4.8 per cent over that of January 1969. Of this amount, 615 million pounds or 53 per cent was utilized in factory production, and approximately 439 million pounds or 37 per cent was used for fluid sales.

Fluid Sales: Sales of fluid milk and cream, the latter expressed as milk, amounted to 439 million pounds in January, an increase of approximately 18 million pounds from January of last year. This included about 377 million pounds of fluid milk, comprising about 32 per cent of the farm milk supply, and fluid cream sales of 62 million pounds representing 5 per cent.

Farm Butter: Butter made on farms in January amounted to 216,000 pounds, decreasing 3 per cent from the corresponding month in 1969.

Farm Cash Receipts. — Cash receipts from the sale of dairy products in January amounted to \$45,751,000. This represented an increase of 6.2 per cent or \$2,665,000 from the corresponding month last year. The weighted average value of \$4.34 per hundred pounds of milk was 4 cents higher than in January 1969. Fluid milk at \$6.40 per hundred was 6 cents higher than in January 1969. Cream for butter at 65.3 cents per pound butterfat was 0.3 cents lower than in January 1969, and farm butter at 63 cents per pound was 2 cents higher than in January 1969. Milk used in the manufacture of all dairy products averaged \$3.40 per hundred, 4 cents higher than in January 1969. Cheese milk increased to \$3.50 per hundred, an increase of 3 cents per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in January 1970, not more than 56 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1967-68 dairy year amounted to approximately \$1.10 per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. Commencing on April 1, 1968, these net payments were increased to \$1.16 and 36.42 cents, respectively, for milk and cream; however, effective with August 1968 deliveries, payments were reduced from \$1.16 to \$1.10 per hundred for milk but that for cream remained unchanged. On April 1, 1969, average payments were reduced to approximately 96 cents per hundred pounds of milk and 34.71 cents for cream, dependent on deliveries up to quota and on those in excess of quota during the dairy year and under certain conditions subject to adjustment.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JANUARY 1970

Creamery butter

Production. - Creamery butter production amounted to 16.8 million pounds in January 1970, an increase of approximately 0.6 million pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on February 1, 1970, amounted to 82.5 million pounds, approximately 30.9 million pounds higher than at February 1 last year. On January 1, 1970, stock holdings at 90.0 million pounds were 27.5 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on January 1, plus production and imports during the month, amounted to 106.8 million pounds of butter at January 31, 1970. This was an increase of approximately 28.1 million pounds compared to the corresponding supply figure at January 31, 1969.

Domestic disappearance. - The domestic disappearance of creamery butter in January amounted to 24.3 million pounds of butter, a decrease of 2.8 million pounds or 10.2 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.14 pounds as compared with 1.28 pounds in January 1969.

Prices at Montreal. - Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per pound in January, the same as in January 1969.

Cheddar cheese

Production. - Cheddar cheese production in January amounted to approximately 8.6 million pounds, an increase of about 1.4 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in January, the same as in January 1969.

Ice Cream mix

The quantity of ice cream mix manufactured in January was approximately 1.6 million gallons or 154 thousand gallons more than that produced a year ago.

(1) Data for 1970 are preliminary and subject to revision.

(2) Not yet available.

(3) Disappearance for the month cannot be estimated because month end stocks exports (with inevitable lag) exceed total supply.

(4) Due to lagged reporting of export data, disappearance probably under-estimated.
