## THE DAIRY REVIEW

APRIL 1970
5503-504
The contents of thls document may be used Ireely but DBS should be credited when republlshing all or any part of It.

The preliminary estimate of milk produced in March is 1,312,000,000 pounds which is 1.5 per cent above production in the corresponding month last year. This would make the total estimate of production during the first three months of the year $3,560,000,000$ pounds or 3.9 per cent above production in the January - March period a year ago.

Almost 55 per cent of the milk produced in March, or $719,000,000$ pounds, was used for dairy factory products. This is 1.1 per cent above factory utilization in March 1969. Creamery butter production during the month accounted for $467,000,000$ pounds of milk, 1.7 per cent more than in March a year ago; however, milk used for factory cheese and ice cream mix increased 14.2 and 2.9 per cent, respectively. Approximately 29.7 per cent less milk was used for concentrated whole milk products than in March 1969. During the January - March period, 4.9 per cent more milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products, March and January to March 1969 and 1970

| Product | March |  |  | January - March |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1969 | 1970 | Percentage change | 1969 | 1970 | Percentage change |

| Totals | 711,347 | 719,486 | + 1.1 | 1,803,997 | 1,893,247(1) | $+4.9$ |

(1) Includes an upward adjustment of $4,092,000 \mathrm{lbs}$. of milk in february as a result of a revision to cheddar cheese in Quebec.

Fluid sales of milk and cream during March, for purposes of the advance preliminary estimate, are calculated at $449,000,000$ pounds of milk, an increase of 3.0 per cent from the sales in March 1969. This assumes the same relationship to yearearlier estimates as for the month of February.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was virtually the same as that used in March 1969, while milk used for livestock feeding was 2.5 per cent below that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 2.6 per cent fewer cows kept on farms at March 15, and 2.9 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 3.1 per cent from the level at Narch $15,1959$.

## FARii IILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN FEBRUARY 1970

Farm milk production. - The estimated quantity of milk produced on farms in February amounted to 1,077 million pounds, an increase of 59 million pounds or 5.8 per cent over that of February 1969. Of this amount, 559 million pounds or 52 per cent was utilized in factory production, and approximately 407 million pounds or 38 per cent was used for fluid sales. During the January-February period, the estimated production was 2,248 million pounds, an increase of 113 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-February period amounted to 1,174 million pounds while fluid sales accounted for 846 million pounds.

Fluid sales. - Sales of fluid milk and cream, the latter expressed as milk, amounted to 407 million pounds in February, an increase of approximately 12 million pounds from February of last year. This included about 348 million pounds of fluid milk, comprising about 32 per cent of the farm milk supply, and fluid cream sales of 59 million pounds representing about 6 per cent. During the two month period, fluid sales totalled 846 million pounds, an increase of 30 million pounds or 3.7 per cent over those of the corresponding period a year earlier.

Farm butter. - Butter made on farms in February amounted to 217,000 pounds, increasing l per cent from the corresponding month in 1969. For the January-February period, 433,000 pounds were produced, a decrease of 1 per cent from the same period last year.

Farm cash receipts. - Cash receipts from the sale of dairy products in February amounted to $\$ 41,623,000$. This represented an increase of 6.1 per cent or $\$ 2,401,000$ from the corresponding month last year. The weighted average value of $\$ 4.31$ per hundred pounds of milk was 1 cent lower than in February 1969. Fluid milk at $\$ 6.39$ per hundred was 7 cents higher than in February 1969. Cream for butter at 65.4 cents per pound butterfat was 0.2 cents lower than in February 1969, and farm butter at 63 cents per pound was the same as in February 1969. Milk used in the manufacture of all dairy products averaged $\$ 3.33$ per hundred, 1 cent lower than in February 1969. Cheese milk decreased to $\$ 3.38$ per hundred, a decrease of $l$ cent per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in February 1970 not more than 62 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Direct Federal subsidy payments during the 1967-68 dairy year amounted to approximately $\$ 1.10$ per hundred pounds for 3.5 per cent processing milk or the equivalent of 31.42 cents per pound butterfat. Commencing on April 1, 1968, these net payments were increased to $\$ 1.16$ and 36.42 cents, respectively, for milk and cream; however, effective with August 1968 deliveries, payments were reduced from $\$ 1.16$ to $\$ 1.10$ per hundred for milk but that for cream remained unchanged. On April 1, 1969, average payments were reduced to approximately 96 cents per hundred pounds of milk and 34.71 cents for cream, dependent on deliveries up to quota and on those in excess of quota during the dairy year and under certain conditions subject to adjustment.

## Teanaty butter

Eroduction. - Creamery butter production amounted to 14.9 million pounds in Fobruary 1970, an increase of approximately 0.8 million pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on March 1, 1970, amounted to 73.4 million pounds, approximately 32.7 million pounds higher than at March last year. On February 1, 1970, stock holdings at 82.5 million pounds were 30.9 million pounds more than at the same date a year earlier.

Supply. - Stocks of creamery butter on February 1, plus production and imports during the month, amounted to 97.4 million pounds of butter at February 28, 1970. This was an increase of approximately 31.7 million pounds compared to the corresponding supply figure at February 28, 1969.

Domestic disappearance. - The domestic disappearance of creamery butter in February amounted to 24.0 million pounds of butter, a decrease of 1.0 million pounds or 4.1 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.13 pounds as compared with 1.19 pounds in February 1969.

Prices at Montreal. - Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 65 cents per potnd in February, the same as in February 1969.
Cheddar cheese
Production. - Cheddar cheese production in February amounted to approximately 7.8 million pounds, an increase of about 2.0 thousand pounds from production in the same month of the previous year.

Prices. - The Belleville price of Ontario coloured cheese averaged 46 1/4 cents per pound in February. The comparative price in 1969 was 45 3/4.

Ice Cream mix
The quantity of ice cream mix manufactured in February was approximately 1.7 million gallons or 25 thousand gallons more than that produced a year ago.

TABLE 2. Cottage Cheese: Production in the First Quarter and for the Year Compared with 1969

| Province | January to March |  |  |
| :---: | :---: | :---: | :---: |

TABLE 13. Cheese, Supply and Disposition, Canada, February and Cumulative January and February 1966 to 1970

(1) Data for 1970 are preliminary and subject to revision.
(2) January disappearance revised to include exports.
(3) Not available.

TABLE 14. Principal Concentrated Milk Products, Supply and Disposiston, Canean, February and Cumulative January and February 1966 to 1970

(1) Data for 1970 are preliminary and subject to revision.
(2) January disappearance revised to include exports.
(3) Less than three firms reporting this item. The figure therefore cannot be shown.
(4) Disappearance for the period cannot be estimated because month-end stocks and exports (with inevitable lag) exceed total supply.
(5) Not available.

TABLE 15. Ice Cream: Production of Hard and Soft Types, by Province, March and Cumulative January to March 1969 and 1970

| Province and year | Hard ice cream |  | Soft ice cream |  | Total ice cream |  |

TABLE 17. Total Reported Domestic Sales of Skim Milk Powder with Related Price Data, Quebec and Ontario, March 1970(1)
(Data on Export Sales not included due to disclosure provisions of Sca:istice scut)

| Province and classification | Domestic sales of skim milk powder |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | ```Total reported``` | Range of reported prices(2) | ```Weighted average selling price F.O.B. plant (net)``` | Price range of "bulk of sales" |
|  | 1000 lb | ¢ per 1 b . | ¢ per lb. | \& per 1 b . |
| Spray | 3,245 | 17.3-21.8 | 19.53 | 19.6-20.0 |
| Roller | 356 | 15.8-18.8 | 17.60 | $17.6-18.0$ |
| Feed | 150 | $9.8-17.8$ | 14.04 | 14.1-14.5 |
| Ontario: |  |  |  |  |
| Spray ........ | 6,118 | 17.3-24.8 | 20.12 | $19.6-20.0$ |
| Roller ....... | 326 | $18.8-19.8$ | 19.23 | 19.6-20.0 |
| Feed ......... | 77 | $9.8-17.8$ | 14.02 | $16.1-16.5$ |
| (1) At time of publication reports had not been received from 7 of 60 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces. <br> (2) Mid-points of lowest and highest half cent range in which sales were reported. |  |  |  |  |
