THE DAIRY REVIEW

BUO: The state of

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, NOVEMBER 1971

The preliminary estimate of milk produced in November is 1,254,000,000 pounds, which is 3.3 per cent above production in the corresponding month last year. This would make the total estimate of production during the first eleven months of the year 16,485,000,000 pounds or 3.2 per cent below production in the January-November period a year ago.

Almost 58 per cent of the milk produced in November, or 727,000,000 pounds, was used for dairy factory products. This is 6.2 per cent above factory utilization in November 1970. Creamery butter production during the month accounted for 389,000,000 pounds of milk, 4.9 per cent less than in November a year ago, while milk used in the manufacture of concentrated whole milk products declined 6.5 per cent. Approximately 35.0 and 6.7 per cent more milk was used for factory cheese and ice cream mix, respectively, than in November 1970. During the January-November period, 5.2 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

TABLE 1. Preliminary Estimates of Milk Equivalent of Dairy Factory Products,
November and January to November 1970 and 1971

		November		January-November			
Product	1970 1971 cer		Per centage change	1970	1971	Per centage change	
	'000 lb.		%	'000 lb.		%	
Creamery butter Factory cheese Concentrated whole milk	409,101 177,406	388,885 239,481	- 4.9 + 35.0	7,295,511 2,167,122	6,374,065 2,483,531	- 12.6 + 14.6	
products	44,693 53,081	41,783 56,634	- 6.5 + 6.7	613,096 784,533	642,019 792,962	+ 4.7	
Totals	684, 281	726,783	+ 6.2	10,860,262	10, 292, 577	- 5.2	

Fluid sales of milk and cream during November, for purposes of the advance preliminary estimate, are calculated at 423,000,000 pounds, an increase of 0.02 per cent from the sales in November 1970. This assumes the same relationship to year-earlier estimates as for the August-October period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 4.1 per cent below that used in November 1970, while milk used for livestock feeding was 0.9 per cent above that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.2 per cent fewer cows kept on farms at November 15, and 4.2 per cent less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 4.1 per cent from the level at November 15, 1970.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN OCTOBER 1971

Farm Milk Production. — The estimated quantity of milk produced on farms in October amounted to 1,493 million pounds, a decrease of 23 million pounds or 1.5 per cent below that of October 1970. Of this amount, 938 million pounds or 63 per cent was utilized in factory production, and approximately 445 million pounds or 30 per cent was used for fluid sales. During the January-October period, the estimated production was 15,231 million pounds, a decrease of 583 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January-October period amounted to 9,566 million pounds while fluid sales accounted for 4,364 million pounds.

Fluid Sales. — Sales of fluid milk and cream, the latter expressed as milk, amounted to 445 million pounds in October, a decrease of approximately 10 million pounds from October of last year. This included about 380 million pounds of fluid milk, comprising about 26 per cent of the farm milk supply, and fluid cream sales of 65 million pounds representing about 4 per cent. During the ten month period, fluid sales totalled 4,364 million pounds, an increase of 49 million pounds or 1.1 per cent over those of the corresponding period a year earlier.

Farm Butter. — Butter made on farms in October amounted to 195,000 pounds, decreasing 16 per cent from the corresponding month in 1970. For the January-October period, 2,108,000 pounds were produced, a decrease of 10 per cent from the same period last year.

Farm Cash Receipts. — Cash receipts from the sale of dairy products in October amounted to \$61,744,000. This represented an increase of 6.5 per cent or \$3,769,000 from the corresponding month last year. The weighted average value of \$4.56 per hundred pounds of milk was 43 cents higher than in October 1970. Fluid milk at \$6.74 per hundred was 29 cents higher than in October 1970. Cream for butter at 67.8 cents per pound butterfat was 2.0 cents higher than in October 1970, and farm butter at 63 cents per pound was 1 cent higher than in October 1970. Milk used in the manufacture of all dairy products averaged \$3.99 per hundred, 56 cents higher than in October 1970. Cheese milk at \$4.10 per hundred, was 62 cents higher than the corresponding month a year earlier. Of all the milk utilized for factory dairy products in October 1971, not more than 73 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, ad act forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

Basic Rates of Subsidy Payments, Holdbacks and Levies for Manufacturing Milk and Cream (Basis 3.5 per cent butterfat) Dairy Years 1970-71 and 1971-72(1)

- (1) Quebec and Ontario producers under the market sharing quota system effective December 1, 1970, receive the full rate of subsidy but a levy is made against the market price. For other provinces the procedure for making payments has not changed, holdbacks are made on subsidy payments. Both systems are subject to rebates.
- (2) Not applicable to Quebec and Ontario beginning December 1, 1970.
- (3) Applies to Quebec cream shippers only. Ontario cream shippers entered the plan on April 1, 1971.
- (4) Announced November 3, 1971. Applies retroactively to April 1, 1971 and future deliveries. A refund will be made to all eligible producers.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN OCTOBER 1971

Creamery Butter

<u>Production</u>. — Creamery butter production amounted to 23.4 million pounds in October 1971, a decrease of approximately 3.7 million pounds from production in the same month of the previous year.

Stocks. — Holdings of creamery butter in store on November 1, 1971, amounted to 68.8 million pounds, approximately 48.8 million pounds less than at November 1, last year. On October 1, 1971 stock holdings at 73.1 million pounds were 45.4 million pounds less than at the same date a year earlier.

Supply. — Stocks of creamery butter on October 1, plus production and imports during the month, amounted to 96.5 million pounds of butter at October 31, 1971. This was a decrease of approximately 49.1 million pounds compared to the corresponding supply figure at October 31, 1970.

Domestic disappearance. — The domestic disappearance of creamery butter in October amounted to 27.7 million pounds of butter, a decrease of 253 thousand pounds or 0.9 per cent less than the corresponding figure for the same month last year. On a per capita basis, it amounted to 1.29 pounds as compared with 1.31 pounds in October 1970.

<u>Prices at Montreal</u>. — Butter prices at Montreal, based on dealers' quotations for first grade solids, averaged 68 cents per pound in October as against 65 cents in October 1970.

Cheddar Cheese

<u>Production</u>. — Cheddar cheese production in October amounted to approximately 19.9 million pounds, an increase of about 6.0 million pounds from production in the same month of the previous year.

<u>Prices</u>. — The Belleville price of Ontario coloured cheese averaged 72 1/2 cents per pound in October. The comparative price in 1970 was 50 1/4.

Ice Cream Mix

The quantity of ice cream mix manufactured in October was approximately 2.1 million gallons or 55 thousand gallons more than that produced a year ago.

⁽¹⁾ See Paragraph 5, page 4, re farm cash receipts. (2) Represents the market price less levies collected under provincial authority. The statistics on monthly levies fluctuate considerably due to reporting procedures. As a result they have been adjusted to represent the current month. Year-end adjustments will be necessary when complete information becomes available.

Feed	224	21.3-25.3	23.89	24.1-24.5	33				
Ontario									
Spray	6,948	15.3-32.8	28.98	27.1-27.5	52				
Roller	-			-	-				
Feed	2,453	21.8-27.8	24.73	24.6-25.0	46				

⁽¹⁾ At time of publication reports had not been received from 5 of 60 plants listed as producing in Quebec and Ontario, therefore, the table should not be interpreted as covering total sales in these provinces.

⁽²⁾ Mid-points of lowest and highest half cent range in which sales were reported.

⁽³⁾ The price range of bulk of sales is the price interval in which the largest volume of sales occurred as compared to all other price intervals.
