PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, DECEMBER, 1971

The preliminary estimate of milk produced in December is 1,234,000,000 pounds, which is 2.0 per cent above production in the corresponding month last year. This would make the total estimate of production during 1971, 17,739,783 pounds or 2.7 per cent below production in the January-December period a year ago.

Approximately 53 per cent of the milk produced in December, or 659,000,000 pounds, was used for dairy factory products. This is 3.6 per cent above factory utilization in December 1970. Creamery butter production during the month accounted for 346,000,000 pounds of milk, 7.5 per cent less than in December a year ago, while milk used in the manufacturing of concentrated whole milk products declined 14.4 per cent. Approximately 33.5 and 5.5 per cent more milk was used for factory cheese and ice cream mix, respectively, than in December 1970. During the January-December period, 4.7 per cent less milk was utilized for dairy factory products than in the corresponding period a year ago.

Fluid sales of milk and cream during December, for purposes of the advance preliminary estimate, are calculated at 468,000,000 pounds, an increase of 1.3 per cent from the sales in December 1970. This assumes the same relationship to year-earlier estimates as for the September-October period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 3.2 per cent below that used in December 1970, while milk used for livestock feeding dropped 3.7 per cent from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.7 per cent more cows kept on farms at December 15, and 4.7 per cent more cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, increased 1.9 per cent from the level at December 15, 1970.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN NOVEMBER 1971

Farm Milk Production - The estimated quantity of milk produced on farms in November amounted to 1,376 million pounds, an increase of 62 million pounds or 5.1 per cent above that of November 1970. Of this amount, 727 million pounds or 53 per cent was utilized in factory production, and approximately 445 million pounds or 35 per cent was used for fluid sales. During the January - November period, the estimated production was 16,507 million pounds, a decrease of 521 million pounds from the corresponding period last year. The quantity of milk utilized for factory production in the January - November period amounted to 10,293 million pounds while fluid sales accounted for 4,809 million pounds.

Fluid Sales - Sales of fluid milk and cream, the latter expressed as milk, amounted to 445 million pounds in November, an increase of approximately 22 million pounds from November of last year. This included about 381 million pounds of fluid milk, comprising about 30 per cent of the farm milk supply, and fluid cream sales of 64 million pounds representing about 5 per cent. During the eleven month period, fluid sales totalled 4,809 million pounds, an increase of 71 million pounds or 1.5 per cent over those of the corresponding period a year earlier.

Farm Butter - Butter made on farms in November amounted to 195,000 pounds, decreasing 14 per cent from the corresponding month in 1970. For the January - November period, 2,303,000 pounds were produced, a decrease of 11 per cent from the same period last year.

Farm Cash Receipts - Cash receipts from the sale of dairy products in November amounted to \$55,846,000. This represented an increase of 16.4 per cent or \$7,858,000 from the corresponding month last year. The weighted average value of \$4.78 per hundred pounds of milk was 45 cents higher than in November 1970. Fluid milk at \$6.77 per hundred was 31 cents higher than in November 1970. Cream for butter at 69.0 cents per pound butterfat was 3.3 cents higher than in November 1970, and farm butter at 64 cents per pound was 1 cent higher than in November 1970. Milk used in the manufacture of all dairy products averaged \$4.05 per hundred, 58 cents higher than in November 1970. Cheese milk at \$4.14 per hundred, was 55 cents higher than the corresponding month a year earlier. Of all the milk utilized for factory dairy products in November 1971, not more than 71 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

(1) Quebec and Ontario producers under the market sharing quota system effective December 1, 1970, receive the full rate of subsidy but a levy is made against the market price. For other provinces the procedure for making payments has not changed, holdbacks are made on subsidy payments. Both systems are subject to rebates.

(2) Not applicable to Quebec and Ontario beginning December 1, 1970.

(3) Applies to Quebec cream shippers only. Ontario cream shippers entered the plan on April 1, 1971.

(4) Announced November 3, 1971. Applies retroactively to April 1, 1971 and future deliveries. A refund will be made to all eligible producers.
