THE DAIRY REVIEW — LA REVUE LAITIÈRE

Whole Milk Equivalent of Dairy Factory Products,
Canada, by Months 1972 and 1973

Équivalent en lait entier des produits des fabriques laitières,
Canada, par mois en 1972 et 1973

February — Février
1973

PRELIMINARY INDICATIONS OF THE DAIRY SITUATION, FEBRUARY 1973

The preliminary estimate of milk produced in February is 1,060,000,000 pounds, which is 5.0 % below production in the corresponding month last year. This would make the total estimate of production during the first two months of the year 2,175,000,000 pounds or 3.0 % below production in the January-February period a year ago.

Almost 49 % of the milk produced in February, or 518,000,000 pounds, was used for dairy factory products. This is 13.0 % below factory utilization in February 1972. Creamery butter production during the month accounted for 256,000,000 pounds of milk, 22.8 % less than in February a year ago, while milk used in the manufacture of factory cheese declined 1.7 %. Approximately 0.8 and 2.2 % more milk was used for concentrated whole milk products and ice cream mix, respectively, than in February 1972. During the January-February period, 9.2 % less milk was utilized for dairy factory products than in the corresponding period a year ago.

(1) Includes an upward revision of 8,447,000 pounds of milk utilized for creamery butter and 1,533,000 pounds of milk for ice cream mix, for the month of January.

Fluid sales of milk and cream during February, for purposes of the advance preliminary estimate, are calculated at 455,000,000 pounds, an increase of 4.1 % from the sales in February 1972. This assumes the same relationship to year-earlier estimates as for the November-January period.

According to indications from the monthly survey of farms keeping milk cows, milk and cream consumed in farm homes was 3.8 % below that used in February 1972, while milk used for livestock feeding increased 11.4 % from that of a year ago. Reports from farm dairy correspondents participating in the survey indicate 0.8 % fewer cows kept on farms at February 15 and 1.3 % less cows being milked than at the same date last year. Milk production per cow, for cows milked on farms in the sample, was virtually the same as at February 15, 1972.

FARM MILK PRODUCTION, UTILIZATION AND CASH RECEIPTS IN JANUARY 1973

Farm milk production. - The estimated quantity of milk produced on farms in January amounted to 1,115 million pounds, a decrease of 11 million pounds or 1.0 per cent below that of January 1972. Of this amount, 573 million pounds or 51 per cent was utilized in factory production, and approximately 456 million pounds or 41 per cent was used for fluid sales.

Fluid sales. - Sales of fluid milk and cream, the latter expressed as milk, amounted to 456 million pounds in January, an increase of approximately 23 million pounds from January of last year. This included about 394 million pounds of fluid milk, comprising about 35 per cent of the farm milk supply, and fluid cream sales of 62 million pounds representing about 6 per cent.

Farm butter. - Butter made on farms in January amounted to 165,000 pounds, decreasing 14 per cent from the corresponding month in 1972.

Farm cash receipts. - Cash receipts from the sale of dairy products in January amounted to \$52,793,000. This represented an increase of 3.7 per cent or \$1,900,000 from the corresponding month last year. The weighted average value of \$5.19 per hundred pounds of milk was 26 cents higher than in January 1972. Fluid milk at \$7.09 per hundred was 33 cents higher than in January 1972. Cream for butter at 68.6 cents per pound butterfat was 0.4 cent lower than in January 1972, and farm butter at 65 cents per pound was 1 cent higher than in January 1972. Milk used in the manufacture of all dairy products average \$4.25 per hundred, 8 cents higher than in January 1972. Cheese milk increased to \$4.29 per hundred, an increase of 1 cent per hundred from the corresponding month a year earlier. Of all the milk utilized for factory dairy products in January 1973, not more than 63 per cent was eligible for Federal government subsidy.

Estimates of farm cash receipts from the sale of dairy products, as set forth in this report, include the basic plant paying price less haulage and, where applicable, quality premiums, bonuses, patronage dividends and those government subsidies which have been paid indirectly through plants as part of the plant price. They do not include government payments made direct to farmers by government cheque, nor do they reflect any allowance for costs incurred by farmers in the production of dairy products.

PRODUCTION AND PRICES OF DAIRY PRODUCTS IN JANUARY 1973

Creamery butter

Production. - Creamery butter production amounted to 13.1 million pounds in January 1973, a decrease of approximately 758 thousand pounds from production in the same month of the previous year.

Stocks. - Holdings of creamery butter in store on February 1, 1973, amounted to 31.4 million pounds, approximately 13.4 million pounds less than at February 1 last year. On January 1, 1973, stock holdings at 29.6 million pounds were 21.7 million pounds less than at the same date a year earlier.

Supply. - Stocks of creamery butter on January 1, plus production and imports during the month, amounted to 54.0 million pounds of butter at January 31, 1973. This was a decrease of approximately 13.0 million pounds compared to the corresponding supply figure at January 31, 1972.
