```
PRODUCTIONOFOEGS
    OCTOBER 1960
```

Production of eggs in Canada during October, estimated at 37.6 million dozen, was 4.6 per cent more than the 35.9 million dozen produced in October 1959. This increase occurred because a higher rate of lay more than offset a 0.5 per cent decline in the number of layers. In August and September, layers were slightly above the estimates for the corresponding months of 1959.

Sg8 production during October was 6.0 per cent higher than in September. The normal seasonal increase occurred with a slightly higher rate of lay and an increase of 3.0 per cent in the number of layers. Producers are continuing to hold more older layers than they did in 1959.

Producer sales of market egga during October are estimated at 32.7 million dozen compared with 31.4 million in October 1959. The average price of eggs to producers as reported in the monthly survey was 38.6 cents per dozen in September and 40.5 in October. The corresponding farm prices reported in September and October 1959 were 35.3 and 35.2 cents, respectively.

FROZRN EGG: Processing to frozen egg in all plants under inspection reporting to the Department of Agriculture during October 1960 was 718,228 pounds 88 compared with 1,522,582 pounds in October 1959.

1) Exclusive of Newfoundland.
