

Estimated production of eggs in Canada(l) during February at 33.3 milion dozen was 5.4 per cent less than the 35.2 million dozen produced in February 1965. The estimated number of layers at 26.0 million was 4.1 per cent less than a year earlier while the rate of lay decreased by 1.5 per cent to 1,548 eggs per 100 layers.

Sales of market eggs during February are estimated at 28.7 milifon dozen, 6.3 per cent fewer than in February 1965. The average price of eggs to producers as reported in the monthly sample survey was 37.7 cents per dozen in February and 36.6 cents per dozen in January. The corresponding farm prices reported in February and January 1965 were 28.4 and 26.3 cents, respectively.

According to preliminary estimates egg production in the first two months of 1966 was 69.9 milifon dozen, a decrease of 5.9 per cent from the 74.3 milifon dozen produced during the corresponding period of 1965.

Frozen Eggs: Processing to frozen egg in all plants under inspection reporting to the Department of Agriculture during the four week period ending February 26 was $1,355,926$ pounds as compared with $2,513,183$ pounds during the corresponding period in 1965.
(1) Exclusive of Newfoundland.
