11	Summary of Supply, Distribution and Consumption of Poultry Meat and Eggs in Canada, 1948 and 1949	26

PRODUCTION OF POULTRY AND EGGS IN CANADA, ^{1/} 1949

Canadian egg production during 1949, estimated at 343.8 million dozens, decreased 11.5 per cent from the previous year's total of 388.6 million dozens. Farm production amounted to 314.5 million dozens. These figures do not include eggs laid but not useable due to breakage, etc.

The nation's farm flocks averaged 25.8 million layers during the year, a decrease of 10 per cent from the 1948 average of 28.7 million layers. The rate of lay (eggs laid per 100 layers) also decreased in 1949, falling from 15,019 eggs in 1948 to 14,746 eggs.

Total sale of eggs for consumption amounted to 273.6 million dozens, of which 250.2 million dozens valued at \$105.4 million were sold off farms. Producers retained 59.4 million dozens for consumption.

While production decreased approximately 44 million dozens, exports decreased about 38 million dozens. The comparison of change in stocks over the year 1949 with that of 1948 shows about 1 million dozens less taken out of stock during 1949 than during 1948. Thus domestic disappearance was approximately 7 million dozens less than in 1948. With an increased population, the per capita consumption fell from 23.5 dozens in 1948 to 22.3 dozens in 1949.

Poultry meat production in Canada exceeded the 300 million pound mark in 1949, rising from the 1948 production of 268.9 million pounds to 306.7 million pounds, a 14 per cent increase. The 1947 estimate was 324 million pounds. The greatest part of this production was fowl and chicken meat, which amounted to 256.2 million pounds in 1949. Turkey meat totalled 43 million pounds; goose 4 million; and duck 3.5 million pounds. Of these amounts 236 million pounds of fowl and chicken, 41 million pounds of turkey, nearly 4 million pounds of goose, and over 3 million pounds of duck were produced on farms across Canada.

^{1/} Data are not available for Newfoundland.

Sales of farm produced domestic fowl, marketed as fowl or chicken, amounted to 37 million birds, weighing 176.3 million pounds and realizing \$55.7 million farm cash income. Sixty million pounds of fowl and chicken meat was kept on farms by the producers.

Turkey meat sold by farmers amounted to 38.5 million pounds, an increase of 23.5 per cent over 1948. Nearly half of this quantity originated in the Prairie Provinces, $4\frac{1}{2}$ million pounds being sold in Manitoba, 6 million pounds in Saskatchewan and 8 million pounds in Alberta. Ontario led all provinces in sales of farm produced turkey meat with a total of 9.6 million pounds.

Farm sales of goose meat in Canada amounted to 2.9 million pounds, valued at \$1.2 million. Duck meat sold by farmers in Canada totalled 2.1 million pounds valued at \$759,000.

Per Capita consumption of poultry meat during 1949 was 21.2 pounds as compared with 19.2 pounds in 1948.

TABLE 1: QUANTITY AND VALUE OF PRODUCTION OF POULTRY MEAT AND EGGS IN CANADA, ON FARMS AND ELSEWHERE THAN ON FARMS ^{1/} 1946-1949

Year	POULTRY MEAT		EGGS		
	Weight	Value	Net Production	Total Disposal ^{2/}	Value
	000 lb.	\$000	000 doz.	000 doz.	\$000
1946 ...	285,266	79,395	352,341	350,762	124,298
1947 ...	324,494	87,975	407,376	407,349	147,884
1948 ...	268,892	87,488	388,579	388,621	170,841
1949 ...	306,712	104,191	343,848	343,393	146,428

^{1/} A farm for census purposes must be one acre or more and have produced agricultural products to the value of \$50.00 or more.

^{2/} The difference between Net Production and Total Disposal is the difference in producers' inventories at January 1 and December 31.
