Per Capita Disappearance of Poultry Meat,
Disparition per capita de viande de volaille,
1960-73

INTRODUCTION

This report covers poultry meat and egg statistics for the years 1967 to 1973. Estimates from 1967 to 1973 have been revised to conform with Census data.

The average number of layers in Canada has increased gradually from 16.4 million in 1921 to reach a peak of 31.5 million in 1947; there were 25.8 million in 1973. Although there were only 57% more layers in 1973 than in 1921 the human population grew by 152%. However, rate of lay (per hundred layers) rose dramatically from 9,600 eggs in 1921, to 21,517 in 1973 with per capita disappearance rising from 14.1 in 1921 to 19.4 in 1973. Per capita disappearance of poultry meat amounted to 9.6 pounds in 1926 (earlier data not available), increased gradually to 23.1 pounds in 1951 and reached a record of 46.9 pounds in 1973.

The estimated value of poultry and egg production in 1973 was \$697.4 million. Farm cash income from the sale of poultry and eggs totalled \$686.4 million while the value of poultry and eggs used by producers amounted to \$10.9 million.

Poultry meat production was estimated at 1,042.9 million pounds (eviscerated weight) in 1973. This was 31.9% more than the 790.4 million pounds produced in 1966, and 6.3% higher than the 981.1 million pounds produced in 1972. The production of fowl accounted for 6.9% of total output; chicken, 69.9%; turkey, 22.1%; goose, 0.4% and duck 0.7%. The total farm value of poultry meat production in 1973 amounted to \$442.1 million, up 48.1% from 1972.

The three Maritime provinces accounted for 4.9% of the total Canadian output of poultry meat; Quebec, 31.7%; Ontario, 34.6%; the Prairies, 19.7% and British Columbia, 9.1%. Per capita disappearance of fowl and chicken amounted to 36.1 pounds; turkey, 10.2 pounds; goose, 0.19 pounds; duck, 0.37 pounds.

Egg production in 1973 at 461.7 million dozen was 1.4% less than the 468.4 million dozen produced in 1972. All egg production figures prior to 1969 exclude Newfoundland. The value of eggs increased by 46.8% reflecting a higher return per dozen. The average farm selling price of eggs increased to 55.3 cents per dozen from 37.1 cents in 1972.

The Atlantic provinces produced 8.2% of all eggs in 1973; Quebec, 12.9%; Ontario, 41.3%; the Prairies, 25.3% and British Columbia, 12.3%. Per capita disappearance of eggs decreased to 19.4 dozen from 20.5 in 1972. In 1957 per capita disappearance reached a peak of 25.0 dozen.

Newfoundland poultry meat estimates in 1973 amounted to 267 thousand pounds of fowl valued at \$42 thousand and 2,544 thousand pounds of chicken valued at \$1,320 thousand. Revised estimates for fowl in 1972 are 263 thousand pounds valued at \$42 thousand.

Le présent bulletin porte sur la statistique de la viande et des oeufs de volaille pour les années 1967 à 1973. Les estimations de 1967 à 1973 ont été rectifiées suivant les données du recensement.

Le nombre moyen de pondeuses a augmenté progressivement depuis 1921 (16.4 millions) pour atteindre un sommet en 1947 (de 31.5 millions); en 1973 il y avait 25.8 millions de pondeuses. En 1973 également, il y avait seulement 57 % de pondeuses de plus qu'en 1921, même si la population humaine avait augmenté de 152 %. Toutefois, le taux de ponte (par 100 pondeuses) s'était élevé de façon spectaculaire: de 9,600 oeufs qu'il était en 1921, il avait monté à 21,517 en 1973; la disparition par tête passant sur la même période, de 14.1 en 1921 à 19.4 en 1973. En 1926 (les données antérieures ne sont pas disponibles), la disparition de viande de volaille était de 9.6 livres par tête; elle a augmenté graduellement pour atteindre 23.1 livres en 1951 et un chiffre sans précédent de 46.9 livres en 1973.

La production avicole de 1973 est évaluée à 697.4 millions de dollars. Les recettes en espèces des fermes au titre de la vente de volaille et d'oeufs ont atteint 686.4 millions de dollars, tandis que la volaille et les oeufs consommés par les producteurs avaient une valeur de 10.9 millions de dollars.

La production de viande de volaille est évaluée 1,042.9 millions de livres (poids éviscétré) en 1973. Ce chiffre est de 31.9 % plus élevé que les 790.4 millions de livres produites en 1966 et de 6.3 % plus élevé que 981.1 millions de livres produites en 1972. Les poules représentaient 6.9 % de la production globale; les poulets, 69.9 %; les dindons, 22.1 %; les oies, 0.4 % et les canards, 0.7 %. La valeur agricole globale de la viande de volaille produite en 1973 a atteint 442.1 millions de dollars, soit 48.1 % de plus qu'en 1972.

Les trois provinces maritimes ont fourni 4.9 % de la production globale de viande de volaille au Canada; le Québec, 31.7 %; l'Ontario, 34.6 %; les Prairies, 19.7 %; et la Colombie-Britannique, 9.1 %. La disparition par habitant se répartissait ainsi: poules et poulets, 36.1 livres; dindons, 10.2 livres; oies, 0.19 livres; canards, 0.37 livre.

La production d'oeufs (461.7 millions de douzaines) en 1973 est de 1.4 % inférieures aux 468.4 millions de douzaines produites en 1972. Tous les chiffres de la production d'oeufs avant 1969 ne comprennent pas Terre-Neuve. La valeur des oeufs a augmenté de 46.8 % par suite d'un prix supérieur. La moyenne du prix de vente des oeufs à la ferme a augmenté passant de 37.1 cents la douzaine en 1972 pour atteindre 55.3 cents la douzaine en 1973.

Les provinces de l'Atlantique ont produit 8.2 % de l'ensemble des oeufs en 1973; le Québec, 12.9 %; l'Ontario, 41.3 %; les Prairies, 25.3 % et la Colombie-Britannique, 12.3 %. La disparition d'oeufs per capita a diminué de 20.5 douzaines à 19.4 de 1972 à 1973. Elle avait culminé à 25.0 douzaines par personne en 1957.

Les estimations de viande de volaille pour Terre-Neuve s'établissent à 267 milliers de livres de poule évaluées à 42 milliers de dollars et 2,544 milliers de livres de poulet à 1,320 milliers de dollars. Les estimations rectifiées pour les poules ont atteint 263 milliers de livres en 1972 à 42 milliers de dollars.

| Average - Moyenne | 6.96 | 7.61 | 8.91 | 7.73 | 6.64 | 7.22 | 7.39 | |

Note: The egg-feed ratio is the number of pounds of 17-20 % laying feed that are equal in value to the farm price of one dozen eggs. Feed prices are weighted by the number of layers in each of five regions of Canada. Egg prices are based on the returns to farmers for all grades of market eggs. — Note: Le rapport des œufs aux aliments est le nombre de livres de moulée de ponte à teneur de 17 à 20 % dont la valeur équivaut au prix d'une douzaine d'œufs à la ferme. Le prix des aliments est pondéré suivant le nombre de pondeuses dans cinq régions du Canada. Le prix des œufs est fondé sur les recettes des agriculteurs pour toutes les catégories d'œufs vendus.
