LIVE STOCK AND ANIMAL PRODUCTS, 1929

PREFACE

The present report on the live stock and allied industries in Canada for 1929 is the eleventh of its series; the publication has appeared annually since 1920, the data for the years 1909-1919 being grouped in the first issue. The Live Stock Branch and the Health of Animals Branch of the Department of Agriculture, Canada, have co-operated in the preparation of the report.

The data are grouped into six main sections dealing in order with live stock, animal products, the international situation, foreign trade, prices, and freight rates. In this issue, the section on the international situation has been expanded. The Annual Census of Industry conducted by the Bureau is the source of the statistics of manufactures based on animal products. The information on railway freight rates was made available by the Board of Railway Commissioners for Canada.

Since the body of the report is almost entirely of a statistical nature, the introduction must be relied upon for explanation, comparison, and summary.

The report as a whole has been prepared in the Agricultural Branch of the Dominion Bureau of Statistics by Miss M. E. Bouck, under the direction of Dr. T. W. Grindley, Chief of the Branch

R. H. COATS,

Dominion Statistician.

INTRODUCTION AND SUMMARY

Live Stock.—The estimated number of farm animals in June, 1929, as compared with June, 1928, showed increases in cattle and sheep and a decrease in swine. The number of milch cows was 3,778,277 in 1929 and 3,792,522 in 1928; of other cattle 5,152,711 and 5,000,750 respectively; sheep 3,728,309 and 3,415,788; and swine 4,381,725 and 4,497,367. The total for all classes of poultry on farms increased from 53,779,539 in 1928 to 60,899,782 in 1929.

Ontario showed largest holdings in all groups, the totals being as follows: milch cows 1,237,248; other cattle 1,434,346; sheep 1,130,395; swine 1,681,263; and poultry 22,045,091. The number of other cattle, sheep and poultry was greater in 1929 than in 1928 but there was a decrease in milch cows and swine. Quebec ranked second in holdings of all classes, numbers reported being as follows: milch cows, 1,138,206; other cattle 953,627; sheep 957,386; swine 803,644; and poultry 9,391,819. Alberta returns showed 345,566 milch cows, 944,434 other cattle, 520,000 sheep, 770,233 swine and 7,597,879 poultry. Saskatchewan totals were as follows: milch cows 420,004; other cattle 746,909; sheep 207,551; swine 599,909; and poultry 9,302,452.

The average value per head of farm live stock and poultry in Canada showed increases for milch cows (\$74 as against \$72 in 1928), other cattle (\$47 as against \$46), swine (\$16 as against \$15), and a decrease in poultry (\$1.05 as against \$1.08). No change was reported for sheep (\$10).

The total value of farm live stock is calculated by the application of the average values per head to the numbers on farms as estimated on the basis of returns made in June of each year. Values for 1929 with comparative figures for 1928 placed within brackets, were as follows: milch cows \$279,898,000 (\$272,109,000); other cattle \$240,158,000 (\$231,700,000); sheep \$37,029,000 (\$35,530,000); and swine \$71,111,000 (\$66,595,000). The total value of holdings of these groups amounted to \$628,196,000 as compared with \$605,934,000 in 1928. The total value of all poultry in Canada in 1929 was \$63,854,000 as compared with \$58,212,000, making a grand total of \$692,050,000 for 1929 against \$664,146,000 in 1928 for the classes included above.

Tables I, II and III give the numbers of farm live stock and poultry in Canada, by provinces, for the years 1925 to 1929, with the average value per head and total farm value. Table IV compares the number of live stock on farms with the production of field crops and shows the progress of these two main branches of the agricultural industry.

Two elements were lacking for the establishment of a cattle market in 1929 that would command the prices ruling in 1928. Firstly, the cattle lacked quality, this being attributable to the severe drought conditions in Canada. Secondly, there was a reduced export demand because the same dry weather ruled in those United States regions which usually import Canadian stockers and feeders. Prices for cattle in 1929 were on the whole lower than during 1928. Only a moderate number of cattle was grain-finished during the winter in both Canada and the United States and since producers have generally oversold during the year, there is every reason to expect a strong demand for good finished cattle during the spring and summer of 1930. There was a shortage in hog supplies from 1928 and prices were accordingly much better, live hogs selling from 1½c. to 2½c. per lb. above 1928 prices. The trade situation was not encouraging, however. Our export trade with both Great Britain and the United States showed further declines and coupled with this was the attempt to make up the deficit in domestic supplies by importing from the United States. The sheep and lamb trade was fairly satisfactory. Supplies were much heavier than in 1928 and the quality was good. Large importations of foreign mutton lowered prices during the last part of the year.

The totals marketed through live stock yards in 1929 with comparative figures for 1928 placed within brackets, were as follows: cattle 799,435 (875,428); calves 378,860 (361,222); swine 1,060,542 (1,090,316); and sheep and lambs 541,470 (469,172). Full details as to sales at live stock yards with particulars of disposition are shown in tables V and VI. The numbers and percentages of total sales marketed through each stock yard are shown in the following analysis:—

Table VII shows the counties and districts from which the animals were shipped in the first instance. In addition to consignments to live stock yards, shipments direct to packers and for export are also shown. In Ontario and Alberta the number of hogs shipped direct to packers exceeded the number shipped through live stock yards, so the importance of these shipments is apparent. The total number of live stock marketed from each county or district is made as complete as possible by the inclusion of these data. Ontario was the largest shipper of all classes of live stock the totals for 1929 being as follows: cattle 398,615; calves 206,087; hogs 1,306,531 and sheep 277,588. Quebec shipments were: cattle 54,210, calves 120,802, hogs 71,323 and sheep 166,296; Manitoba: cattle 103,935, calves 28,613, hogs 221,171, and sheep 38,850; Saskatchewan: cattle 164,988, calves 29,240, hogs 337,649 and sheep 43,064; Alberta: cattle 194,099, calves 62,100, hogs 681,544 and sheep 79,979.

Perth county in Ontario was the largest shipper of hogs, handling 91,494 in 1929, with Wellington county following with 87,485. Leading counties or districts in other provinces were Shefford, P.Q. (6,064); Winnipeg, Man. (31,019); Vonda, Sask. (13,064); Edmonton, Alta. (144,729). Leading shippers of cattle were Pontiac, P.Q. (5,270); York, Ont., (40,561); St. George, Man. (6,974); Swift Current, Sask. (6,478); Medicine Hat, Alta. (10,749). Leading counties or districts for calves were Lake St. John, P.Q. (6,915); York, Ont. (37,999); Gilbert Plains, Man. (2,958); Pelly, Sask. (2,305); Alexandra, Alta. (11,516). Sheep shipments showed the following as leading counties or districts: Beauree, P.Q. (13,271); York, Ont. (51,091); St. George, Man. (3,740); Maple Creek, Sask. (9,173); Taber, Alta. (12,684).

The interprovincial and export movement of live stock in 1929 showed a falling-off in cattle and sheep, but an increase in calves and hogs. Total shipments in 1929 with comparative figures for 1928 were as follows: cattle 443,807 (541,483); calves 184,987 (169,234); swine 676,405 (567,364); and sheep 128,839 (144,640). Ontario was the largest shipper in the aggregate, reporting 86,278 cattle, 128,169 calves, 174,643 swine, and 17,236 sheep. Saskatchewan was the largest shipper of cattle with 143,168 head and the second largest shipper of swine with 182,171 head; Alberta led in swine and sheep shipments with 231,461, and 27,282 head respectively. The interprovincial and export movement of live stock is shown in table VIII by provinces of origin and in table IX by provinces of destination.

Slaughterings in inspected establishments in 1929 showed an increased number of cattle and sheep, but a decreased number of calves and swine. The totals for 1929 and 1928 were as follows: cattle 701,866 (699,384); calves 414,781 (415,990); sheep 724,944 (638,752); and swine 2,353,161 (2,547,024).

Animal Products.—The total value of all products of packing houses and abattoirs was \$174,096,419 in 1928, against \$167,220,892 in the previous year. The quantities and values of the principal items making up this total are given by provinces in table XI, together with data as to slaughterings and materials used in the industry.

Production of creamery butter in 1928 continued to decrease, 168,027,039 pounds being produced as compared with 176,978,947 pounds in the previous year. Although prices were higher, the aggregate value of butter in 1928 was still slightly lower than in 1927, the figures being \$64,702,538 and \$65,709,986 respectively.

Factory cheese produced in 1928 was greater in amount than in 1927, the quantities being 144,584,619 pounds and 138,056,908 pounds respectively. The value in 1928 was \$30,494,463 as compared with \$25,522,148 in the previous year.

Data covering the interprovincial and export shipments of meats are shown in tables XIV to XVII inclusive. This material is based upon compilations made from the bills of lading of all such shipments in Canada. These bills of lading are required to be filed with the Veterinary Director General for all meats shipped out of inspected establishments; and, since all concerns making interprovincial or export shipments must have their establishments inspected, theoretically these data must be complete. Strict comparability with statistics gathered by other methods is not to be expected, but it may be pointed out that the only comparable data gathered on a different basis which are available, viz., the customs returns, show only a small percentage of difference. The classification is not quite on the same basis, but the following summary is of interest:—

Total interprovincial and export shipments from all provinces amounted to 204,731,561 pounds. Monthly summaries showed a fairly even spread over the year, ranging mostly between 15 and 17½ million pounds per month. February shipments were low and August, October and November shipments high. Details by provinces of origin are shown in table XIV while table XVII summarizes these for the calendar year with details as to the origin of the shipments into each province.

Inspections of eggs for interprovincial and export shipment are covered in table XVIII. Shipments from Eastern Canada amounted to 121,974 cases, of which 21,858 cases were for export, and in Western Canada to 382,313 cases with 17,118 cases for export, a total of 504,287 cases shipped with 38,976 cases for export.

The consumption of meats in Canada in 1929 was estimated at 1,546 million pounds, an increase of 38 million pounds over the revised estimate for the previous year. Beef and mutton figures showed an increase, but pork figures a decrease. The per capita consumption of meats was estimated at 157·81 pounds for 1929, against 156·14 pounds for 1928. The per capita consumption of beef was 69·09 (67·21) pounds; pork 81·52 (82·48) pounds; mutton and lamb 7·20 (6·45) pounds; the figures within brackets being those of 1928. The corresponding figures for other important animal products in 1929 were as follows: poultry 110 million pounds or 11·28 pounds per capita; butter 299 million pounds or 30·56 pounds per capita; cheese 35 million pounds or 3·54 pounds per capita; eggs 302 million dozen or 30·87 dozen per capita. Complete details are given in tables XIX, XX and XXI, with comparative figures for previous years.

International Situation.—Canada ranked tenth amongst the principal cattle-holding countries according to official returns for the latest year for which sufficient comparable data are available. British India was the largest holder with 148,268,556 head, and the Union of Socialist Soviet Republics in Europe and Asia second with 66,791,800 head. United States had 55,751,000; Argentina 37,064,850; Brazil 34,271,324; Germany 18,414,136; France 15,005,080; Australia 11,616,855; the Union of South Africa 10,477,777; and Canada 8,793,272 head.

So far as hogs and sheep were concerned, the increase or decrease was common to each individual market as well as to the general average for all markets. Cattle prices were higher at Montreal and Saskatoon, but lower at all other markets. Prices for calves were lower at Calgary, Edmonton, Moose Jaw and Saskatoon, higher at Toronto, Montreal and Winnipeg and showed no change at Prince Albert. Weighted average prices per hundredweight at the various markets, together with the weighted average for all markets combined, and comparative figures for previous years, are shown in the following table:

[†]The classification of "Meats, Canned and Preserved" in British and Canadian records is not identical. British Imports include "Meats not elsewhere specified 1. Tinned or Canned 2. Salted." Canadian import figures include: 1. Canned Meats and Canned Poultry and Game. 2. Dried or Smoked Meats and Meats preserved in any other way than salted or pickled, n.o.p. 3. Other Meats, salted, n.o.p. Canadian exports are given under the single heading, "Canned Meats, n.o.p."

La classification des viandes en boîte et viandes de conserve n'est pas la même dans le Royaume-Uni et au Canada. Dans les importations du Royaume-Uni on trouve: Viandes non énumérées ailleurs, 1 En boîte, 2 Salées. Les importations canadiennes comportent les divisions suivantes: Viandes, volaille et gibier, en boîte. 2. Viandes séchées ou fumées et viandes conservées autres que celles saumurées ou marinées, n.a.e. 3. Autres viandes salées, n.a.e. Quant aux exportations, elles sont groupées sous un seul article: "Viandes en conserve, n.a.e."

NOTE 1.—The method of inspection of imported shipments was altered in November 1928, and under the present plan all imports are graded into their actual grades, whereas previously they were classed under two headings only, viz., "Better than Seconds" and "Seconds".—La méthode d'inspection des œufs importés a été changée en novembre 1928, et d'après le nouveau plan toutes importations sont classées dans leurs véritables catégories, tandis qu'auparavant elles étaient classées dans deux catégories: "Meilleurs que seconds" et "seconds".

NOTE 2.—There were no imports into the Maritime Provinces: Miscellaneous East includes all Ontario and Quebec with the exception of ports of entry specified in table. Il n'y a eu aucune importation dans les Provinces Maritimes; "Divers points de l'est" comprend tout l'Ontario et le Québec à l'exception des ports d'entrée spécifiés dans le tableau.

FREIGHT RATES ON LIVE STOCK BY RAIL AND OCEAN

In 'Live Stock and Animal Products Statistics, 1927,' at pages 100-102, were published six tables on rail freight rates together with a short review of ocean freight rates on live cattle. The Preface of the 1928 report explained to readers that these statistics were not repeated because no changes had been recorded. To conserve space, the same practice is continued in this report, although some slight variations in the rates must be mentioned. Referring first to Table XXXVII on page 101 of the 1927 Report—"Freight Rates on Cattle, Sheep and Hogs in carloads from various stations in Quebec to Montreal for local delivery," changes became effective on March 10, 1930, as follows: Ormstown, from 13 to 11½ cents, St. Felicien, from 25½ to 27½, Warwick from 19 to 17½, Waterloo, from 15½ to 14½. In Table XXXIX on page 102—"Freight Rates on Live Cattle, Sheep and Hogs in carloads, from Toronto to Eastern Seaboard Ports for export," the rate to Quebec was changed from 31 to 29 cents to be effective on March 10, 1930. To Table XL on "Ocean Freight Rates on Live Cattle" should be added the statement that the nominal rate on live cattle remains at \$15 per head, although the last shipment went on June 14, 1928. No business is offering.

FREIGHT RATES ON BUTTER AND CHEESE, 1929

The tariff rate per cwt. on butter in ordinary storage was \$1.00 and in refrigeration, \$1.40. Shipment of cheese in ordinary stowage was at a tariff of \$0.75 per cwt.

Butter has no contract rates, while contract rates for cheese were \$0.55 and \$0.80 per cwt. respectively for ordinary storage and for shipment in cool air (35°-40°). After July 1 shipment in cool air (not in 35°-40°) was made at a rate of \$0.70 per cwt., the other rates remaining the same.

TAUX DE TRANSPORT DES BESTIAUX PAR TERRE OU PAR EAU

Dans le rapport "Statistique du Bétail et des Produits Animaux, 1927" paraissent six tableaux des taux de transport du bétail sur pied par eau ou chemin de fer. Le préface du rapport de 1928 explique que ces statistiques ne sont pas repétées parce que ces taux n'avaient pas subi de changement. Pour des raisons d'espace, ces tableaux ne sont pas répétés dans la présente édition, mais nous en signalons les principaux changements. Dans le tableau XXXVII, page 101: "Tarif de fret sur bœufs, moutons et porcs, en lots d'un wagon, depuis certaines gares de la province de Québec jusqu'à Montréal, pour consommation locale", les changements suivants sont effectifs depuis le 10 mars 1930: Ormstown, de 13 à 11½ cents; St-Félicien, de 25½ à 27½; Warwick, de 19 à 17½; Waterloo, de 15½ à 14½. Dans le tableau XXXIX, page 102: "Tarif de fret sur bêtes à cornes, moutons et porcs sur pied, par lots d'un wagon, depuis Toronto jusqu'aux ports océaniques de l'est, pour exportation", le taux jusqu'à Québec est changé depuis le 10 mars 1930, de 31 cents à 29 cents. Dans le tableau XL, "Tarif du fret océanique sur les bêtes à cornes", il faut ajouter que le taux nominal de \$15 par tête reste le même bien qu'il n'y ait pas eu d'expédition depuis le 14 juin 1928.

TAUX DE FRET SUR LE BEURRE ET LE FROMAGE, 1929

Le tarif de fret sur le beurre en entrepôt ordinaire était de \$1.00, et en réfrigération, \$1.40 par 100 livres. Le tarif du fromage en entrepôt ordinaire était de \$0.75 par 100 livres.

Il n'y a pas de taux de contrat pour le beurre, tandis que pour le fromage ils étaient respectivement de \$0.55 et \$0.80 pour entrepôt ordinaire et en air refroidi à 35°-40°. Après le 1er juillet, l'expédition en air refroidi (pas à 35°-40°) le tarif a été porté à \$0.70 par 100 livres; et est resté le même pour entrepôt ordinaire.

PREFACE

Le présent rapport sur le bétail et les industries connexes en 1929 est le onzième de sa série. Cette publication a paru annuellement depuis 1920, les données pour les années 1909-1919 ayant été groupées dans la première édition. La division de l'Industrie Animale du ministère de l'Agriculture a collaboré à la préparation de ce rapport.

Les données sont groupées en six sections principales traitant dans l'ordre suivant du bétail, des produits animaux, du marché international, du commerce avec l'étranger, des prix, et des taux de fret. Dans la présente édition, la section sur le marché international a été augmentée. Les statistiques des manufactures basées sur les produits animaux ont été colligées par le recensement industriel annuel du Bureau. Les informations sur les taux de chemin de fer ont été fournies par la Commission des Chemins de fer du Canada.

Vu que la substance de ce rapport est presque entièrement de nature statistique, c'est dans l'introduction que l'on trouvera les explications, les comparaisons et le résumé.

Le rapport, dans son ensemble, a été préparé par la Section Agricole du Bureau Fédéral de la Statistique par Mlle M. E. Bouck, sous le direction du Dr T. W. Grindley, chef de cette section.

Statisticien du Dominion.

INTRODUCTION ET RESUME

Bestiaux.—Le nombre estimatif d'animaux sur les fermes en juin 1929 donne des augmentations comparativement à juin 1928 pour les bovins et les ovins et une diminution pour les porcins. Le nombre de vaches laitières est de 3,778,277 en 1929 contre 3,792,522 en 1928; les autres bovins sont respectivement au nombre de 5,152,711 et 5,000,750; les moutons, 3,728,309 et 3,415,788; les porcins, 4,381,725 et 4,497,367. Le total des volailles de toutes espèces sur les fermes a augmenté de 53,779,539 en 1928 à 60,899,782 en 1929.

L'Ontario tient la tête dans les différents groupes avec les totaux suivants: Vaches laitières, 1,237,248; autres bovins, 1,434,346; moutons, 1,130,395; porcs, 1,681,263; et volailles, 22,045,-091. Le nombre d'autres bovins, de moutons et de volailles est plus grand en 1929 qu'en 1928, mais on trouve des diminutions chez les vaches laitières et les porcins. Le Québec est au deuxième rang dans toutes les catégories, qui se dénombrent comme suit: vaches laitières, 1,138,206; autres bovins, 953,627; moutons, 957,386; porcs, 803,644; volailles, 9,391,819. Les rapports de l'Alberta dénombrent 345,566 vaches laitières, 944,434 autres bovins, 520,000 moutons, 770,233 porcs et 7,597,879 volailles. Les totaux de la Saskatchewan sont: vaches laitières, 420,004; autres bovins, 746,909; moutons, 207,551; porcs, 599,909; volailles, 9,302,452.

La moyenne de valeur, par tête, du bétail et des volailles sur les fermes du Canada fait voir des augmentations pour les vaches laitières (\$74 contre \$72 en 1928), les autres bovins (\$47 contre \$46), les porcs (\$16 contre \$15), et une diminution pour les volailles \$1.05 contre \$1.08). On ne rapporte aucun changement pour les moutons (\$10).

La valeur totale du bétail des fermes est calculée par l'application de la valeur moyenne par tête à leur nombre total estimé d'après les rapports recueillis en juin, chaque année. Les valeurs pour 1929, suivies des chiffres de 1928 placés entre parenthèses, sont comme suit: vaches laitières, \$279,898,000 (\$272,109,000); autres bovins, \$240,158,000 (\$231,700,000); moutons, \$37,029,000 (\$35,530,000); porcs, \$71,111,000 (\$66,595,000). La valeur totale de ces groupes s'élève à \$628,196,000, comparativement à \$605,934,000 en 1928. La valeur totale de toutes les volailles pour le Canada en 1929 est \$63,854,000, comparativement à \$58,212,000 et ajoutée au chiffre précédent forme un grand total de \$692,050,000 pour 1929 contre \$664,146,000, grand total pour 1928.

Les tableaux I, II et III donnent les chiffres tant pour le bétail que pour les volailles du Canada, par provinces, pour les années 1925 à 1929, avec moyennes de valeur par tête et la valeur totale des fermes. Le tableau IV établit une comparaison entre le nombre d'animaux sur les fermes et la production en cultures sur les fermes et les progrès réalisés par ces deux branches de l'industrie agricole.

Deux éléments manquaient en 1929 à l'établissement d'un marché aux bestiaux commandant les prix en vigueur en 1928. Premièrement, le bétail était de qualité inférieure en raison de la grande sécheresse au Canada. Deuxièmement, la demande d'exportation a diminué parce que la même température sèche a prévalu dans les régions des Etats-Unis qui importent ordinairement les bestiaux canadiens. Les prix du bétail étaient en général plus bas en 1929 qu'en 1928. Seulement un nombre modéré de bestiaux ont été engrangés au grain pendant l'hiver au Canada et aux Etats-Unis et comme la vente par les producteurs a été excessive, on a toutes les raisons d'espérer une forte demande au cours du printemps et de l'été de 1930 pour le bétail engrangé. Une diminution dans le nombre de porcs comparativement à 1928 a amélioré sensiblement les prix, les porcs sur pied se vendant de 1½c. à 2½c. par livre au-dessus des cours de 1928. La situation du marché n'était cependant pas encourageante. Notre commerce d'exportation avec la Grande-Bretagne et les Etats-Unis a décliné davantage, et ajoutés à ceci sont les efforts tendant à combler le déficit dans l'approvisionnement domestique en important des Etats-Unis. Le commerce de moutons et d'agneaux a été passablement satisfaisant. Leur nombre était beaucoup plus élevé qu'en 1928 et leur qualité bonne. De fortes importations de mouton de l'étranger ont abaissé les prix au cours des derniers mois de l'année. Les totaux des ventes dans les parcs à bestiaux en 1929, avec chiffres comparatifs de 1928 entre parenthèses, sont comme suit: bêtes à cornes 799,435 (875,428); veaux 378,860 (361,222); porcs 1,060,542 (1,090,316); moutons et agneaux 541,470 (469,172). Tous les détails relatifs aux ventes dans les parcs à bestiaux et la disposition de ces animaux sont donnés par les tableaux V et VI. Le nombre de ventes et les pourcentages concernant chaque parc à bestiaux se trouvent dans le tableau analytique ci-dessous:

Le tableau VII donne les comtés et districts d'où les animaux ont été expédiés en premier lieu. Outre les consignations aux parcs à bestiaux, on y voit aussi le nombre de bêtes expédiées directement soit aux salaisons, soit aux exportateurs. Dans l'Ontario et l'Alberta, le nombre de porcs expédiés directement est plus considérable que celui des bêtes écoulées par les parcs à bestiaux, ce qui fait ressortir l'importance de ces expéditions. En additionnant ces deux données, on a le nombre total d'animaux expédiés par chaque comté ou district. L'Ontario est le plus fort expéditeur dans tous les groupes, ses totaux pour 1929 étant comme suit: bêtes à cornes 398,615; veaux 206,087; porcs 1,306,531; moutons 277,588. Québec donne les totaux suivants: bovins 54,210; veaux 120,802; porcs 71,323; moutons 166,296. Manitoba: bêtes à cornes 103,935; veaux 28,613; porcs 221,171; moutons 38,850. Saskatchewan: bêtes à cornes 164,988; veaux 29,240; porcs 337,649; moutons 43,064. Alberta: bêtes à cornes 194,099; veaux 62,100; porcs 681,544; moutons 79,979.

Le comté de Perth, dans l'Ontario, est le plus fort expéditeur de porcs avec 91,494 en 1929, le comté de Wellington suivant avec 87,485. Les comtés des autres provinces offrant les plus fortes contributions sont: Shefford, Qué. (6,064); Winnipeg, Man. (31,019); Vonda, Sask. (13,064); Edmonton, Alberta (144,729). Les plus fortes expéditions de bêtes à cornes proviennent des comtés ci-après: Pontiac, Qué. (5,270); York, Ont. (40,561); St-George, Man. (6,974); Swift Current, Sask. (6,478); Medicine Hat, Alberta (10,749). Les comtés ou districts les plus actifs pour les expéditions de veaux sont: Lac St-Jean, Qué. (6,915); York, Ont. (37,999); Gilbert Plains, Man. (2,958); Pelly, Sask. (2,305); Alexandra, Alberta (11,516). Les comtés ci-après prennent la tête pour les expéditions de moutons: Beauce, Qué. (13,271); York, Ont. (51,091); St-George, Man. (3,740); Maple Creek, Sask. (9,173); Taber, Alberta (12,684).

Les expéditions interprovinciales et les exportations de bétail ont décliné en 1929 dans les bêtes à cornes et les moutons, mais ont augmenté dans les veaux et les porcs. Les totaux de 1929 et chiffres comparatifs de 1928 suivent: bêtes à cornes 443,807 (541,483); veaux 184,987 (169,234) porcs 676,405 (567,364); moutons 128,839 (144,640). Le plus fort expéditeur dans l'ensemble a été l'Ontario, avec 86,278 bêtes à cornes, 128,169 veaux, 174,643 porcs et 17,236 moutons. Les plus fortes expéditions de bêtes à cornes sont au crédit de la Saskatchewan avec 143,168 têtes; elle occupe aussi le deuxième rang comme expéditeur de porcs, avec 182,171 têtes. L'Alberta tient la première place pour ses expéditions de porcs et de moutons, soit 231,461 et 27,282 respectivement. Le détail de ces expéditions est donné dans le tableau VIII par provinces de provenance et la destination des expéditions par provinces est au tableau IX.

L'abatage dans les établissements inspectés a porté en 1929 sur un plus grand nombre de bêtes à cornes et de moutons, mais le nombre de veaux et de porcs a diminué. Les totaux pour 1929 et 1928 sont comme suit: bêtes à cornes 701,866 (699,384); veaux 414,781 (415,990); moutons 724,944 (638,752); porcs 2,353,161 (2,547,024).

Produits animaux.—La valeur totale de tous les produits des abattoirs et salaisons est \$174,096,419 en 1928, contre \$167,220,892 l'année précédente. Le volume et la valeur des principaux produits sont donnés par provinces au tableau XI avec détails sur les abatages et les matières premières de cette industrie.

La production des beurries en 1928 a continué à décliner, étant de 168,027,039 livres contre 176,978,947 l'année précédente. Bien que les prix aient été plus élevés, la valeur totale de beurre en 1928 est légèrement inférieure à celle de 1927, les chiffres étant \$64,702,538 et \$65,709,986 respectivement.

La production des fromageries en 1928 était en augmentation sur 1927, les quantités respectives étant 144,584,619 livres et 138,056,908 livres, et les valeurs \$30,494,463 en 1928 comparativement à \$25,522,148 l'année précédente.

Les tableaux XIV à XVII inclusivement donnent les expéditions interprovinciales et les exportations, ces données étant compilées des connaissances émanées au Canada, lesquels doivent être déposés chez le directeur général vétérinaire et couvrent toutes viandes inspectées et expédiées par les établissements en cause, et, comme tout établissement faisant des expéditions interprovinciales ou d'exportations doit être inspecté, ces données, théoriquement parlant, sont nécessairement complètes. Une comparabilité rigoureusement exacte ne peut être assurée, mais on peut dire ici que la comparaison de ces résultats avec d'autres obtenus par d'autres moyens, soit, les rapports de la douane, etc., ne dénote qu'un pourcentage très minime de discordance. La classification ne s'obtient pas sur la même base, cependant le résumé ci-après offre un certain intérêt:

Les expéditions de février sont basses et celles d'août, d'octobre et de novembre sont élevées. Le tableau XIV donne leur provenance par provinces, tandis que le tableau XVII donne pour l'année civile les destinations, par provinces.

L'inspection des œufs est détaillée dans le tableau XVIII, pour exportations interprovinciales ou autres. Les expéditions dans l'Est du Canada se chiffrent à 121,974 caisses, dont 21,858 caisses pour l'exportation et dans l'Ouest Canadien à 382,313 caisses, dont 17,118 caisses pour l'exportation, soit un total de 504,287 caisses dont 38,976 pour l'exportation.

On estime à 1,546 millions de livres la consommation de viandes au Canada en 1929, dénotant une augmentation de 38 millions de livres sur l'estimation définitive de l'année précédente. La consommation de bœuf et de mouton a augmenté, mais celle de porc est en diminution. La consommation per capita est estimée à 157·81 livres pour 1929 contre 156·14 en 1928, répartie comme suit: bœuf 69·09 (67·21); porc 81·52 (82·48); mouton et agneau 7·20 (6·45) livres, les chiffres entre parenthèses étant ceux de 1928. Les mêmes données pour autres produits animaux importants en 1929 suivent: volailles, 110 millions de livres ou 11·28 livres per capita; beurre, 299 millions de livres ou 30·56 livres per capita; fromage, 35 millions de livres ou 3·54 livres per capita; œufs, 302 millions de douzaines ou 30·87 douzaines per capita. On trouvera ces détails au complet dans les tableaux XIX, XX et XXI avec chiffres comparatifs pour les années précédentes.

Situation internationale.—Le Canada occupe le dixième rang des principaux pays éleveurs de bêtes à cornes selon des informations officielles, pour la dernière année dont on connaît assez de détails pour permettre la comparaison. L'Inde Anglaise vient en tête avec 148,268,556 têtes et l'Union Soviétique d'Europe et d'Asie est seconde avec 66,791,800 têtes. Les Etats-Unis suivent avec 55,751,000; l'Argentine, 37,064,850; le Brésil, 34,271,324; l'Allemagne, 18,414,136; la France, 15,005,080; l'Australie, 11,616,855; l'Union Sud-Africaine, 10,477,777 et le Canada, 8,793,272 têtes.

Les plus nombreux troupeaux de moutons sont ceux de l'Union Soviétique d'Europe et d'Asie, soit 123,809,600 têtes. Les autres principaux pays éleveurs de moutons sont: l'Australie, 100,613,817 têtes; les Etats-Unis d'Amérique, 47,171,000; l'Union Sud-Africaine, 42,500,276; l'Argentine, 36,208,981; l'Inde Anglaise, 35,590,898; la Nouvelle-Zélande, 27,133,810; la Grande-Bretagne et l'Irlande du Nord, 24,592,398; l'Uruguay, 22,500,000. Le Canada possédait 3,415,788 moutons et agneaux sur les ferme en 1928.

Voici ce qui concerne les porcs: Etats-Unis d'Amérique, 54,956,000; Union Soviétique-Socialiste, 25,233,500; Allemagne, 20,105,908; Brésil, 16,168,549; les Philippines, 10,567,900; Pologne, 6,333,456; France, 6,016,940; Espagne, 5,267,328; et Canada, 4,497,367.

Les détails qui précèdent sont relevés dans le tableau XXII et le tableau XXIII porte sur le commerce international du bétail et des principaux produits animaux entre les pays producteurs les plus importants.

Commerce du Canada avec l'étranger.—Les exportations de bêtes à cornes et de veaux durant l'année civile 1929 se chiffrent à 253,505, comparativement à 245,428 en 1928. La valeur moyenne par tête a diminué, donnant un total de \$13,959,982 en 1929 contre \$14,893,410 en 1928, pour les exportations. L'exportation des moutons a diminué davantage à 11,143 têtes

valant \$184,247, comparativement à 11,506 têtes valant \$198,803 en 1928. Les exportations de porc ont continué à décliner, soit 3,942 têtes valant \$70,907 en 1929, contre 23,263 têtes valant \$343,364 en 1928 et 197,106 têtes valant 14,021,033 en 1927.

Les exportations de bœuf de 1929 sont inférieures à celles de 1928, étant 31,230,800 livres valant \$5,030,748, contre 47,136,700 livres et \$7,372,292 en 1928. Les exportations de porc continuent à décliner, les totaux étant 40,461,500 livres d'une valeur de \$8,913,008, contre 53,-357,400 livres et \$10,930,592 en 1928, 87,426,800 livres et \$17,821,593 en 1927, 115,821,000 livres et \$27,384,425 en 1926 et 156,717,300 livres et \$33,416,091 en 1925. Les exportations de mouton et d'agneau sont de 573,300 livres valant \$132,302 en 1929, comparativement à 1,127,800 livres valant \$250,025 en 1928. La valeur totale de toutes viandes exportées, soit \$15,773,743, continue à être sur le déclin.

Les exportations de beurre sont les plus basses des cinq années 1925 à 1929 inclusivement. Le total de 1929 est de 1,400,400 livres valant \$583,065, comparativement à 1,994,800 livres et \$805,055 en 1928, 2,696,000 livres et \$1,068,610 en 1927, 9,814,000 livres et \$3,352,829 en 1926, et 26,646,535 livres et \$9,917,516 en 1925. Suivent les exportations de fromage et leur valeur: 1929—92,946,100 livres et \$18,503,575; 1928—114,152,500 livres et \$25,467,642; 1927—110,-533,000 livres et \$22,012,543; 1926—134,656,600 livres et \$24,857,868; 1925—150,742,900 livres et \$34,575,980. L'exportation des œufs (en coquille) montre une augmentation sur 1928, soit 1,147,829 douzaines, comparativement à 988,484 douzaines et les valeurs respectives de \$123,572 contre \$346,570. La laine exportée enregistre un déclin sur 1928, les totaux étant 6,089,825 livres contre 8,350,855 livres et la valeur a baissé de \$2,973,433 en 1928 à \$1,670,576 en 1929.

Les importations d'œufs inspectés donnent 674,745 douzaines en 1929, une diminution sur 988,470 douzaines inspectées l'année précédente.

Cours.—La moyenne des cours pour bêtes à cornes et moutons en 1929 était à la baisse comparativement à 1928 tandis qu'elle était à la hausse pour les veaux et les porcs. En autant que les porcs et les moutons sont concernés, cette augmentation ou diminution affecte tous les marchés locaux aussi bien que la moyenne générale de tous les marchés. Les cours des bêtes à cornes étaient à la hausse à Montréal et Saskatoon, mais en baisse sur tous les autres marchés. Les cours du veau étaient plus bas à Calgary, Edmonton, Moose Jaw et Saskatoon, plus hauts à Toronto, Montréal et Winnipeg, et stationnaires à Prince Albert. Les moyennes pondérées aux différents marchés, par 100 livres, avec les moyennes pondérées pour tous les marchés combinés et les chiffres comparatifs des années précédentes, apparaissent au tableau qui suit:

Les prix de la viande suivent généralement ceux des animaux sur pied. Le prix du jambon fumé à Montréal a varié de 27 cents à 36 cents et de 25 cents à 37 cents à Toronto. Les prix moyens pour le jambon fumé en 1928 et 1929 sont comme suit: Montréal, 26·6 cents et 30·7 cents; Toronto, 25·3 cents et 30·2 cents; Winnipeg 27·4 cents et 30·4 cents; Vancouver, 26·9 cents et 30·6 cents. Les prix du bacon ont varié de 29 cents à 35 cents à Montréal et de 23 cents à 34½ cents à Toronto. Les moyennes des cours dans les différents centres furent 26·7 cents, 25·3 cents, 31·6 cents et 34·2 cents respectivement en 1928 comparativement à 31·8 cents, 28·9 cents, 32·7 cents et 32·6 cents respectivement en 1929. Le prix du bœuf frais de bonne qualité montre peu de changement sur l'année précédente, sauf à Winnipeg. Les prix moyens à Montréal sont 19·4 cents en 1928 et 19·2 cents en 1929, à Toronto, 19 cents et 19·1 cents, à Winnipeg, 18·3 cents et 17·4 cents, et à Vancouver, 18·9 cents et 19·2 cents. Les moyennes de prix pour le veau ont haussé sur tous les marchés et le cours de l'agneau de bonne qualité, par animal entier, a baissé sur tous les marchés à l'exception de Montréal où il montre une très légère augmentation. Les prix du veau, bon, par animal entier, pour 1928 et 1929 étaient de 19·9 cents et 21·2 cents à Montréal, 22 cents et 23·7 cents à Toronto et 19·5 cents et 20 cents à Winnipeg, tandis que les cours de l'agneau de bonne qualité, par animal entier, étaient de 22·6 cents et 23·2 cents à Montréal, 25 cents et 24·9 cents à Toronto, 26 cents et 25·2 cents à Winnipeg, et 29·2 cents et 27·7 à Vancouver.

Les prix du beurre sont légèrement plus élevés que l'année précédente, à l'exception de Vancouver, le cours moyen pour le beurre de crème des différents centres pour 1928 et 1929 étant comme suit: Montréal, 40·8 cents et 41·9 cents; Toronto, 42·4 cents et 44·2 cents; Winnipeg, 40·3 cents et 40·5 cents et Vancouver, 42·7 cents et 42·4 cents. Les cours du fromage sont aussi plus bas qu'en 1928 sur tous les marchés sauf Vancouver. Les cours de la laine montrent un déclin marqué en 1929 comparativement à 1928. Le cours moyen des laines médium de l'Est ou métisses a descendu de 34·5 cents la livre à 28·7 cents tandis que certaines qualités de la laine de l'Ouest baissaient de 33·2 cents et 33·4 cents en 1928 à 27·2 cents en 1929. Les cours des peaux ont aussi baissé.

Les données complètes relatives aux cours du bétail et des produits animaux, tant en gros qu'en détail, en 1929, paraissent aux tableaux XXIX et XXX. Les cours du bétail à Chicago sont inclus au tableau XXXI pour fins de comparaison.

Richesse et revenu agricoles du Canada.—Selon une compilation effectuée au Bureau et publiée dans le Bulletin Mensuel de la Statistique Agricole de mars 1930, la richesse agricole brute du Canada en 1929 était estimée à \$7,978,633,000, dont \$864,167,000 pour les bêtes à cornes sur les fermes et \$63,854,000 pour les volailles aussi sur les fermes, au total \$928,021,000. Le revenu brut tiré de l'agriculture est, pour 1929, de \$1,667,218,000. Les animaux de ferme vendus y ont contribué \$210,437,000; la laine \$4,470,000; les produits laitiers \$290,000,000; les volailles et œufs \$109,346,000; soit un total de \$614,253,000 tiré directement du cheptel et des produits animaux. La distribution, par provinces, de la richesse et du revenu découlant de cette production est donnée dans le tableau qui suit, avec les chiffres correspondants de 1927 et 1928.
