LIVE STOCK AND ANIMAL PRODUCTS STATISTICS, 1933

PREFACE

This report is the fifteenth in an annual series covering live stock and allied interests in Canada. The first volume, issued in 1920, covered the years 1909-1919, so that a continuous annual record of the more important live-stock statistics is now obtainable over nearly a quarter of a century. Acknowledgment is gratefully made to the Live Stock and Health of Animals Branches of the Dominion Department of Agriculture for their helpful co-operation. The Annual Census of Industry conducted by the Bureau has also been fully utilized for the statistics of manufactures based on animal products.

The data are grouped in five sections, dealing respectively with live stock, animal products the international situation, foreign trade and prices. The usual section on freight rates has been omitted, but any revisions which have occurred in 1933 are mentioned in the introduction.

The statistics covering the numbers of live stock in Canada are prepared from the June Survey cards returned by approximately 150,000 Canadian farmers. Questions are also asked on the cards which give a fair indication of the farmers' intentions with regard to breeding and marketing of live stock. These questions are repeated on the special live-stock survey taken at December 1 so that a general idea of the trends in farm live stock is available twice each year. The first release of the live-stock figures is entrusted to the provinces, but the June 1 summaries for Canada appear in the November issue and the December 1 summaries in the February issue of the Monthly Bulletin of Agricultural Statistics. When these primary statistics are considered with the precise marketings as compiled by the Live Stock Branch of the Department of Agriculture, the disposition and slaughtering data reported to the annual Census of Industry, and the internal and external trade statistics also compiled in this Bureau, a fairly complete conspectus of the live-stock industry may be obtained.

The report has been prepared in the Agricultural Branch of the Dominion Bureau of Statistics by Miss M. E. Bouck under the direction of Dr. T. W. Grindley, Chief of the Branch.

R. H. COATS,

Dominion Statistician.

INTRODUCTION AND SUMMARY

Numbers of Live Stock.—The estimated number of farm animals in June, 1933 as compared with the number in June, 1932 showed an increase in cattle and decreases in sheep and swine. The number of milch cows was 3,694,000 in 1933 and 3,624,600 in 1932; of other cattle 5,182,000 and 4,886,500 respectively; sheep 3,385,800 and 3,644,500; and swine 3,800,700 and 4,639,100. The total for all classes of poultry on farms decreased from 64,080,200 in 1932 to 59,324,400 in 1933.

The December Survey.—In addition to the June estimates three December surveys of live stock and poultry on farms covering numbers on hand and breeding and marketing intentions have been made through the rural schools with the co-operation of the Provincial Departments of Agriculture. It is now becoming possible to determine the general trend of the industry allowing for seasonal variations, and the results of the last survey indicate a continued increase in cattle population and decreases in swine, sheep and poultry. With regard to swine, there will probably be a reversal of the downward trend late in 1934. The number of cattle and calves on farms on December 1, 1933 was estimated at 8,459,800 head, an increase of 4.5 per cent above the population on December 1, 1932 with a general increase in all provinces both in milch cows and beef cattle. The number of swine on farms at December 1, was estimated at 3,587,900 head, a decrease of 15.9 per cent from December 1, 1932, with indications, however, toward increased breeding. Sheep and lambs numbered 2,737,900 head on December 1, 1933 as compared with 2,811,700 head on the same date in 1932.

Values of Live Stock.—Average values per head of sheep, swine and poultry in 1933 increased over those of the previous year, cattle alone showing slightly lower values than in 1932. Milch cows decreased in value from \$32 to \$31 per head and other cattle remained unchanged at \$17; sheep increased from \$3.32 to \$4.00; swine from \$4.73 to \$8.89; and poultry from 53 cents to 56 cents.

The total value of farm live stock is calculated by the application of the average values per head to the numbers on farms as estimated on the basis of returns made in June of each year. Values for 1933 with comparative figures for 1932 placed within brackets were as follows: milch cows \$113,115,000 (\$116,349,000); other cattle \$88,452,000 (\$83,685,000); sheep \$13,549,000 (\$12,084,000); and swine \$33,804,000 (\$21,964,000). The total value of holdings of these groups amounted to \$248,920,000 as compared with \$234,082,000 in 1932. The total value of all poultry in Canada in 1933 was \$33,456,000 as compared with \$34,138,000 making a grand total of \$282,376,000 for 1933 against \$268,220,000 in 1932 for the classes included above.

Tables I, II and III give the numbers of farm live stock and poultry in Canada, by provinces, for the years 1929 to 1933, with the average value per head and total farm value. Table IV, by a series of index numbers, shows the relative progress of the production of live stock and field crops, the two main branches of the agricultural industry. The bases chosen for the calculation are the averages for the five-year period 1921-25 and for the most recent five-year period immediately preceding 1933.

Conditions during 1933.—The live-stock industry during 1933 could hardly be termed profitable, but there were nevertheless some encouraging features in the situation. Hogs particularly made a good price recovery, and with market supplies still slightly in excess of 1932, the hog producer was in a much better financial position than in the previous year. Sheep and lamb prices also improved, particularly during the latter part of the year. Local slaughtering and peddling of both sheep and hogs fell off and the animals again moved to the abattoirs for killing. Inspected slaughterings of sheep and lambs were higher than during any other year in the past five. Cattle and calves sold at unusually low prices during 1933 at all markets, establishing a new low record over many years. Exports of cattle, beef and bacon to the United Kingdom showed a decided increase over the previous year. Butter prices were better than in 1932 and cheese prices about on the same level, while the price of wool showed marked improvement.

Marketings.—A table on page 12 gives a comparison of sales and prices at the principal markets during the last five years. Three new stock yards have been included during 1933, viz., Saskatoon Pool, Regina and North Battleford. Details of live-stock sales by weeks at principal markets are to be found in table V. Table VI gives a yearly summary of sales by grades, and table VII a summary of disposition at the various yards.

Table VIII shows the counties and districts from which the animals were shipped in the first instance. In addition to consignments to live-stock yards, shipments direct to packers and for export are also shown. In Ontario, Manitoba and Alberta the number of hogs shipped direct to packers again exceeded the number shipped through live-stock yards, so the importance of these shipments is apparent. The following summary indicates marketings originating in each of the principal live stock producing provinces:—

| | Cattle | Calves | Swine | Sheep |
|-------------------|---------|---------|-----------|---------|
| Quebec..... | 34,850 | 100,086 | 65,768 | 145,430 |
| Ontario..... | 362,479 | 186,588 | 1,356,040 | 242,002 |
| Manitoba..... | 86,365 | 34,054 | 244,377 | 61,801 |
| Saskatchewan..... | 123,558 | 31,329 | 490,299 | 65,167 |
| Alberta..... | 134,272 | 35,196 | 1,032,169 | 159,219 |

Motor trucks were again a very important factor in the transportation of live stock to market and when these shipments reach the stock yard or packer it is often impossible to identify the origin by county or district. As an example, York is an outstanding beef county, but most of the marketings are included in Toronto truck deliveries.

The *interprovincial and export movement* of live stock through live-stock yards is shown in table IX by provinces of origin and in table X by provinces of destination. Total shipments in 1933 with comparative figures for 1932 were as follows: cattle 322,097 (261,915); calves 97,070 (91,165); hogs 1,038,576 (1,121,760); sheep 186,702 (153,259). The increased sales of cattle, calves and sheep and the decreased sales of swine at stock yards correspond with these shipments. Alberta was the largest shipper in the aggregate and also the largest shipper of hogs and sheep. Saskatchewan led in cattle shipments and Ontario in shipments of calves.

Slaughterings.—Slaughterings in inspected establishments in 1933 showed an increased number of all classes of live stock. The totals for 1933 and 1932 were as follows: cattle 654,000 (553,142); calves 438,428 (383,449); sheep 868,679 (788,222); and swine 2,802,377 (2,722,825). Details by provinces and months are given in table XI.

Animal Products.—The total value of all products of packing houses and abattoirs was \$91,246,523 in 1932 against \$117,596,697 in the previous year. The quantities and values of the principal items making up this total are given by provinces in table XII together with data as to slaughterings and materials used in the industry.

Production of creamery butter in 1932 amounted to 214,002,127 pounds, a decrease of 11,-953,119 pounds from the record high production of 1931. The average price per pound was only 18.91 cents and the total value of butter dropped from \$50,198,878 in 1931 to \$40,475,479 in 1932. Production of factory cheese increased from 113,956,639 pounds with a value of \$12,824,695 in 1931 to 120,524,243 pounds valued at \$11,379,922 in 1932. The average price for 1932 was 9.44 cents per pound as compared with 11.25 cents per pound in 1931. The average prices per pound for butter and cheese in 1932 were the lowest recorded since complete statistics of dairy factories first became available in 1900. The production and value of creamery butter and factory cheese by provinces for the years 1929 to 1932 are given in table XIII. Cold storage holdings of principal food commodities by provinces and months are given in table XIV.

Data covering the interprovincial and export shipments of meats are shown in tables XV and XVI. This material is based upon compilations made from the bills of lading of all such shipments in Canada. These bills of lading are required to be filed with the Veterinary Director General for all meats shipped out of inspected establishments; and, since all concerns making interprovincial or export shipments must have their establishments inspected, theoretically

these data must be complete. Strict comparability with statistics gathered by other methods is not to be expected, but it may be pointed out that the only comparable data gathered on a different basis which are available, viz., the customs returns, show only a small percentage of difference for the total meats exported.

Inspections of eggs for interprovincial and export shipment are covered in table XVII. Shipments from Eastern Canada amounted to 99,062 cases of which 36,661 cases were for export, and in Western Canada to 312,011 cases with 34,989 cases for export, a total of 411,073 cases shipped with 71,650 cases for export.

Consumption.—The consumption of meats in Canada in 1933 was estimated at 1,463 million pounds, a decrease of 98 million pounds from the estimate for the previous year. Beef figures showed an increase and pork and mutton figures showed decreases. The per capita consumption of beef was 56.09 (56.02) pounds; pork 74.58 (85.61) pounds; mutton and lamb 6.32 (6.97) pounds; the figures within brackets being those of 1932. The corresponding figures for other important animal products in 1933 were as follows: poultry 114,144,900 pounds or 10.68 pounds per capita; butter 321 million pounds or 30.04 pounds per capita; cheese 35 million pounds or 3.30 pounds per capita; eggs 229 million dozen or 21.45 dozen per capita. Complete details are given in tables XVIII, XIX and XX, with comparative figures for previous years.

International Situation.—A study of the production of live stock and trade in live stock and animal products in the principal countries of the world is made in tables XXI and XXII.

The year 1932 is the latest year for which comparatively complete data of numbers in various countries are available, but table XXI also includes revised figures for the years 1928 to 1931; and when no figures are reported for the years 1928 to 1931 those of an earlier year are included to give the reader an idea as to the status of the country in the live-stock industry.

The principal cattle-producing countries in order of holdings, with number of head reported and year to which data pertains in brackets, were: British India 159,763,471 (1930); United States 65,129,000 (1932); Brazil 42,539,203 (1931); Union of Socialist Soviet Republics 40,700,000 (1932); Argentine 32,211,855 (1930); Germany 19,139,271 (1932); France 15,643,430 (1932); Australia 12,260,955 (1931); Union of South Africa 10,573,869 (1930); Poland 9,460,682 (1932); and Canada 8,876,000 (1932).

Principal sheep-raising countries with numbers reported in order were: Australia 111,998,517 (1932); Union of Socialist Soviet Republics 52,100,000 (1932); United States 51,630,000 (1932); Union of South Africa 48,358,349 (1930); British India 44,628,474 (1930); Argentina 44,413,221 (1930); New Zealand 28,691,788 (1932); Great Britain and Northern Ireland 27,203,781 (1932); and Uruguay 20,558,124 (1930). Canada had only 3,644,500 sheep and lambs on farms in 1932.

Principal countries holding swine and numbers reported were as follows: United States 60,716,000 (1932); Germany 22,858,549 (1932); Brazil 22,089,812 (1931); Union of Socialist Soviet Republics 11,600,000 (1932); Manchuria 7,507,190 (1930); France 6,488,290 (1932); Poland 5,843,654 (1932); Spain 5,102,165 (1931); Denmark 4,886,296 (1932); and Canada 4,639,100 (1932).

The trade figures for 1931 have been revised and those for 1932 added and they are given very fully in table XXII.

Canadian Foreign Trade.—The foreign trade situation with regard to live stock showed some improvement in 1933 as compared with the previous year. There was an appreciable expansion in exports of live cattle to the United Kingdom, the total for the year being 50,317 head as compared with 16,568 head for the year 1932. Exports of live cattle to all countries rose from 33,285 head valued at \$2,130,222 in 1932 to 60,134 head valued at \$3,669,394 in 1933. There were slight increases in exports of sheep and swine. Details of the numbers and values of live-stock exports and imports for the past five years are given in table XXIII. Table XXIV gives the ports of exit through which the animals passed. The export situation in meats showed some improvement also, chiefly because of the increased shipments of beef and bacon to the United Kingdom. Beef prices were low and the value of exports did not rise in proportion to the quantity but pork prices made some recovery. Mutton and lamb exports increased slightly but prices were lower. Exports of beef in 1933 totalled 10,009,700 pounds valued at \$583,010

as against 4,466,400 pounds valued at \$383,526 in 1932; exports of pork totalled 79,302,600 pounds valued at \$8,907,309 as against 46,061,200 pounds valued at \$4,705,216; and exports of mutton and lamb were 406,500 pounds valued at \$47,832 as against 348,100 pounds valued at \$47,567. The revenue from exports of dairy produce was further curtailed in 1933. Cheese exports, representing the principal item in this class totalled only 74,168,600 pounds valued at \$8,076,620, a decrease of about 13,000,000 pounds from the previous year, when 86,939,900 pounds valued at \$8,914,705 were exported. Butter exports totalling 4,437,200 pounds valued at \$826,819 showed an increase of about 1,000,000 pounds over 1932 when 3,505,700 pounds valued at \$656,364 were exported. Wool and egg exports showed substantial increases over 1932 although Canada's wool trade still shows a net import of about 2½ million pounds.

Imports of pork, canned meats, lard, butter and wool showed increases over the previous year and imports of beef, mutton and lamb and eggs were less.

Full details of Canadian foreign trade in provisions are given in tables XXV and XXVI which also include figures of total British imports of the same commodities.

The table showing imports of inspected eggs in shell has again been omitted from this report. Imports totalled only 10,050 dozen as compared with 13,560 dozen in 1932. The total import was through the port of Vancouver and comprised 870 dozen fresh and 9,180 dozen storage eggs.

Prices.—Prices of live stock which have shown a very steady and rapid decline since 1929 at last registered improvement in some classes. Hog prices particularly showed a quite marked improvement over the unusually low prices of 1932 and prices of sheep and lambs also increased in a lesser degree. Prices of cattle and calves, however, declined still further from the low levels of the previous year. The table on page 12 shows the trend of prices and marketings during the last five years.

Meat prices followed the prices of live animals with further decreases from the previous year for beef and increases for pork and mutton and lamb. Prices of lard, butter, wool and hides were also higher, but prices of poultry and eggs declined from 1932.

The following summary of wholesale prices of meats and provisions in 1932 and 1933 is of interest:

| — | Unit | Montreal | | Toronto | | Winnipeg | | Vancouver | |
|--------------------------|------|----------|------|---------|------|----------|------|-----------|------|

Complete data as to prices of live stock and animal products, both wholesale and retail, during 1933 are given in tables XXVII and XXVIII and live-stock prices at Chicago are included in table XXIX for purposes of comparison.

The price of eggs used in the chart on page 48 was changed in November, 1933 from "Fresh Extras" to "Grade A, large" that being the most comparable price following the revisions in standard egg grading at that date.

Freight Rates.—Rail freight rates on live stock from important shipping points to the yards and from the yards to seaboard ports for export were included in the 1932 report of "Live Stock and Animal Products Statistics", and since there have been no further revisions in these rates the reader is referred to the report indicated for this information.

Ocean freight rates on live cattle were changed on September 1, 1933 from \$12.00 per head, which had been the prevailing rate since early in 1932, to 57 shillings for September and 60 shillings for October with the usual discount of 10 per cent on cattle under 1,000 lb. The latter rate was still in effect in April, 1934.

The tariff rates on trans-Atlantic shipments of butter and cheese in 1933 were as follows:—

(a) Butter—

January 1 to December 31, inclusive

| | |
|-----------------------|--------------------|
| Ordinary stowage..... | \$1.00 per 100 lb. |
| In refrigeration..... | \$1.10 per 100 lb. |

(b) Cheese—

January 1 to April 19, inclusive

| | |
|----------------------------------|--------------------|
| Ordinary stowage..... | \$.45 per 100 lb. |
| In cool air, in wired boxes..... | \$.60 per 100 lb. |

April 20 to December 31, inclusive

| | |
|----------------------------------|--------------------|
| Ordinary stowage..... | \$.52 per 100 lb. |
| In cool air, in wired boxes..... | \$.67 per 100 lb. |

There were no contract rates on butter, and the contract rates on cheese, effective from April 20 to the end of the year, were 10 cents per 100 pounds less than the tariff rates prevailing during that period.

Agricultural Revenue and Wealth of Canada.—According to a compilation made in the Bureau and published in the March, 1934 issue of the Monthly Bulletin of Agricultural Statistics, the gross agricultural wealth of Canada for 1933 was estimated at \$5,230,994,000. Of this, \$403,135,000 was represented by live stock and \$33,456,000 by poultry on farms, a total of \$436,591,000. The estimated gross annual agricultural revenue for 1933 was \$762,302,000. Farm animals sold contributed \$89,063,000; wool \$2,000,000; dairy products \$167,488,000; poultry and eggs \$35,880,000; a total of \$294,431,000 directly from live stock and animal products. The distribution by provinces of the wealth and revenue relating to live stock is shown in the following table together with revised figures for 1932 and 1931.

Estimated Annual Agricultural Revenue and Wealth of Canada in Live Stock and Animal Products, by Provinces, 1931, 1932 and 1933

Estimation des revenus agricoles annuels et de la richesse du Canada en bétail et produits animaux, par provinces, 1931, 1932 et 1933

†Includes swine and some cattle, calves and sheep moving from one province to another on direct shipment to packing plants and which do not necessarily pass through stock yards.

‡Comprend les porcs et quelques bêtes à cornes, veaux et moutons expédiés directement aux abattoirs d'une autre province et qui ne passent pas nécessairement par les parcs à bestiaux.

Note.—Export figures are based on Customs returns and are shown according to the provinces in which final ports of exit from Canada were located. Shipments to other provinces may include some quantities subject to further shipment.

Note.—Les chiffres des exportations sont puissés dans les rapports des Douanes; elles sont attribuées aux provinces d'où elles sont définitivement sorties du Canada. Les expéditions interprovinciales peuvent comprendre des livraisons à compléter.

[†]The classification of "Meats, canned and preserved" in British and Canadian records is not identical. British imports include Meats not elsewhere specified: 1. Tinned or canned. 2. Salted. Canadian import figures include: 1. Canned meats, poultry or game. 2. Meats prepared or preserved, other than canned, n.o.p. 3. Other meats, salted, n.o.p. Canadian exports are given under the single heading, "Canned meats, n.o.p."

[†]La classification des viandes en boîte et viandes de conserve n'est pas la même dans le Royaume-Uni et au Canada. Dans les importations du Royaume-Uni on trouve: Viandes non énumérées ailleurs, 1. En boîte, 2. Salées. Les importations canadiennes comportent les divisions suivantes: 1. Viandes, volailles et gibier, en boîte. 2. Viandes préparées ou conservées, autres que celles en boîtes, n.a.é. 3. Autres viandes salées, n.a.é. Quant aux exportations, elles sont groupées sous un seul article: "Viandes en conserve, n.a.é."

STATISTIQUE DU BETAIL ET DES PRODUITS ANIMAUX, 1933

PREFACE

Le présent rapport est le quinzième d'une série annuelle couvrant le bétail et les industries connexes au Canada. Le premier volume, paru en 1920, couvrait les années 1909-1919 de sorte qu'il est maintenant possible d'avoir une série ininterrompue des principales statistiques du bétail couvrant près d'un quart de siècle. Dans cette compilation la coopération de la Branche du Bétail et de l'Hygiène animale du Ministère de l'Agriculture a été d'une valeur inestimable. Le Recensement annuel de l'Industrie par le Bureau a aussi servi comme base des statistiques des manufactures dépendant des produits animaux.

Les données sont groupées en cinq sections traitant respectivement du bétail vivant, des produits animaux, de la situation internationale, du commerce international et des prix. La section ordinaire des taux de transport a été omise, mais toutes les révisions datant de 1933 sont mentionnées dans l'introduction.

Les statistiques sur le nombre de bestiaux au Canada sont préparées à même les relevés de juin faits d'après un questionnaire auquel ont répondu approximativement 150,000 fermiers canadiens. Ce questionnaire porte aussi sur les projets d'élevage des cultivateurs. Ces questions sont répétées sur le relevé spécial du bétail du 1er décembre, de sorte qu'il est possible d'obtenir deux fois par année un aperçu général des tendances du cheptel vif. La première publication des chiffres sur le bétail est laissée aux provinces mais des résumés pour tout le Canada sont publiés dans l'édition de novembre du Bulletin Mensuel de la Statistique Agricole, couvrant le relevé du 1er juin, et dans le numéro de février, couvrant le relevé du 1er décembre. Quand ces statistiques primaires sont considérées conjointement avec les ventes de bestiaux, telles que compilées par la Branche du Bétail du Ministère de l'Agriculture, les données sur la disposition des abatages, relevées par le Recensement annuel de l'industrie, et les statistiques du Commerce intérieur et extérieur compilées par ce Bureau, on a un aperçu assez complet de l'industrie animale au pays.

Ce rapport a été préparé par la Branche de la Statistique Agricole du Bureau par Melle M. E. Bouck, sous la direction de T. W. Grindley, Ph. D., chef de la Branche.

R. H. COATS,
Statisticien du Dominion.

INTRODUCTION ET RESUME

Cheptel.—Le cheptel des fermes, tel que constitué en juin 1933, accuse un accroissement pour les bêtes à cornes mais un fléchissement pour les ovins et les porcins sur le mois correspondant de l'année précédente. Le nombre de vaches laitières est passé de 3,624,000 à 3,694,000, celui des autres bovins de 4,886,500 à 5,182,000, celui des ovins de 3,644,500 à 3,385,800 et celui des porcins de 4,639,100 à 3,800,700. Le nombre d'oiseaux de basse-cour s'élève à 59,324,400 au lieu de 64,080,200 en juin 1932.

Relevé effectué en décembre.—En plus des estimations de juin, trois relevés ont été effectués en décembre par l'entremise des écoles rurales avec la collaboration des départements provinciaux de l'Agriculture; ils portent sur le cheptel des fermes (nombre et valeur) et les prévisions d'élevage et de vente. Il est maintenant possible de déterminer la tendance générale de l'industrie en tenant compte des variations saisonnières; les données recueillies lors du dernier relevé indiquent une tendance continue à l'accroissement du cheptel bovin, tandis que le nombre de pores, moutons et oiseaux de basse-cour est à la baisse. En ce qui concerne le cheptel porcin, toutefois, la courbe se remettra probablement à monter vers la fin de 1934. Le nombre de bêtes à cornes et de veaux dans les fermes le 1er décembre 1933 est estimé à 8,459,800 unités, soit une augmentation de 4·5% sur le 1er décembre 1932; l'augmentation pour les vaches laitières et les bœufs à boucherie se répartit entre toutes les provinces. Le cheptel porcin est estimé à 3,587,900 unités, soit à 15·9% de moins que le 1er décembre 1932; la tendance actuelle, toutefois, est à l'expansion de l'élevage. Le nombre de moutons et d'agneaux était de 2,737,900 le 1er décembre 1933 contre 2,811,700 l'année précédente.

Valeur du cheptel.—Les valeurs moyennes par unité, en ce qui concerne les moutons, les pores et les oiseaux de basse-cour accusent des plus-values sur 1932, tandis que l'on enregistre une légère diminution pour les bêtes à cornes. La valeur des vaches laitières est passée de \$32 à \$31 tandis que celle des autres bovins est demeurée stationnaire à \$17; la valeur des moutons a augmenté de \$3.32 à \$4.00, celle des pores de \$4.73 à \$8.89 et celle des oiseaux de basse-cour de 53 cents à 56 cents.

La valeur globale du cheptel des fermes a été obtenue en appliquant les valeurs moyennes par unité au nombre d'animaux estimatif sur les données recueillies au mois de juin de chaque année. Les valeurs de 1933 ressortent aux chiffres suivants (valeurs de 1932 entre parenthèses): vaches laitières, \$113,115,000 (\$116,349,000); autres bovins, \$88,452,000 (\$83,685,000); ovins, \$13,549,000 (\$12,084,000); porcins, \$33,804,000 (\$21,964,000), soit \$248,920,000 pour les trois espèces au lieu de \$234,082,000 en 1932. La valeur des oiseaux de basse-cour étant de \$33,456,000 contre \$34,138,000, le grand total des espèces ci-dessus est passé de \$268,220,000 à \$282,376,000.

Figurent aux tableaux I, II et III le nombre d'animaux et d'oiseaux de basse-cour dans les fermes du Canada réparti entre les différentes provinces, en juxtaposition avec les valeurs moyennes par unité et la valeur globale, le tout pour le quinquennat 1929 à 1933. Le tableau IV contient des indices illustrant le développement comparatif dans les deux branches principales de l'industrie agricole,—l'élevage et la grande culture. On a pris pour base les moyennes des quinquennats 1921-25 et 1928-32.

La situation en 1933.—Bien que l'industrie animale soit loin d'avoir été profitable en 1933 la situation renferme cependant quelques indices encourageants. On constate notamment un relèvement marqué du prix des pores, et avec des approvisionnements légèrement supérieurs à 1932, l'éleveur est en meilleure posture au point de vue financier que l'année précédente. Le prix des moutons et des agneaux a haussé également, surtout vers la fin de 1933. Les abatages dans les fermes et le colportage de moutons et de pores ont diminué, les acheminements s'effectuant de nouveau sur les abattoirs. Les abatages contrôlés de moutons et d'agneaux ont été plus nombreux cette année que dans toute autre du dernier quinquennat. Les prix obtenus pour les bêtes à cornes et les veaux ont été très bas dans tous les marchés, plus bas que depuis des années. Les exportations de bêtes à cornes, de viande de bœuf et de bacon sur la Grande-Bretagne accusent une plus-value marquée sur l'année précédente. Le beurre a haussé et la laine également, alors que le prix du fromage n'enregistre presque aucun changement sur 1932.

Débouchés.—Les ventes effectuées dans les principaux marchés et les prix obtenus au cours des derniers cinq ans font l'objet du tableau inséré à la page 12. Les données de 1933 comprennent trois nouveaux parcs à bestiaux, savoir: Saskatoon (pool), Regina et North Battleford. Les ventes de chaque semaine sont données dans le tableau V. Le tableau VI contient un relevé annuel des ventes classifiées selon les espèces et le tableau VII un relevé des ventes dans les différents parcs.

Le tableau VIII donne l'énumération des comtés et districts d'où les animaux ont été expédiés en premier lieu. En plus des envois sur les différents parcs, y figurent les expéditions effectuées directement aux conserveries et aux exportateurs. Dans l'Ontario, le Manitoba et l'Alberta, le nombre de porcs acheminé directement vers les salaisons dépasse cette année encore le nombre de ceux expédiés aux parcs. Le relevé ci-après donne les envois effectués par chacune des principales provinces:

| | Bêtes à cornes | Veaux | Porcs | Moutons |
|-------------------|----------------------|---------|-----------|---------|
| Québec..... | 34,850 | 100,086 | 65,768 | 145,430 |
| Ontario..... | 362,479 | 186,588 | 1,356,940 | 242,002 |
| Manitoba..... | 86,365 | 34,054 | 244,377 | 61,801 |
| Saskatchewan..... | 123,558 | 31,329 | 490,299 | 65,167 |
| Alberta..... | 134,272 | 35,196 | 1,032,169 | 159,219 |

Les autocamions demeurent toujours un élément de grande importance dans le transport du bétail vers les marchés, de sorte qu'il est souvent impossible d'en déterminer la provenance, par comtés ou districts, lors de l'arrivée dans les parcs ou les salaisons. Les animaux en provenance du comté de York par exemple, où l'élevage de bœufs est très important, sont compris parmi les envois par camion en provenance de Toronto.

Le trafic interprovincial et les exportations de bétail par voie des parcs figure dans le tableau IX par provinces de provenance et dans le tableau X par provinces de destination. Voici comment se décomposent les envois effectués en 1933 (chiffres de l'année précédente entre parenthèses): bêtes à cornes, 322,097 (261,915); veaux, 97,070 (91,165); porcs, 1,038,576 (1,121,760); moutons, 186,702 (153,259). Ces chiffres indiquent bien que les ventes de bêtes à cornes, de veaux et de moutons effectuées dans les parcs ont augmenté tandis que celles de porcs ont diminué. L'Alberta se classe au premier rang non seulement pour le total des ventes, mais aussi pour les envois de porcs et de moutons. La Saskatchewan détient le premier rang pour les envois de bêtes à cornes et l'Ontario pour ceux de veaux.

Abatages.—Les abatages exécutés dans les établissements contrôlés accusent des accroissements sur 1932 pour toutes les espèces. Le total se répartit comme suit (1932 entre parenthèses): bêtes à cornes, 654,000 (553,142); veaux, 438,428 (383,449); moutons, 868,679 (788,222); porcs, 2,802,377 (2,722,825). Les détails classifiés par provinces et mois figurent dans le tableau XI.

Produits animaux.—Le chiffre de production des abattoirs et salaisons porte en 1932 sur \$91,246,523 contre \$117,596,697 l'année précédente. Les quantités et valeurs des principaux postes qui forment ce total sont contenues, par provinces, dans le tableau XII en juxtaposition avec les données sur les abatages et les matières premières utilisées dans cette industrie.

La production de beurre de beurrerie donne 214,002,127 lb, soit 11,953,119 lb de moins que le chiffre-record de 1931. Comme la moyenne n'est que de 18·91 cents la livre, la valeur est passée de \$50,198,878 en 1931 à \$40,475,479 en 1932. Les fromageries ont produit 120,524,243 lb de fromage ayant une valeur de \$11,379,922 contre 113,956,639 lb et \$12,824,695 en 1931. La moyenne par livre est passée de 11·25 cents à 9·44. La moyenne de 1932 tant, pour le beurre que le fromage, est plus basse que celle de toute autre année depuis 1900, première année pour laquelle on possède des statistiques complètes sur l'industrie des produits laitiers. La production,—poids et valeur—des beurries et fromageries de 1929 à 1932 fait l'objet du tableau XIII. Le tableau XIV donne les stocks des entrepôts frigorifiques par provinces et mois.

Les données relatives au trafic interprovincial et aux exportations de viande figurent dans les tableaux XV et XVI; elles ont été calculées sur les connaissances. D'après les dispositions de la loi, ceux-ci sont remis au Vétérinaire en chef et couvrent toutes les expéditions effectuées par les établissements contrôlés, et comme toutes les firmes exécutant des envois sur d'autres provinces et l'étranger sont assujetties au contrôle, ces données sont nécessairement des plus complètes. Bien qu'il ne faille pas s'attendre à une comparabilité exacte avec des statistiques recueillies d'après d'autres méthodes, il est à noter que les seules données comparables et recueillies autrement, c'est-à-dire les déclarations douanières, n'indiquent qu'une très petite différence en ce qui concerne les exportations de viandes.

Les inspections d'œufs destinés au trafic interprovincial et à l'exportation font l'objet du tableau XVII. Les envois en provenance de l'Est du Canada se montent à 99,062 caisses, dont 36,661 destinées à l'exportation, tandis que les expéditions provenant de l'Ouest donnent 312,011 caisses, dont 34,989 pour l'exportation, soit un grand total de 411,073 caisses comprenant 71,650 pour l'exportation.

Consommation.—La consommation canadienne de viande est estimée à 1,463 millions de livres en 1933, soit un fléchissement de 98 millions sur l'année précédente. On constate une augmentation pour la viande de bœuf, mais une diminution pour le porc et le mouton. La consommation per capita ressort aux chiffres suivants (1932 entre parenthèses): bœuf, 56·09 (56·02); porc, 74·58 (85·61); mouton et agneau, 6·32 (6·97). La consommation de volaille se monte en tout à 114,144,900 lb, soit 10·68 per capita; beurre, 321 millions de livres ou 30·04 per capita; fromage, 35 millions ou 3·30 lb; œufs, 229 millions de douzaines ou 21·45. On trouvera les données détaillées aux tableaux XVIII, XIX et XX, en juxtaposition avec les chiffres des années précédentes.

La situation internationale.—La statistique relative à l'élevage et au commerce des animaux dans les principaux pays de l'univers est donnée dans les tableaux XXI et XXII.

L'année la plus récente pour laquelle on possède des données comparables et complètes est 1932, mais le tableau XXI comprend également des chiffres revisés pour la période 1928-31; là où il a été impossible d'obtenir des renseignements couvrant les années 1928 à 1931, on s'est contenté de chiffres plus anciens afin de permettre au lecteur de se former une idée sur l'industrie de l'élevage dans les différents pays.

L'énumération suivante donne les principaux pays éleveurs dans l'ordre de l'importance de leur cheptel bovin; Inde britannique, 159,763,471 (1930); Etats-Unis, 65,129,000 (1932); Brésil, 42,539,203 (1931); U.R.S.S., 40,700,000 (1932); Argentine, 32,211,855 (1930); Allemagne, 19,139,271 (1932); France, 15,643,430 (1932); Australie, 12,260,955 (1931); Union Sud-Africaine, 10,573,869 (1930); Pologne, 9,460,682 (1932); Canada, 8,876,000 (1932).

Le cheptel ovin des principaux pays figure ci-après: Australie, 111,998,517 (1932); U.R.S.S., 52,100,000 (1932); Etats-Unis, 51,630,000 (1932); Union Sud-Africaine, 48,358,349 (1930); Inde britannique, 44,628,474 (1930); Argentine, 44,413,221 (1930); Nouvelle-Zélande, 28,691,788 (1932); Grande-Bretagne et Irlande du Nord, 27,203,781 (1932); Uruguay, 20,558,124 (1930). Le nombre de moutons et agneaux dans les fermes du Canada ne se montait qu'à 3,644,500 unités en 1932.

Les pays où le cheptel porcin est le plus nombreux sont les suivants: Etats-Unis, 60,716,000 (1932); Allemagne, 22,858,549 (1932); Brésil, 22,089,812 (1931); U.R.S.S., 11,600,000 (1932); Mandchourie, 7,507,190 (1930); France, 6,488,290 (1932); Pologne, 5,843,654 (1932); Espagne, 5,102,165 (1931); Danemark, 4,886,296 (1932); Canada, 4,639,100 (1932).

Les données relatives au trafic en 1931 ont été revisées et figurent avec celles de 1932 au tableau XXII.

Commerce étranger du Canada.—En ce qui concerne le bétail, le commerce étranger accuse un redressement sur 1932. Les exportations de bêtes à cornes sur la Grande-Bretagne donnent un accroissement marqué; de 16,568 unités qu'elles étaient en 1932, elles sont passées à 50,317 en 1933. Le total de bovins sur pied exporté vers tous les pays s'est accru de 33,285 unités et \$2,130,222 à 60,134 unités et \$3,669,394. Les exportations de moutons et de porcs sont légèrement en plus-value. Les données détaillées,—nombre et valeur—pour le dernier quinquennat figurent dans le tableau XXIII. Le tableau XXIV donne la répartition entre les

ports d'expédition. En raison notamment des exportations accrues de viande de bœuf et de bacon sur la Grande-Bretagne, les exportations globales de viandes enregistrent également un accroissement. Les prix de la viande de bœuf sont bas, de sorte que la valeur des exportations n'a pas augmenté en proportion de la quantité; le prix du porc, par contre, a baissé. Les exportations de mouton et d'agneau ont augmenté légèrement, mais les prix ont baissé. Les exportations de viande de bœuf se montent en 1933 à 10,009,700 lb ayant une valeur de \$583,010 contre 4,466,400 lb et \$383,526 l'année précédente; viande de porc, 79,302,600 lb et \$8,907,309 contre 46,061,200 lb et \$4,705,216; viandes de mouton et d'agneau, 406,500 lb et \$47,832 contre 348,100 lb et \$47,567. Les exportations de produits laitiers sont en moins-value. Pour le fromage, la position principale, elles s'élèvent à 74,168,600 lb valant \$8,076,620 au lieu de 86,939,900 lb et \$8,914,705 en 1932, soit un fléchissement en poids d'environ 13,000,000 de lb; beurre, 4,437,200 lb et \$826,819 contre 3,505,700 lb et \$656,364, augmentation en poids de 1,000,000 de lb environ. Les exportations de laine et d'œufs accusent des augmentations accentuées sur 1932; quoique le commerce canadien de laine donne toujours un chiffre d'importation net d'environ 2½ millions de livres.

Les importations de viande de porc, de conserves de viande, de saindoux, de beurre et de laine sont en plus-value, tandis que l'on enregistre des fléchissements pour le bœuf, le mouton, l'agneau et les œufs.

Les données complètes relatives aux importations et exportations canadiennes de denrées alimentaires et aux importations britanniques figurent aux tableaux XXV et XXVI.

Le tableau des importations d'œufs inspectés (en coquille) a été omis cette fois-ci encore. Elles ne se montent en 1933 qu'à 10,050 douzaines au lieu de 13,560 en 1932, le tout importé via Vancouver et se composant entre autres de 870 douzaines d'œufs frais et 9,180 douzaines d'œufs d'entrepot.

Cours.—Les cours du bétail sur pied, en baisse rapide et continue depuis 1929, se sont relevés enfin, notamment ceux des porcs qui accusent des hausses relativement marquées sur les prix ruineux de 1932. En ce qui concerne les moutons et les agneaux, la hausse n'est pas aussi prononcée. Quant aux bêtes à cornes et aux veaux, les cours sont toujours à la baisse. Le tableau à la page 12 donne les fluctuations des cours et les ventes effectuées durant le dernier quinquennat.

Les prix des viandes ont suivi ceux des animaux sur pied; la viande de bœuf a encore baissé tandis que le porc, le mouton et l'agneau ont baissé. Le saindoux, le beurre, la laine et les peaux sont à la hausse, tandis que la volaille et les œufs sont à la baisse.

Le résumé suivant donne les prix de gros pour les viandes et autres denrées alimentaires en 1932 et 1933:

| Unité | Montréal | | Toronto | | Winnipeg | | Vancouver | |
|------------------------------|----------|------|---------|------|----------|------|-----------|------|
| | 1932 | 1933 | 1932 | 1933 | 1932 | 1933 | 1932 | 1933 |
| | cts. | cts. | cts. | cts. | cts. | cts. | cts. | cts. |
| Jambons..... | liv. | 12.8 | 14.8 | 14.6 | 16.1 | 14.1 | 16.0 | 16.0 |
| Bacon..... | liv. | 11.2 | 13.2 | 13.4 | 15.8 | 13.6 | 17.3 | 14.7 |
| Porc en saumure, barils..... | liv. | 9.5 | 9.8 | 12.2 | 12.1 | 12.2 | 14.1 | 11.2 |
| porc, carcasses..... | liv. | 7.6 | 8.9 | 7.9 | 9.0 | 6.5 | 7.9 | 8.5 |
| Bouillon, carcasses..... | liv. | 10.6 | 8.9 | 11.0 | 9.4 | 9.4 | 7.9 | 11.3 |

| | | | | | | | | 23.1 |

Les données complètes relatives aux cours des animaux et des produits animaux (gros et détail) en 1933 font l'objet des tableaux XXVII et XXVIII; le tableau XXIX qui donne les cours des bestiaux à Chicago a été inséré pour fins de comparaison.

Le prix des œufs au graphique à la page 48 a été changé en novembre 1933; il se rapporte depuis à la "classe A, grands" au lieu de "extra frais", permettant ainsi d'effectuer des comparaisons plus équitables en raison de la révision de la classification standardisée.

Tarifs de transport.—Les tarifs pour le transport par chemin de fer des animaux vivants chargés dans les stations importantes à destination des parcs et de ceux-ci à destination des ports d'où se fait l'exportation sont compris dans l'édition de 1932 "Statistique du bétail et des produits animaux", et comme ils n'ont subi aucune modification depuis, il a été inutile de les publier dans le présent numéro.

Le tarif océanique pour le transport des bêtes à cornes a été modifié le 1er septembre 1933; de \$12.00 par unité qu'il était depuis le commencement de 1932, il a été porté à 57 shillings pour septembre et 60 pour octobre, le rabais pour bêtes à cornes d'un poids inférieur à 1,000 lb demeurant toutefois à 10%. Ce tarif était encore en vigueur en avril de l'année en cours.

Le tarif transatlantique de 1933 pour les envois de beurre et de fromage est le suivant:—

(a) Beurre—

| | 1er janvier au 31 décembre: |
|-------------------------|--------------------------------|
| Arrimage ordinaire..... | \$1.00 le 100 lb |
| Cale réfrigérée..... | \$1.10 le 100 lb |

(b) Fromage—

| | 1er janvier au 19 avril: |
|---|-----------------------------|
| Arrimage ordinaire..... | \$0.45 le 100 lb |
| Cale à air refroidi, boîtes renforcées..... | \$0.60 le 100 lb |
| | 20 avril au 31 décembre: |
| Arrimage ordinaire..... | \$0.52 le 100 lb |
| Cale à air refroidi, boîtes renforcées..... | \$0.67 le 100 lb |

Le tarif à forfait ne s'applique pas au beurre, mais pour le fromage il correspond entre le 20 avril et la fin de l'année au tarif régulier moins un rabais de 10 cents le 100 lb.

Revenu et richesse agricoles du Canada.—D'après les données du Bureau Fédéral de la Statistique publiées dans le numéro de mars 1934 du Bulletin mensuel de la Statistique agricole, la richesse agricole du Canada est estimée en 1933 à \$5,230,994,000 dont \$403,135,000 pour le gros et moyen bétail et \$33,456,000 pour les oiseaux de basse-cour dans les fermes, soit un total de \$436,591,000 pour le cheptel vif. Le revenu agricole brut se monte à \$762,302,000 en 1933, les ventes d'animaux de ferme y étant pour \$89,063,000; laine, \$2,000,000; produits laitiers, \$167,488,000; volailles et œufs, \$35,880,000; soit un total de \$294,431,000 découlant de la vente d'animaux et produits animaux. La répartition entre les différentes provinces de la richesse et du revenu se rapportant au cheptel figure dans le tableau à la page 11 en juxtaposition avec les chiffres revisés de 1932 et 1931.
