LIVE STOCK AND ANIMAL PRODUCTS STATISTICS, 1934

PREFACE

This report is the sixteenth in an annual series covering live stock and allied interests in Canada. The first volume, issued in 1920, covered the years 1909-1919, so that a continuous annual record of the more important live-stock statistics is now obtainable over nearly a quarter of a century. Acknowledgment is gratefully made to the Live Stock and Health of Animals Branches of the Dominion Department of Agriculture for their helpful co-operation. The Annual Census of Industry conducted by the Bureau has also been fully utilized for the statistics of manufactures based on animal products.

The data are grouped in five sections, dealing respectively with live stock, animal products, the international situation, foreign trade and prices. The usual section on freight rates has been omitted, but any revisions which have occurred in 1934 are mentioned in the introduction.

The statistics covering the numbers of live stock in Canada are prepared from the June Survey cards returned by approximately 145,000 Canadian farmers. Questions are also asked on the cards which give a fair indication of the farmers' intentions with regard to breeding and marketing of live stock. These questions are repeated on the special live-stock survey taken at December 1 so that a general idea of the trends in farm live stock is available twice each year. The first release of the live-stock figures is entrusted to the provinces, but the June 1 summaries for Canada appear in the November issue and the December 1 summaries in the February issue of the Monthly Bulletin of Agricultural Statistics. When these primary statistics are considered with the precise marketings as compiled by the Live Stock Branch of the Department of Agriculture, the disposition and slaughtering data reported to the annual Census of Industry, and the internal and external trade statistics also compiled in this Bureau, a fairly complete conspectus of the live-stock industry may be obtained.

The report has been prepared in the Agricultural Branch of the Dominion Bureau of Statistics by Miss M. E. Bouck under the direction of Dr. T. W. Grindley, Chief of the Branch.

R. H. COATS,

Dominion Statistician.

INTRODUCTION AND SUMMARY

Numbers of Live Stock.—The estimated number of farm animals in June, 1934 as compared with the number in June, 1933 showed increases in cattle and sheep and a decrease in swine. The number of milch cows was 3,864,200 in 1934 and 3,694,000 in 1933; of other cattle 5,087,700 and 5,182,000 respectively; sheep 3,421,100 and 3,385,800; and swine 3,654,000 and 3,800,700. The total for all classes of poultry on farms increased slightly from 59,324,400 in 1933 to 59,798,700 in 1934.

The December Survey.—In addition to the June estimates four December surveys of live stock and poultry on farms covering numbers on hand and breeding and marketing intentions have been made. The farmers, the rural schools and the Provincial Departments of Agriculture have co-operated in this work and the surveys are becoming more satisfactory yearly in determining the general trend of the industry. The number of cattle and calves on farms at December 1, 1934 was 8,484,900 as compared with 8,459,800 on December 1, 1933 and 8,951,900 on June 1, 1934. The greater than usual seasonal decline seems to indicate that the rate of increase in cattle population is slowing up. Hogs on farms numbered 3,648,900 head on December 1, representing a decrease of 5,100 head since June 1, and an increase of 61,000 head since December 1, 1933. There will probably be no appreciable change in market supplies available for the year 1935. The number of sheep and lambs in Canada at December 1, 1934 was 2,738,200 head compared with 3,421,100 head at June 1, and 2,737,900 head at December 1, 1933 with evidences pointing toward increased sheep population in 1935.

Values of Live Stock.—Average farm values per head of sheep, swine and poultry in 1934 increased over those of the previous year, cattle alone showing slightly lower values than in 1933. Milch cows decreased in value from \$31 to \$29 per head and other cattle remained unchanged at \$17; sheep increased from \$4.00 to \$4.18; swine from \$8.89 to \$9.86; and poultry from 56 cents to 59 cents.

The total value of farm live stock is calculated by the application of the average values per head to the numbers on farms as estimated on the basis of returns made in June of each year. Values for 1934 with comparative figures for 1933 placed within brackets were as follows: milch cows \$110,721,000 (\$113,115,000); other cattle \$84,657,000 (\$88,452,000); sheep \$14,298,000 (\$13,549,000); and swine \$36,029,000 (\$33,804,000). The total value of holdings of these groups amounted to \$245,705,000 as compared with \$248,920,000 in 1933. The total value of all poultry in Canada in 1934 was \$35,398,000 as compared with \$33,456,000 making a grand total of \$281,103,000 for 1934 against \$282,376,000 in 1933 for the classes included above.

Tables I, II and III give the numbers of farm live stock and poultry in Canada, by provinces, for the years 1930 to 1934, with the average value per head and total farm value. Table IV, by a series of index numbers, shows the relative progress of the production of live stock and field crops, the two main branches of the agricultural industry. The bases chosen for the calculation are the averages for the five-year period 1921-25 and for the most recent five-year period immediately preceding 1934.

Conditions during 1934.—The live-stock industry in Canada showed improvement in 1934 by an upturn in the market price of all classes of meat animals. In particular, the price recovery in hogs continued and was more marked than during the previous year. Cattle values showed a small improvement even in face of adverse circumstances. Drought conditions during the year forced into liquidation large supplies of cattle and added a heavy burden to an already weak market; sales of cattle and calves represented the heaviest movement in the last five years. Sheep and lamb sales, largely absorbed by a domestic market, registered an improvement of about 25 cents per hundredweight for all classes at all markets. Wholesale prices of meats followed very closely the trend in animal prices and butter, cheese, eggs and wool all registered some improvement. The United Kingdom furnished a favourable outlet for Canadian bacon and hams and exports of cattle, beef and bacon to Great Britain increased over 1933.

Marketings.—A table on page 12 gives a comparison of sales and prices at the principal markets during the last five years. Details of live-stock sales by weeks at principal markets are to be found in table V. Table VI gives a yearly summary of sales by grades, and table VII a summary of disposition at the various yards.

Table VIII shows the counties and districts from which the animals were shipped in the first instance. In addition to consignments to live-stock yards, shipments direct to packers and for export are also shown. In Alberta the number of calves, hogs and sheep shipped direct to packers far exceeded the number shipped through live-stock yards as did also hogs in Ontario, so the importance of these shipments is apparent. The following summary indicates marketings originating in each of the principal live stock producing provinces:—

—	Cattle	Calves	Swine	Sheep
Quebec.....	41,916	107,180	85,398	124,589
Ontario.....	396,683	278,418	1,175,769	302,316
Manitoba.....	125,392	60,572	230,539	90,023
Saskatchewan.....	181,387	47,527	491,135	81,897
Alberta.....	183,519	56,831	1,012,827	205,765

When motor trucks are employed in the transportation of live stock to market it is often impossible to indentify the origin by county or district when these shipments reach the stock yard or packer. As an example, York is an outstanding beef county, but most of the marketings are included in Toronto truck deliveries.

The interprovincial and export movement of live stock is shown in table IX by provinces of origin and table X shows the interprovincial movement by provinces of destination. Total shipments in 1934 with comparative figures for 1933 were as follows: cattle 415,872 (322,097); calves 155,272 (97,070); hogs 969,426 (1,038,576); sheep 235,228 (186,702). Figures for cattle, calves and sheep are not strictly comparable because in 1934 for the first time it was possible to include a record of all shipments to packers. Alberta was the largest shipper in the aggregate and also the largest shipper of hogs and sheep. Saskatchewan led in cattle shipments and Ontario in shipments of calves.

Slaughterings.—Slaughterings in inspected establishments in 1934 showed an increased number of all classes of live stock except sheep. The totals for 1934 and 1933 were as follows: cattle 804,290 (654,000); calves 542,842 (438,428); sheep 854,222 (868,679); and swine 2,871,980 (2,802,377). Details by provinces and months are given in table XI.

Animal Products.—The total value of all products of packing houses and abattoirs was \$92,366,137 in 1933 against \$91,246,523 in the previous year. The quantities and values of the principal items making up this total are given by provinces in table XII together with data as to slaughterings and materials used in the industry.

Production of creamery butter in 1933 amounted to 319,232,546 pounds; the average price per pound was 19.86 cents and the total value of butter increased from \$40,475,479 in 1932 to \$43,546,109 in 1933. The preliminary estimate of the production for 1934 is 233,047,500 pounds with a value of \$46,441,300. Production of factory cheese decreased from 120,524,243 pounds with a value of \$11,379,922 in 1932 to 111,146,493 pounds valued at \$11,127,984 in 1933 and the preliminary estimate for 1934 is 99,754,500 pounds valued at \$9,832,900. The average price for 1933 was 10.01 cents per pound as compared with 9.44 cents per pound in 1932. The production and value of creamery butter and factory cheese by provinces for the years 1930 to 1933 are given in table XIII. Cold storage holdings of principal food commodities by provinces and months are given in table XIV.

Tables covering the interprovincial and export shipments of meats have been omitted from this report, but statistics are available in the Bureau to any who wish to use them.

Inspections of eggs for interprovincial and export shipment are covered in table XV. Shipments from Eastern Canada amounted to 64,604 cases of which 42,423 cases were for export, and in Western Canada to 299,148 cases with 18,930 cases for export, a total of 363,752 cases shipped with 61,353 cases for export.

Consumption.—The consumption of meats in Canada in 1934 was estimated at 1,531 million pounds, an increase of 68 million pounds over the estimate for the previous year. Beef and mutton figures showed increases and pork figures a decrease. The per capita consumption of beef was 68·66 (56·09) pounds; pork 66·36 (74·58) pounds; mutton and lamb 6·28 (6·32) pounds; the figures within brackets being those of 1933. The corresponding figures for other important animal products in 1934 were as follows: poultry, 107,312,854 pounds or 9·90 pounds per capita; butter 335 million pounds or 30·92 pounds per capita; cheese 39 million pounds or 3·64 pounds per capita; eggs 242 million dozen or 22·31 dozen per capita. Complete details are given in tables XVI, XVII and XVIII, with comparative figures for previous years.

International Situation.—A study of the production of live stock and trade in live stock and animal products in the principal countries of the world is made in tables XIX and XX.

The year 1933 is the latest year for which comparatively complete data of numbers in various countries are available, but table XIX also includes revised figures for the years 1929 to 1932; and when no figures are reported for the years 1929 to 1933 those of an earlier year are included to give the reader an idea as to the status of the country in the live-stock industry.

The principal cattle-producing countries in order of holdings, with number of head reported and year to which data pertains in brackets were: British India 158,573,936 (1932); United States 67,352,000 (1933); Brazil 42,539,203 (1931); Union of Socialist Soviet Republics 38,592,000 (1933); Argentina 32,211,855 (1930); China 22,327,199 (1933); Germany 19,738,545 (1933); France 15,829,790 (1933); Australia 12,783,137 (1932); Union of South Africa 10,750,976 (1930); Poland 8,985,174 (1933); and Canada 8,876,000 (1933).

Principal sheep-raising countries with numbers reported in order were: Australia 112,926,931 (1932); United States 51,374,000 (1933); Union of Socialist Soviet Republics 50,551,000 (1933); Union of South Africa 46,091,158 (1933); Argentina 44,413,221 (1930); British India 43,481,462 (1932); New Zealand 27,755,966 (1933); Great Britain and Northern Ireland 26,651,337 (1933); Spain 16,470,639 (1932); and Uruguay 15,405,607 (1932). Canada had only 3,385,800 sheep and lambs on farms in 1933.

Principal countries holding swine and numbers reported were as follows: United States 55,976,000 (1933); Germany 23,890,397 (1933); Brazil 22,089,812 (1931); China 18,843,538 (1933); Union of Socialist Soviet Republics 12,086,000 (1933); France 6,768,970 (1933); Poland 5,752,863 (1933); Spain 5,048,232 (1932); Manchoukuo 4,482,739 (1933); Denmark 4,407,300 (1933); and Canada 3,800,700 (1933).

The trade figures for 1932 have been revised and those for 1933 added and they are given very fully in table XX.

Canadian Foreign Trade.—The foreign trade situation with regard to live stock showed improvement in 1934 as compared with the previous year. There was an expansion in exports of live cattle to the United Kingdom, the total for the year being 53,953 head as compared with 50,317 head for the year 1933. Exports of live cattle to all countries rose from 60,134 head valued at \$3,669,394 in 1933 to 64,975 head valued at \$4,031,401 in 1934. Details of the numbers and values of live-stock exports and imports for the past five years are given in table XXI. Table XXII gives the ports of exit through which the animals passed. The export situation in meats showed some improvement also, chiefly in the increased shipments of beef and bacon to the United Kingdom. Beef prices were very slightly better than during the previous year, but pork prices continued the recovery begun in 1933. Mutton and lamb exports decreased slightly and prices were a little better. Exports of beef in 1934 totalled 15,092,200 pounds valued at \$943,860 as against 10,009,700 pounds valued at \$583,010 in 1933; exports of pork totalled 123,750,200 pounds valued at \$19,267,221 as against 79,302,600 pounds valued at \$8,907,309; and exports of mutton and lamb were 378,800 pounds valued at \$50,234 as against 406,500 pounds valued at \$47,832. The revenue from exports of dairy produce was further curtailed in 1934, though prices were slightly better. Cheese exports representing the principal item in this class totalled only 61,167,800 pounds valued at \$6,571,737, a decrease of about 13,000,000 pounds from the previous year, when 74,168,600 pounds valued at \$8,076,620 were exported. Butter exports totalled only 428,300 pounds valued at \$101,424 showing a decrease of about 4,000,000 pounds from 1933 when 4,437,200 pounds valued at \$826,819 were

exported. Egg exports remained about the same as in the previous year, the quantity for 1934 being 2,001,024 dozen valued at \$454,502. Lard exports fell off by about 2,000,000 pounds and wool exports by about 7,000,000 pounds, with decreases in their respective values of approximately \$160,000 and \$1,274,000.

Imports of beef, pork, canned meats, lard, butter, eggs and wool showed increases over the previous year and imports of mutton and lamb and cheese were less.

Full details of Canadian foreign trade in provisions are given in tables XXIII and XXIV which also include figures of total British imports of the same commodities.

The table showing imports of inspected eggs in shell has again been omitted from this report. Imports totalled only 7,050 dozen grade "C" eggs through the port of Vancouver.

Prices.—Prices of live stock in 1934 registered improvement over the previous year in all classes. Cattle prices were very slightly better than in 1933, but hogs showed a marked improvement, and calf and sheep prices increased in a lesser degree. The table on page 12 shows the trend of prices and marketings during the last five years.

Meat prices followed the prices of live animals with increases over the previous year for beef, pork and mutton and lamb. Prices of dairy products, lard, poultry, eggs and wool were also higher than in 1933.

The following summary of wholesale prices of meats and provisions in 1933 and 1934 is of interest:—

	Unit	Montreal		Toronto		Winnipeg		Vancouver	
		1933	1934	1933	1934	1933	1934	1933	1934
		cts.	cts.	cts.	cts.	cts.	cts.	cts.	cts.
Hams.....	Lb.	14.8	21.1	16.1	22.4	16.0	23.0	16.3	21.8

Lamb carcass.....	Lb.	14.3	14.5	13.9	14.9	13.3	13.8	14.8	15.4
Lard.....	Lb.	8.4	8.9	10.1	10.6	9.8	10.6	10.6	12.0
Eggs.....	Doz.	28.8	31.6	26.9	29.8	22.5	24.7	24.0	26.2
Milk.....	Gal.	26.5	27.8	28.7	32.3	25.0	26.3	25.0	25.0
Cheese.....	Lb.	10.3	10.4	10.8	10.9	13.8	14.0	19.2	15.2
Butter.....	Lb.	21.0	22.4	21.1	22.2	19.9	21.2	23.1	24.0

Complete data as to prices of live stock and animal products, both wholesale and retail, during 1934 are given in tables XXV and XXVI and live-stock prices at Chicago are included in table XXVII for purposes of comparison.

The price of eggs used in the chart on page 48 was changed in November, 1933 from "Fresh Extras" to "Grade A, large" that being the most comparable price following the revisions in standard egg grading at that date.

Freight Rates.—Rail freight rates on live stock from important shipping points to the yards and from the yards to seaboard ports for export were included in the 1932 report of "Live Stock and Animal Products Statistics", and since there have been no further revisions in these rates the reader is referred to the report indicated for this information.

Ocean freight rates on live cattle during 1934 remained at 60 shillings per head though on two special steamers brought out at the request of the cattle shippers in October and November the shipping companies charged 65 shillings per head. During January and February 1935 the basic rate was 50 shillings per head.

The tariff rates on trans-Atlantic shipments of butter and cheese in 1934 were as follows:—

(a) Butter—

January 1 to December 31, inclusive

Ordinary stowage.....	\$1.00 per 100 lb.
In refrigeration.....	\$1.10 per 100 lb.

(b) Cheese

January 1 to April 24, inclusive

Ordinary stowage.....	\$.52 per 100 lb.
In cool air, in wired boxes.....	\$.67 per 100 lb.

April 25 to December 31, inclusive

Ordinary stowage.....	\$.55 per 100 lb.
In cool air, in wired boxes.....	\$.70 per 100 lb.

There were no contract rates on butter, and the contract rates on cheese were 10 cents per 100 pounds less than the tariff rates.

Agricultural Revenue and Wealth of Canada.—According to a compilation made in the Bureau and published in the March, 1935, issue of the Monthly Bulletin of Agricultural Statistics, the gross agricultural wealth of Canada for 1934 was estimated at \$5,608,157,000. Of this, \$413,837,000 was represented by live stock and \$35,398,000 by poultry on farms, a total of \$449,235,000. The estimated gross annual agricultural revenue for 1934 was \$931,347,000. Farm animals sold contributed \$99,438,000; wool \$2,645,000; dairy products \$181,966,000; poultry and eggs \$44,267,000; a total of \$328,316,000 directly from live stock and animal products. The distribution by provinces of the wealth and revenue relating to live stock is shown in the following table together with revised figures for 1932 and 1933.

LIVE STOCK AND ANIMAL PRODUCTS

11

Estimated Annual Agricultural Revenue and Wealth of Canada in Live Stock and Animal Products, by Provinces, 1932, 1933 and 1934

Estimation des revenus agricoles annuels et de la richesse du Canada en bétail et produits animaux, par provinces, 1932, 1933 et 1934

TABLE XVII.—Estimated Consumption of Poultry in Canada, per capita per annum, 1931-1934

TABLEAU XVII.—Consommation estimative de volaille au Canada, par bouche et par année, 1931-1934

(a) HENS, CHICKENS, ETC.—POULES, POULETS, ETC.

—	Unit	1931	1932	1933	1934	Unité	—
Hens, chickens, etc.—							Poules, poulets, etc.—
On farms.....	No.	61,277,229	59,842,800	54,943,400	55,429,500	No.	Dans les fermes.
Elsewhere.....	"	5,565,000	5,565,000	5,565,000	5,565,000	"	Ailleurs.
Total.....	"	66,842,229	65,407,800	60,508,400	60,994,500	"	Total.
Sold or killed.....	"	16,710,557	16,351,950	15,127,100	15,248,625	"	Vendus ou abattus.
Estimated Dressed Weight.....	Lb.	83,552,785	81,759,750	75,635,500	76,243,125	Liv.	Poids estimatif de la carcasse.
Estimated Exports.....	"	767,689	898,699	130,007	1,257,799	"	Exportations estimatives.
Total Consumption.....	"	82,785,096	80,861,051	75,505,493	74,985,326	"	Consommation totale.
Population.....	No.	10,376,000	10,506,000	10,681,000	10,835,000	No.	Population.
Consumption per capita.....	Lb.	7.98	7.70	7.07	6.92	Liv.	Consommation par bouche.

(b) TURKEYS—DINDE

Turkeys—On farms.....	No.	2,223,197	2,478,300	2,580,200	2,643,900	No.	Dindes—Dans les fermes.
Elsewhere.....	"	16,000	16,000	16,000	16,000	"	Ailleurs.
Total.....	"	2,239,197	2,494,300	2,596,200	2,659,900	"	Total.
Sold or killed.....	"	1,455,478	1,621,295	1,687,530	1,728,935	"	Vendues ou abattues.
Estimated Dressed Weight.....	Lb.	17,465,736	19,455,540	20,250,360	20,747,220	Liv.	Poids estimatif de la carcasse.
Estimated Exports.....	"	160,479	1,000,000	1,193,049	1,111,392	"	Exportations estimatives.
Total Consumption.....	"	17,305,257	18,455,540	19,057,311	19,635,828	"	Consommation totale.
Population.....	No.	10,376,000	10,506,000	10,681,000	10,835,000	No.	Population.
Consumption per capita.....	Lb.	1.67	1.75	1.78	1.81	Liv.	Consommation par bouche.

(c) DUCKS—CANARD

Ducks—On farms.....	No.	749,930	810,700	837,900	781,700	No.	Canards—Dans les fermes.
Elsewhere.....	"	74,000	74,000	74,000	74,000	"	Ailleurs.
Total.....	"	823,930	884,700	911,900	855,700	"	Total.
Sold or killed.....	"	741,537	796,230	820,710	770,130	"	Vendus ou abattus.
Estimated Dressed Weight.....	Lb.	4,078,454	4,379,265	4,513,905	4,235,715	Liv.	Poids estimatif de la carcasse.
Estimated Exports.....	"	37,473	—	7,980	105,400	"	Exportations estimatives.
Total Consumption.....	"	4,040,981	4,379,265	4,505,925	4,130,315	"	Consommation totale.
Population.....	No.	10,376,000	10,506,000	10,681,000	10,835,000	No.	Population.
Consumption per capita.....	Lb.	.39	.41	.42	.38	Liv.	Consommation par bouche.

(d) GEESE—OIE

Geese—On farms.....	No.	902,251	948,400	962,900	943,600	No.	Oies—Dans les fermes.
Elsewhere.....	"	20,000	20,000	20,000	20,000	"	Ailleurs.
Total.....	"	922,251	968,400	982,900	963,600	"	Total.
Sold or killed.....	"	830,026	871,560	884,610	867,240	"	Vendues ou abattues.
Estimated Dressed Weight.....	Lb.	8,300,260	8,715,600	8,846,100	8,672,400	Liv.	Poids estimatif de la carcasse.
Estimated Exports.....	"	76,265	—	21,147	111,015	"	Exportations estimatives.
Total Consumption.....	"	8,223,995	8,715,600	8,824,953	8,561,385	"	Consommation totale.
Population.....	No.	10,376,000	10,506,000	10,681,000	10,835,000	No.	Population.
Consumption per capita.....	Lb.	.79	.83	.83	.79	Liv.	Consommation par bouche.

(e) SUMMARY—RESUME

Hens, chickens, etc.....	Lb.	7.98	7.70	7.07	6.92	Liv.	Poules, poulets, etc.
Turkeys.....	"	1.67	1.75	1.78	1.81	"	Dindos.
Ducks.....	"	.39	.41	.42	.38	"	Canards.

† The classification of "Meats, canned and preserved" in British and Canadian records is not identical. British imports include Meats not elsewhere specified: 1. Tinned or canned. 2. Salted. Canadian import figures include: 1. Canned meats, poultry or game. 2. Meats prepared or preserved, other than canned, n.o.p. 3. Other meats, salted, n.o.p. Canadian exports are given under the single heading, "Canned meats, n.o.p."

† La classification des viandes en boîte et viandes de conserve n'est pas la même dans le Royaume-Uni et au Canada. Dans les importations du Royaume-Uni on trouve: Viandes non enumérées ailleurs, 1. En boîte. 2. Salées. Les importations canadiennes comportent des divisions suivantes: 1. Viandes, volailles et gibier, en boîte. 2. Viandes préparées ou conservées, autres que celles en boîtes, n.a.e. 3. Autres viandes salées, n.a.e. Quant aux exportations, elles sont groupées sous un seul article: "Viandes en conserve, n.a.e."

STATISTIQUE DU BETAIL ET DES PRODUITS ANIMAUX, 1934

PREFACE

Le présent rapport est le seizième d'une série annuelle couvrant le bétail et les industries connexes au Canada. Le premier volume, paru en 1920, couvrait les années 1909-1919 de sorte qu'il est maintenant possible d'avoir une série ininterrompue des principales statistiques du bétail couvrant près d'un quart de siècle. Dans cette compilation la coopération de la Branche du Bétail et de l'Hygiène animale du Ministère de l'Agriculture a été d'une valeur inestimable. Le Recensement annuel de l'Industrie par le Bureau a aussi servi comme base des statistiques des manufactures dépendant des produits animaux.

Les données sont groupées en cinq sections traitant respectivement du bétail vivant, des produits animaux, de la situation internationale, du commerce international et des prix. La section ordinaire des taux de transport a été omise, mais toutes les révisions datant de 1934 sont mentionnées dans l'introduction.

Les statistiques sur le nombre de bestiaux au Canada sont préparées à même les relevés de juin faits d'après un questionnaire auquel ont répondu approximativement 145,000 fermiers canadiens. Ce questionnaire porte aussi sur les projets d'élevage des cultivateurs. Ces questions sont répétées sur le relevé spécial du bétail du 1er décembre, de sorte qu'il est possible d'obtenir deux fois par année un aperçu général des tendances du cheptel vif. La première publication des chiffres sur le bétail est laissée aux provinces mais des résumés pour tout le Canada sont publiés dans l'édition de novembre du Bulletin Mensuel de la Statistique Agricole, couvrant le relevé du 1er juin, et dans le numéro de février, couvrant le relevé du 1er décembre. Quand ces statistiques primaires sont considérées conjointement avec les ventes de bestiaux, telle que compilées par la Branche du Bétail du Ministère de l'Agriculture, les données sur la disposition des abatages, relevées par le Recensement annuel de l'industrie, et les statistiques du Commerce intérieur et extérieur compilées par ce Bureau, on a un aperçu assez complet de l'industrie animale au pays.

Ce rapport a été préparé par la Branche de la Statistique Agricole du Bureau par Mlle M. E. Bouck, sous la direction de T. W. Grindley, Ph. D., chef de la Branche.

R. H. COATS,
Statisticien du Dominion.

INTRODUCTION ET RESUME

Cheptel.—Le cheptel vif des fermes, tel qu'estimé en juin 1934, accuse un accroissement pour les bêtes à cornes et les moutons mais un fléchissement pour les porcs. Le nombre de vaches laitières est passé de 3,694,000 en 1933 à 3,864,200 en 1934; celui des autres bovins, de 5,182,000 à 5,087,700; celui des moutons de 3,385,800 à 3,421,100; et des porcs, de 3,800,700 à 3,654,000. Le nombre d'oiseaux de basse-cour s'élève de 59,324,400 en 1933 à 59,798,700 en 1934.

Relevé de décembre.—En plus des estimations de juin, quatre relevés du bétail et des volailles ont été effectués en décembre par l'entremise des écoles rurales, avec la collaboration des fermiers et des départements provinciaux de l'agriculture portant sur le nombre de bestiaux en main et les projets de vente et d'élevage. Ces relevés deviennent de plus en plus satisfaisants d'année en année pour déterminer les tendances générales de cette industrie. Le nombre de bêtes à cornes et de veaux dans les fermes le 1er décembre 1934 est de 8,484,900 comparativement à 8,459,800 le 1er décembre 1933 et 8,951,900 le 1er juin 1934. Le déclin, plus que normal pour la saison, semble indiquer que le taux d'augmentation des bêtes à cornes se ralentit. Le nombre de porcs sur les fermes le 1er décembre est de 3,648,900 têtes, soit une diminution de 5,100 depuis le 1er juin et une augmentation de 61,000 têtes sur le 1er décembre 1933. Il n'y aura probablement pas de changement appréciable dans les disponibilités pour le marché au cours de 1935. Le nombre de moutons et d'agneaux au Canada le 1er décembre 1934 est de 2,738,200 comparativement à 3,421,100 têtes le 1er juin et 2,737,900 le 1er décembre 1933 avec signes visibles d'une augmentation de la population ovine en 1935.

Valeur du cheptel vif.—Les valeurs moyennes loco fermes par tête des moutons, porcs et volailles en 1934 ont augmenté comparativement à l'année précédente, les bêtes à cornes seules montrant des valeurs un peu plus basses qu'en 1933. La valeur des vaches laitières est passée de \$31 à \$29 par tête et celle des autres bêtes à cornes est restée stationnaire à \$17; les moutons ont augmenté de \$4.00 à \$4.18; les porcs, de \$8.89 à \$9.86; et les volailles de 56 cents à 59 cents.

La valeur globale du cheptel vif des fermes a été obtenue en appliquant les valeurs moyennes par tête au nombre estimatif d'animaux d'après les données recueillies au mois de juin de chaque année. Les valeurs de 1934 ressortent aux chiffres suivants (valeurs de 1933 entre parenthèses); vaches laitières \$110,721,000 (\$113,115,000); autres bêtes à cornes \$84,657,000 (\$88,452,000); moutons \$14,298,000 (\$13,549,000); et porcs \$36,029,000 (\$33,804,000), soit \$245,705,000 pour les trois espèces au lieu de \$248,920,000 en 1933. La valeur des volailles étant de \$35,398,000 en 1934 comparativement à \$33,456,000, le grand total des espèces ci-dessus est passé de \$282,376,000 à \$281,103,000 en 1934. Figurent aux tableaux I, II et III les nombres d'animaux et d'oiseaux de basse-cour dans les fermes du Canada réparti entre les différentes provinces, pour les années 1930 à 1934, en juxtaposition aux valeurs moyennes par tête et la valeur globale sur la ferme. Le tableau IV, par une série de nombres-indices, illustre le développement comparatif dans les deux branches principales de l'industrie agricole,—l'élevage et la grande culture. On a pris pour base les moyennes des quinquennats 1921-25 et de la plus récente période quinquennale précédant immédiatement 1934.

La situation en 1934.—L'industrie animale au Canada montre de l'amélioration en 1934 par une hausse de prix dans les marchés pour toutes les espèces d'animaux de boucherie. On constate notamment que le relèvement du prix des porcs se continue avec plus de force que l'année précédente. La valeur des bêtes à cornes a légèrement monté, en dépit de circonstances adverses. La sécheresse de l'année a fait liquider forcément de larges approvisionnements en bêtes à cornes et a ajouté au fardeau déjà lourd d'un marché déjà faible; les ventes de bêtes à cornes et de veaux expriment le plus fort mouvement du genre des cinq dernières années. Les ventes de moutons et d'agneaux, en plus grande partie pour le marché domestique, donnent une amélioration de prix d'environ 25 cents par cent livres pour toutes les espèces et sur tous marchés. Les prix de gros des viandes ont suivi étroitement la tendance de ceux des animaux et le beurre, le fromage, les œufs et la laine, tous ont marqué une amélioration. Le Royaume-Uni a fourni un excellent débouché pour le bacon et le jambon canadiens et les exportations de bêtes à cornes, de bœuf et de bacon en Grande-Bretagne ont augmenté sur 1933.

Débouchés.—Un tableau de la page 12 donne une comparaison des ventes et prix sur les principaux marchés au cours des derniers cinq ans. Les détails des ventes de bêtes à cornes, par semaine, sur les principaux marchés se trouvent au tableau V. Le tableau VI contient un relevé annuel des ventes classifiées selon les espèces et le tableau VII un relevé des ventes dans les différents parcs.

Le tableau VIII donne l'enuinération des comtés et districts d'où les animaux ont été expédiés en premier lieu. En plus des envois sur les différents parcs, y figurent les expéditions effectuées directement aux conserveries et aux exportateurs. En Alberta, le nombre de veaux, porcs et moutons acheminés directement sur les conserveries dépasse de beaucoup le nombre de ceux expédiés par les parcs, de même que les porcs en Ontario, et l'importance de ces expéditions est visible. Le relevé ci-après donne les envois effectués par chacune des principales provinces productrices:

	Bêtes à cornes	Veaux	Porcs	Moutons
Québec.....	41,916	107,180	85,398	124,589
Ontario.....	396,683	278,418	1,175,769	302,316
Manitoba.....	125,392	60,572	230,539	90,023
Saskatchewan.....	181,387	47,527	491,135	81,897
Alberta.....	183,519	56,831	1,012,827	205,765

Les auto-camions demeurent toujours un élément de grande importance dans le transport du bétail vers les marchés, de sorte qu'il est souvent impossible de déterminer la provenance des animaux par comtés et districts lors de leur arrivée aux parcs ou aux abattoirs. Les animaux en provenance du Comté de York, par exemple, où l'élevage du bœuf est très important, sont compris parmi les arrivages par camion en provenance de Toronto.

Le trafic interprovincial et les exportations de bétail paraissent au tableau IX par provinces d'origine et au tableau X le trafic interprovincial par provinces de destination. Voici comment se décomposent les envois effectués en 1934 (chiffres de l'année précédente entre parenthèses): bêtes à cornes 415,872 (322,097); veaux 155,272 (97,070); porcs 969,426 (1,038,576); moutons 235,228 (186,702). Les chiffres pour bêtes à cornes, veaux et moutons ne sont pas strictement comparables, parce que pour la première fois on a inclus en 1934 un relevé de toutes les expéditions aux salaisons. L'Alberta se classe au premier rang pour le total des ventes et aussi pour les expéditions de porcs et de moutons. La Saskatchewan tient la tête pour les bêtes à cornes et l'Ontario pour les veaux.

Abatages.—Les abatages dans les établissements contrôlés en 1934 montrent des augmentations dans toutes les espèces excepté le mouton. Les totaux pour 1934 et 1933 sont comme suit: bêtes à cornes 804,290 (654,000); veaux 542,842 (438,428); moutons 854,222 (868,679); et porcs 2,871,980 (2,802,377). Les détails classifiés par provinces et mois figurent au tableau XI.

Produits animaux.—La valeur globale de tous produits des abattoirs et salaisons est de \$92,366,137 en 1933 comparativement à \$91,246,523 l'année précédente. Les quantités et valeurs des principaux articles qui forment ce total sont données par provinces dans le tableau XII en juxtaposition aux données sur les abatages et les matières premières utilisées dans cette industrie.

La production de beurre de beurrerie en 1933 donne 219,232,546 livres; le prix moyen la livre est de 19·86 cents et la valeur globale du beurre a augmenté de \$40,475,479 en 1932 à \$43,-546,109 en 1933. L'estimation préliminaire de la production de 1934 est de 233,047,500 livres, valant de \$46,441,300. La production des fromageries a diminué de 120,524,243 livres et une valeur de \$11,379,922 en 1932 à 111,146,493 livres, valant \$11,127,984 en 1933 et l'estimation

préliminaire de 1934 à 99,754,500 livres, valant \$9,832,900. Le prix moyen en 1933 a été de 10·01 cents la livre comparativement à 9·44 cents la livre en 1932. La production—poids et valeur—des beurries et fromageries par provinces les années 1930 à 1933 paraît au tableau XIII. Le tableau XIV donne les stocks des entrepôts frigorifiques par provinces et par mois.

Les tableaux relatifs au trafic interprovincial et aux exportations de viandes ont été omis du présent rapport, mais ces statistiques peuvent être consultées au Bureau par quiconque désire les connaître.

Les inspections d'œufs destinés au trafic interprovincial et à l'exportation font l'objet du tableau XV. Les expéditions de l'Est du Canada sont de 64,604 caisses dont 42,423 caisses pour l'exportation, et dans l'ouest canadien de 299,148 caisses dont 18,930 pour l'exportation, un total de 363,752 caisses, dont 61,353 pour l'exportation.

Consommation.—La consommation canadienne de viande en 1934 est estimée à 1,531 millions de livres, une augmentation de 68 millions de livres sur l'estimation pour l'année précédente. Le bœuf et le mouton montrent des augmentations mais les chiffres du porc sont en baisse. La consommation de bœuf per capita est de 68·66 (56·09) livres; de porc, 66·36 (74·58) livres; de mouton et agneau, 6·28 (6·32) livres; les chiffres entre parenthèses sont ceux de 1933. Les chiffres correspondants pour d'autres produits animaux importants de 1934 sont comme suit: volaille, 107,312,854 livres ou 9·90 livres per capita; beurre, 335 millions de livres ou 30·92 livres per capita; fromage, 39 millions de livres ou 3·64 livres per capita; œufs, 242 millions de douzaines ou 22·31 douzaines per capita. Des détails complets paraissent aux tableaux XVI, XVII et XVIII avec chiffres comparatifs des années précédentes.

La situation internationale.—La statistique relative à l'élevage et au commerce des animaux et des produits animaux dans les principaux pays de l'univers est donnée dans les tableaux XIX et XX.

L'année la plus récente sur laquelle existent des données comparables et complètes est 1933, mais le tableau XIX comprend également les chiffres revisés pour la période 1929-32; là où il a été impossible d'obtenir des renseignements couvrant les années 1929 à 1933 on s'est contenté de chiffres plus anciens afin d'offrir au lecteur un état de l'industrie de l'élevage dans les différents pays.

L'énumération suivante donne les principaux pays éleveurs dans l'ordre d'importance de leur cheptel bovin: Inde Britannique, 158,573,936 (1932); Etats-Unis, 67,352,000 (1933); Brésil, 42,539,203 (1931); U.R.S.S., 38,592,000 (1933); Argentine, 32,211,855 (1930); Chine, 22,327,199 (1933); Allemagne, 19,738,545 (1933); France, 15,829,790 (1933); Australie, 12,783,137 (1932); Union Sud-Africaine, 10,750,976 (1930); Pologne, 8,985,174 (1933); Canada, 8,876,000 (1933).

Le cheptel ovin des principaux pays paraît ci-après: Australie, 112,926,931 (1932); Etats-Unis, 51,374,000 (1933); U.R.S.S., 50,551,000 (1933); Union Sud-Africaine, 46,091,158 (1933); Argentine, 44,413,221 (1930); Inde Britannique, 43,481,462 (1932); Nouvelle-Zélande, 27,755,966 (1933); Grande-Bretagne et Irlande du Nord, 26,651,337 (1933); Espagne, 16,470,639 (1932); Uruguay, 15,405,607 (1932). Le nombre de moutons et d'agneaux sur les fermes du Canada ne se montait qu'à 3,385,800 en 1933.

Les principaux pays où le cheptel porcin est le plus nombreux sont les suivants: Etats-Unis, 55,976,000 (1933); Allemagne, 23,890,397 (1933); Brésil, 12,089,812 (1931); Chine, 18,843,538 (1933); U.R.S.S., 12,086,000 (1933); France, 6,768,970 (1933); Pologne, 5,752,863 (1933); Espagne, 5,048,232 (1932); Manchoukuo, 4,482,739 (1933); Danemark, 4,407,300 (1933); et Canada, 3,800,700 (1933).

Les données relatives au trafic en 1932 ont été revisées et figurent avec celles de 1933 au tableau XX.

Commerce extérieur du Canada.—En ce qui concerne le bétail, le commerce extérieur accuse un redressement en 1934 comparativement à l'année précédente. Les exportations de bêtes à cornes à la Grande-Bretagne donnent un accroissement, le total pour l'année étant de 53,953 comparativement à 50,317 têtes en 1933. Les exportations de bovins sur pied à tous pays se sont accrues de 60,134 têtes, valant \$3,669,394 en 1933, à 64,975 têtes, valant \$4,031,401, en 1934. Les données détaillées—nombre et valeur—pour le dernier quinquennat figurent au tableau XXI. Le tableau XXII donne leur répartition entre les ports d'embarquement. En raison notamment des exportations accrues de bœuf et de bacon à la Grande-Bretagne, les exportations globales enregistrent également un accroissement. Les prix du bœuf sont légèrement meilleurs que l'année précédente, mais ceux du porc continuent la hausse commencée en 1933. Les exportations de mouton et d'agneau ont diminué légèrement, et les prix étaient légèrement meilleurs. Les exportations de bœuf se montent en 1934 à 15,092,200 livres, valant \$943,860, comparativement à 10,009,700 livres, \$583,010, en 1933; de porc, 123,750,200 livres, valant \$19,267,221, comparativement à 79,302,600 livres, \$8,907,309; et les exportations de mouton et agneau, de 378,800 livres valant \$50,234, comparativement à 406,500 livres, \$47,832. Les revenus découlant des exportations de produits laitiers sont encore plus bas en 1934, malgré la plus-value atteinte au cours de l'année. Les exportations de fromage qui sont le principal item des produits laitiers ne donnent que 61,167,800 livres, valant \$6,571,737, une diminution d'environ 13,000,000 de livres sur l'année précédente alors qu'il a été exporté 74,168,600 livres, \$8,076,620. Les exportations de beurre ne sont que de 428,300 livres, valant \$101,424, soit une diminution de 4,000,000 de livres sur 1933, alors que 4,437,200 livres, valant \$826,819, ont été exportées. Les exportations d'œufs restent à peu près les mêmes que celles de l'an dernier, les quantités pour 1934 étant de 2,001,024 douzaines, valant \$454,502. Les exportations de saindoux ont fléchi d'environ 2,000,000 de livres et celles de laine d'environ 7,000,000 de livres, avec déclin de leur valeur respective d'approximativement \$160,000 et \$1,274,000.

Les importations de bœuf, porc, conserves de viande, saindoux, beurre, œufs et laine sont en augmentation sur l'année précédente et les importations de mouton, d'agneau et de fromage ont baissé.

Les données complètes relatives aux importations et exportations canadiennes de produits animaux alimentaires et aux importations britanniques figurent aux tableaux XXIII et XXIV.

Le tableau des importations d'œufs (en coquille) a été omis cette fois encore. Elles se totalisent à seulement 7,050 douzaines du classement "C", le tout passant par le port de Vancouver.

Cours.—Les cours du bétail sur pied ont montré de l'amélioration en 1934 pour toutes les espèces comparativement à ceux de l'année précédente. Les prix des bêtes à cornes ont été très légèrement meilleurs qu'en 1933, mais les porcs ont donné une amélioration prononcée, les veaux et les moutons avançant à un degré moindre. Le tableau de la page 12 donne la marche des prix et les cours du marché des derniers cinq ans.

Les prix des viandes ont suivi ceux des animaux sur pied avec des augmentations sur l'année précédente pour le bœuf, le porc, le mouton et l'agneau. Les prix des produits laitiers, du saindoux, des volailles, des œufs et de la laine étaient aussi plus élevés qu'en 1933.

Le résumé suivant donne les prix de gros pour les viandes et autres produits animaux alimentaires en 1933 et 1934:

Unité		Montréal		Toronto		Winnipeg		Vancouver	
		1933	1934	1933	1934	1933	1934	1933	1934
		cts.	cts.	cts.	cts.	cts.	cts.	cts.	cts.
Jambon.....	lb	14.8	21.1	16.1	22.4	16.0	23.0	16.3	21.8
Bacon.....	"	13.2	23.4	15.8	26.7	17.3	27.0	18.1	27.5
Porc en saumure, barile.....	"	9.8	12.2	12.1	14.5	14.1	15.7	10.3	11.8
Porc, carcasses.....	"	8.9	12.7	9.0	12.4	7.9	12.0	9.7	13.4
Bouillon, carcasses.....	"	8.9	9.9	9.4	9.2	7.9	7.6	8.9	9.6
Vache, carcasses.....	"	6.7	7.4	6.6	6.3	4.8	4.7	6.3	7.1

Fromage.....	lb	10.3	10.4	10.8	10.9	13.8	14.0	19.2	15.2
Beurre.....	"	21.0	22.4	21.1	22.2	19.9	21.2	23.1	24.0

Les données complètes relatives aux cours des animaux et des produits animaux (gros et détail) en 1934 font l'objet des tableaux XXV et XXVI; le tableau XXVII qui donne les cours des bestiaux à Chicago a été inséré pour fins de comparaison.

Le prix des œufs au graphique de la page 48 a été changé en novembre 1933; il se rapporte depuis à la "classe A, grands" au lieu de "extra frais", permettant ainsi d'effectuer des comparaisons plus équitables en raison de la révision de la classification standardisée.

Tarifs de transport.—Les tarifs pour le transport par chemin de fer des animaux vivants chargés dans les stations importantes à destination des parcs et de ceux-ci à destination des ports d'embarquement, sont compris dans l'édition de 1932 "Bétail et produits animaux", et comme ils n'ont subi aucune modification depuis, il est inutile de les publier dans la présente édition.

Le tarif océanique pour le transport des bêtes à cornes en 1934 est resté à 60 shillings par tête mais sur deux paquebots équipés spécialement à la demande des expéditeurs de bêtes à cornes en octobre et novembre, les compagnies expéditrices ont demandé 65 shillings par tête. Le taux basique pour janvier et février 1935 a été de 50 shillings par tête.

Le tarif transatlantique de 1934 pour les envois de beurre et de fromage est le suivant:—
(a) Beurre—

	1er janvier au 31 décembre, inclusivement
Arrimage ordinaire.....	\$1.00 le 100 lb
En réfrigération.....	\$1.10 le 100 lb

(b) Fromage—

	1er janvier au 24 avril, inclusivement
Arrimage ordinaire.....	\$.52 le 100 lb
Cale à air refroidi, boîtes renforcées.....	\$.67 le 100 lb
	25 avril au 31 décembre, inclusivement
Arrimage ordinaire.....	\$.55 le 100 lb
Cale à air refroidi, boîtes renforcées.....	\$.70 le 100 lb

Il n'y avait pas de contrat pour les taux sur le beurre, et les taux sur le fromage étaient à 10 cents le 100 livres en moins que les taux du tarif.

Revenu et richesse agricole du Canada.—D'après les données du Bureau Fédéral de la Statistique publiées dans le numéro de mars 1935 du Bulletin Mensuel de la Statistique Agricole, la richesse agricole du Canada est estimée en 1934 à \$5,608,157,000, dont \$413,837,000 pour le gros et le moyen bétail et \$35,398,000 pour les volailles sur les fermes, soit un total de \$449,235,000. Le revenu agricole estimatif annuel pour 1934 est de \$931,347,000. Les ventes d'animaux de ferme y contribuent \$99,438,000; laine, \$2,645,000; produits laitiers \$181,966,000; volailles et œufs, \$44,267,000; soit un total de \$328,316,000 découlant de la vente d'animaux et produits animaux. La répartition entre les différentes provinces de la richesse et du revenu se rapportant au cheptel vif figure dans le tableau à la page 11 avec les chiffres revisés de 1932 et 1933.
