## LIVE STOCK AND ANIMAL PRODUCTS STATISTICS, 1937

### PREFACE

This report is the nineteenth in an annual series covering live stock and allied interests in Canada. The first volume, issued in 1920, covered the years 1909-1919, so that a continuous annual record of the more important live-stock statistics is now obtainable over more than a quarter of a century. Acknowledgment is gratefully made to the Live Stock and Health of Animals Branches of the Dominion Department of Agriculture for their helpful co-operation. The Annual Census of Industry conducted by the Bureau has also been fully utilized for the statistics of manufactures based on animal products.

Surveys of numbers of live stock in Canada are made at June 1 and December 1 of each year and information is also collected at these dates giving a fair indication as to farmers' intentions regarding breeding and marketing of live stock. A general idea of the trends in the industry is thus available twice each year. When these primary statistics are considered with the precise marketings as compiled by the Live Stock Branch of the Department of Agriculture, the disposition and slaughtering data reported to the annual Census of Industry, and the internal and external trade statistics also compiled in this Bureau, a fairly complete conspectus of the live-stock industry may be obtained.

The data are grouped in six sections, dealing in order with live stock, animal products, the international situation, foreign trade, prices and freight rates. A historical survey covering the principal statistics of live stock and live-stock products is included as an appendix.

The report has been prepared in the Agricultural Branch of the Dominion Bureau of Statistics by Miss M. E. Bouck under the direction of Dr. T. W. Grindley, Chief of the Branch.

## INTRODUCTION AND SUMMARY

**Numbers of Live Stock.**—The estimated number of farm animals in June, 1937 as compared with the number in June, 1936 showed a slight increase in sheep and a decrease in swine, while cattle remained practically the same. The number of milch cows was 3,940,400 in 1937 and 3,885,300 in 1936; of other cattle 4,900,100 and 4,955,300 respectively; sheep 3,339,900 and 3,327,100; and swine 3,963,300 and 4,145,000. The total for all classes of poultry on farms decreased from 59,339,400 in 1936 to 57,510,100 in 1937.

*The December Survey.*—In addition to the June estimate, surveys have been made on December 1 annually since 1931 covering numbers of cattle, hogs, sheep and poultry on farms at that date together with marketing intentions and production prospects for the ensuing six months. These surveys are very helpful in determining the general trend of the industry. The number of cattle on farms at December 1, 1937 was estimated at 8,079,900 as compared with 8,337,400 at December 1, 1936. Hogs decreased in number from 4,422,400 to 3,680,400 and sheep increased in number from 2,625,500 to 2,673,800 during the same period. Evidences pointed to a decline in production in all classes during the spring of 1938 coupled with an increase in marketings of cattle and sheep and a decrease in marketings of hogs, as compared with a year ago.

**Values of Live Stock.**—Average farm values of all classes of live stock and poultry were higher in 1937 than in 1936. Milch cows increased in value from \$37 to \$40 per head; other cattle from \$23 to \$25; sheep from \$5.42 to \$5.61; swine from \$10.98 to \$12.31; and poultry from 68 cents to 75 cents.

The total value of farm live stock is calculated by the application of the average values per head to the numbers on farms as estimated on the basis of returns made in June of each year. Values for 1937 with comparative figures for 1936 placed within brackets were as follows: milch cows \$156,467,000 (\$143,316,000); other cattle \$123,731,000 (\$112,247,000); sheep \$18,741,000 (\$18,077,000); and swine \$48,802,000 (\$45,488,000). The total value of holdings of these groups amounted to \$347,741,000 as compared with \$319,128,000 in 1936. The total value of all poultry in Canada in 1937 was \$42,954,000 as compared with \$40,366,000 making a grand total of \$390,695,000 for 1937 against \$359,494,000 in 1936 for the classes included above.

Tables I, II and III give the numbers of farm live stock and poultry in Canada, by provinces, for the years 1933 to 1937 with the average value per head and total farm value. Table IV, by a series of index numbers, shows the relative progress of the production of live stock and field crops, the two main branches of the agricultural industry. The bases chosen for the calculation are the averages for the five-year period 1921-25 and for the most recent five-year period immediately preceding 1937.

**Conditions during 1937.**—The year 1937 established new high records in marketings of cattle, calves and hogs through stock yards, packers and direct on export. Calf marketings in particular far outstripped any other year on record, numbering 859,258 as compared with the 1936 record output of 680,062. This record volume of sales coupled with prices well above those of the previous year secured the farmer a considerably augmented revenue from these classes of farm animals. The United States market offered a very favourable outlet for live cattle and calves throughout the year and in addition absorbed over three million pounds of beef. After the cattle quota at reduced rates was filled, the market was still sufficiently attractive to allow of a continuation of exports. Bacon sold at good prices in the United Kingdom throughout the greater part of the year, and a shortage in pig production in the United States gave added keenness to the market. For the first time in history the United States imported more pork than was exported. The export bacon trade absorbed forty per cent of the total slaughters of Canadian hogs and the supply was not adequate to meet the full requirements

of the market for the year. A chart on page 86 shows the trends of hog prices at Chicago and Toronto during the years 1933 to 1937, together with the price of Canadian bacon in the United Kingdom. Inspected slaughterings and commercial sales of sheep and lambs were lower than in 1936 though prices showed improvement.

**Marketings.**—A table on page 12 gives a comparison of sales and prices at the principal markets during the last five years. Details of live-stock sales by weeks at principal markets are to be found in Table V. Table VI gives a yearly summary of sales by grades, and Table VII a summary of disposition at the various yards.

Table VIII shows the counties and districts from which the animals were shipped in the first instance. In addition to consignments to live-stock yards, shipments direct to packers and for export are also shown. The number of hogs shipped direct to packers far exceeded the number shipped through live-stock yards in Ontario and Alberta and the bulk of the hogs in all provinces except Quebec and Saskatchewan, went to packers, as did also cattle in the Maritime Provinces, calves in the Maritime Provinces and Alberta and sheep in Nova Scotia, Prince Edward Island, Manitoba and Alberta, so the importance of these shipments is apparent. The following summary indicates marketings originating in each of the principal live stock producing provinces:—

	Cattle	Calves	Swine	Sheep
Quebec.....	46,571	138,773	342,912	129,511
Ontario.....	418,862	302,328	1,758,351	248,206
Manitoba.....	151,613	101,276	255,646	83,196
Saskatchewan.....	445,494	166,080	569,723	101,986
Alberta.....	311,506	139,240	986,206	219,559

During recent years motor trucks compete strongly with the railroads in the transportation of live stock to market and it is sometimes impossible to identify the origin of these shipments by county or district when they reach the stock yard or packer.

The interprovincial and export movement of live stock is shown in Table IX by provinces of origin and Table X shows the interprovincial movement by provinces of destination. Total shipments in 1937 with comparative figures for 1936 were as follows: cattle 878,867 (756,512); calves 358,917 (255,991); hogs 911,097 (900,185); sheep 315,553 (262,013). Saskatchewan was the largest shipper in the aggregate and also the largest shipper of cattle and hogs. Ontario led in shipments of calves and Alberta in shipments of sheep.

**Slaughterings.**—Slaughterings in inspected establishments in 1937 showed an increased number of cattle, calves and swine and a decreased number of sheep. The totals for 1937 and 1936 were as follows: cattle 923,961 (920,229); calves 702,405 (602,616); sheep 821,758 (830,975); and swine 3,802,141 (3,562,534). Details by provinces and months are given in Table XI.

**Animal Products.**—Production of creamery butter in 1936 amounted to 250,931,777 pounds which was the largest output in the history of the industry. The average price per pound was 22.98 cents and the total value of butter increased from \$52,228,133 in 1935 to \$57,662,160 in 1936. The preliminary estimate of the production for 1937 is 246,387,300 pounds with a value of \$63,217,300. Production of factory cheese increased from 100,427,390 pounds with a value of \$10,570,309 in 1935 to 119,123,483 pounds valued at \$15,565,813 in 1936 and the preliminary estimate for 1937 is 128,444,300 pounds valued at \$17,845,300. The average price for 1936 was 13.07 cents per pound as compared with 10.53 cents per pound in 1935. The production and value of creamery butter and factory cheese by provinces for the years 1933 to 1936 are given in Table XII.

The total value of all products of packing houses and abattoirs was \$181,419,311 in 1937 against \$156,971,640 in the previous year. The quantities and values of the principal items making up these totals are given by provinces in Table XIII together with data as to slaughterings and materials used in the industry.

Cold storage holdings of principal food commodities by provinces and months for the year 1937 are given in Table XIV.

Inspections of eggs for interprovincial and export shipment for the year 1937 are covered in Table XV. Shipments from Eastern Canada amounted to 54,216 cases of which 24,159 cases were for export, and in Western Canada to 197,628 cases with 28,276 cases for export, a total of 251,844 cases shipped with 52,435 cases for export.

Statistics covering the interprovincial and export shipments of meats are available in the Bureau to any who wish to use them.

**Consumption.**—The consumption of meats in Canada in 1937 was estimated at 1,417 million pounds, a decrease of 64 million pounds from the estimate for the previous year. Beef and pork figures showed decreases and mutton figures an increase. The per capita consumption of beef was 58.89 (60.48) pounds; pork 62.35 (67.98) pounds; mutton and lamb 6.16 (5.86) pounds; the figures within brackets being those for 1936. The corresponding figures for other important animal products in 1937 were as follows: poultry 201,822,040 pounds or 18.15 pounds per capita; butter 363,759,626 pounds or 32.71 pounds per capita; cheese 39,287,906 pounds or 3.53 pounds per capita; eggs 238,957,298 dozen or 21.49 dozen per capita. Complete details are given in Tables XVI, XVII and XVIII, with comparative figures for previous years.

**International Situation.**—A study of the production of live stock and trade in live stock and animal products in the principal countries of the world is made in Tables XIX and XX.

The year 1936 is the latest year for which comparatively complete data of numbers in various countries are available but Table XIX also includes revised figures for the years 1933 to 1935 and, where possible, numbers for 1937.

The principal cattle producing countries in order of holdings, with number of head reported and year to which data pertains in brackets were: India 161,381,100 (1935); United States 65,930,000 (1937); Union of Soviet Socialist Republics 50,900,000 (1937); Brazil 40,513,900 (1935); Argentina 33,100,500 (1937); China 22,647,000 (1935); Germany 20,469,000 (1937); France 15,754,700 (1937); Australia 13,911,700 (1935); Union of South Africa 11,081,200 (1936); Poland 10,568,900 (1937); Mexico 10,083,000 (1930); and Canada 8,840,500 (1937).

Principal sheep raising countries with numbers reported in order were: Australia 112,173,400 (1937); Union of Soviet Socialist Republics 466,600,000 (1937); United States 52,918,000 (1937); Argentina 43,790,200 (1937); India 42,624,100 (1935); Union of South Africa 39,866,400 (1936); New Zealand 31,305,800 (1937); United Kingdom 25,540,900 (1937); China 20,957,000 (1935); Spain 19,093,300 (1933); Turkey 16,449,000 (1937); Iran 16,018,600 (1934); and Uruguay 15,405,600 (1932). Canada had only 3,339,900 sheep and lambs on farms in 1937.

Principal countries holding swine and numbers reported were as follows: China 62,639,000 (1935); United States 44,418,000 (1937); Union of Soviet Socialist Republics 25,700,000 (1937); Germany 23,805,100 (1937); Brazil 23,182,500 (1935); Poland 7,690,500 (1937); France 7,117,300 (1937); Spain 5,411,500 (1933); Manchoukuo 5,352,000 (1937); United Kingdom 4,452,600 (1937); Argentina 3,975,700 (1937) and Canada 3,963,300 (1937).

Table XX gives trade figures of principal countries for 1936 and where possible for 1937. The 1936 figures have been revised since the last issue of this report but figures for 1937 are still subject to revision.

**Canadian Foreign Trade.**—The foreign trade situation with regard to live stock again showed improvement as compared with the previous year. Exports of cattle and calves reached a higher level than in any year since the peak year 1919 and numbered 321,760 head valued at \$15,677,093 as compared with 285,414 head valued at \$12,497,193 in 1936. Exports to the United States totalled 306,958 head valued at \$14,577,506 and to Great Britain 9,610 head valued at \$858,347. Sheep exports fell off slightly from the previous year, but hog exports were the highest in the last decade numbering 82,863 head valued at \$1,348,764 as compared with 76,488 head valued at \$1,256,572 in 1936. Of the total export 75,802 head went to the

<sup>1</sup> Sheep and goats.

United States. Details of the numbers and values of live-stock exports and imports for the past five years are given in Table XXI. Table XXII gives the ports of exit through which the animals passed.

The export situation in meats was also satisfactory during the year, particularly in pork. Exports of pork in 1937 totalled 219,141,500 pounds valued at \$36,731,544 as against 174,492,800 pounds valued at \$28,097,156 in 1936; exports to Great Britain rose from 155,489,100 pounds to 193,001,300 pounds and exports to the United States from 13,597,700 pounds to 19,705,000 pounds. Exports of beef to all countries in 1937 amounted to 17,265,200 pounds as compared with 12,416,300 pounds in 1936 and the value was \$1,338,941 as compared with \$829,819. Of the beef exported in 1937, 9,737,900 pounds went to Great Britain and 3,005,900 pounds to the United States. Exports of mutton and lamb increased from 231,800 pounds valued at \$38,603 in 1936 to 283,500 pounds valued at \$52,695 in 1937. Cheese exports increased in quantity from 81,890,300 pounds to 88,955,300 pounds and in value from \$11,347,125 to \$13,062,330. Butter exports in 1937 amounted to 4,096,600 pounds valued at \$1,147,274 as against 5,128,800 pounds valued at \$1,178,916 in 1936. Exports of lard and eggs were slightly higher than in 1936 and canned meats and dressed poultry showed considerable increases. Wool exports decreased from 9,102,762 pounds valued at \$2,171,334 in 1936 to 4,812,701 pounds valued at \$1,396,381 in 1937, and the imports increased by nearly 2,000,000 pounds, producing a net import of 19,613,557 pounds against 13,675,009 pounds in 1936.

Full details of Canadian foreign trade in provisions are given in Table XXIII which also includes figures of total British imports of the same commodities.

There were no imports of inspected eggs in shell during 1937.

**Prices.**—Prices of all classes of live stock registered improvement in 1937 as compared with the previous year. Prices of cattle were higher than in any year since 1931 and prices of calves, hogs, and sheep and lambs were higher than in any year since 1930. The difference per hundredweight in average prices of cattle at nine principal markets compared with 1936 was 70 cents, of calves 45 cents, of hogs 35 cents and of sheep and lambs 55 cents.

Meat prices followed the prices of live animals. Beef prices showed the sharpest increase of the year, but prices of veal, pork and lamb were also higher as were those of other animal products including lard, butter, cheese, hides and wool.

The following summary of wholesale prices of meats and provisions in 1936 and 1937 is of interest:—

	Unit	Montreal		Toronto		Winnipeg		Vancouver	
		1936	1937	1936	1937	1936	1937	1936	1937

Complete data as to prices of live stock and animal products, both wholesale and retail, during 1937 are given in Tables XXIV and XXV and live stock prices at Chicago are included in Table XXVI for purposes of comparison.

**Freight Rates.**—Rail freight rates on live stock from important shipping points to the yards and from the yards to seaboard ports for export are given in Tables XXVII to XXXII; Table XXXIII gives a review of ocean freight rates on live cattle; and Table XXXIV gives ocean freight rates on butter and cheese for the year 1937.

**Appendix.**—The appendix to this report gives a survey of progress in the live-stock industry in so far as it is covered by the several decennial censuses since 1871. It includes figures of animal population and sales or slaughterings, production of home-made butter and cheese, wool and eggs, principal statistics of the dairy and meat-packing industries and trade in animals and animal products.

**Agricultural Revenue and Capital of Canada.**—According to a compilation made in the Bureau and published in the March, 1938 issue of the Monthly Bulletin of Agricultural Statistics, the current value of farm capital in Canada for 1937 was estimated at \$4,722,583,000. Of this \$554,698,000 was represented by live stock and \$42,954,000 by poultry on farms, a total of \$597,652,000. The estimated gross value of agricultural production for 1937 was \$1,051,698,000. Farm animals sold contributed \$140,989,000; wool \$2,972,000; dairy products \$228,403,000; poultry and eggs \$51,766,000; a total of \$424,130,000 directly from live stock and animal products. The distribution by provinces of the capital and revenue relating to live stock is shown in the following table together with revised figures for 1935 and 1936.

Estimated Values of Agricultural Revenue and Capital of Canada in Live Stock and Animal Products, by Provinces, 1935, 1936 and 1937

Estimation des revenus agricoles annuels et du capital du Canada en bétail et produits animaux, par province, 1935, 1936 et 1937

NOTE.—Export figures are based on Customs returns and are shown according to the provinces in which final ports of exit from Canada were located. Shipments to other provinces may include some quantities subject to further shipment.

NOTE.—Les chiffres des exportations sont publiés dans les rapports des Douanes; ces exportations sont attribuées aux provinces d'où elles sont définitivement sorties du Canada. Les expéditions interprovinciales peuvent comprendre des livraisons qui ne sont pas encore rendues à destination.

† The classification of "Meats, canned and preserved" in British and Canadian records is not identical. British imports include: 1. Meats not elsewhere specified, tinned, canned, etc., and salted. 2. Tinned and canned beef and pork tongues. Canadian import figures include: 1. Canned meats, poultry or game, n.o.p. 2. Meats prepared or preserved, other than canned, n.o.p. 3. Other meats, salted, n.o.p. Canadian exports are given under the single heading, "Canned meats, n.o.p."

† La classification des viandes en boîte et viandes de conserve n'est pas la même dans le Royaume-Uni et au Canada. Dans les importations du Royaume-Uni on trouve: 1. Viandes non énumérées ailleurs, en boîte et salées. 2. Langues de bœuf et de porc en boîtes. Les importations canadiennes comportent les divisions suivantes: 1. Viandes, volailles et gibier, en boîte, n.a.é. 2. Viandes préparées ou conservées, autres que celles en boîtes, n.a.é. 3. Autres viandes salées, n.a.é. Quant aux exportations, elles sont groupées sous un seul article: "Viandes en conserve, n.a.é."

<sup>1</sup> Canned beef included in this figure amounted to 10,363,006 pounds for the nine months April to December—Le bœuf en conserve compris dans ces chiffres donne 10,363,006 livres les neuf mois avril-décembre.

<sup>2</sup> Includes canned beef previously included in the item "Canned Meats, poultry or game, n.o.p." but shown separately since April, 1935—Comprend le bœuf en récipients hermétiques, autrefois inclus dans l'item "conserves de viande, volaille et gibier, n.a.é." mais montré séparément depuis avril, 1935.

<sup>3</sup> Quantity small; figures not available—Petite quantité; chiffres non connus.

(1) Quebec rate established May 10, 1921; Montreal rate unchanged.—Le tarif pour Québec a été établi le 10 mai 1921; le tarif pour Montréal n'a pas changé.

(2) Cattle and sheep only.—Bêtes à cornes et moutons seulement.

(3) Effective March 10, 1930.—Efficatif le 10 mars 1930.

(4) For cattle, sheep and hogs shipped from outside points to Toronto for feeding, and then re-shipped for export, rates are 20 cents to Montreal and Quebec and 29 cents to West Saint John.—Sur bêtes à cornes, moutons et porcs expédiés à Toronto pour être engraisés et réexpédiés à l'intérieur, les tarifs sont 20 cents à Montréal et Québec et 29 cents à West St. John.

TABLE XXXIII.—Ocean Freight Rates on live Cattle  
TABLEAU XXXIII.—Taux de fret océanique sur les bêtes à cornes

Previous to June 1921, there were no regular boats and freights were sold anywhere from \$50.00 upwards. From June to August, 1921, inclusive, the rate ranged from \$40.00 down to \$35.00; from September to December inclusive, from \$30.00 to \$25.00; in 1922 from \$25.00 to \$20.00; and in 1923 from \$20.00 to \$15.00 and up to \$20.00 again. This rate prevailed until the end of February, 1927, with reduction of 10% on light cattle from January 1, 1926. From March 1, 1927 till early in 1932, the rate was \$15.00 per head, with discount of 10% on cattle under 1,000 pounds. In February, 1932, the rate from West Saint John was reduced to \$12.00 per head with the same discount and later extended to April-May shipments from Montreal. This rate continued until September 1, 1933 when it was changed to 57 shillings per head. In October the rate rose to 60 shillings per head with a 10% discount on light cattle and this rate prevailed through 1934, though on two special steamers brought out at the request of the cattle shippers in October and November, the shipping companies charged 65 shillings per head. In January and February, 1935 the rate was 50 shillings per head. Exports of cattle to the United Kingdom practically ceased from February, 1935 to February, 1936; rates during this period were purely nominal and on the few cattle which did move the rate was approximately 50 shillings per head. The rates for 1936 and 1937 follow:—

February—April, 1936—50 shillings per head.  
May—August, 1936—50-55 shillings per head.  
September, 1936—60 shillings per head.  
October—November, 1936—50 shillings per head.  
February—April, 1937—50 shillings per head.  
May—August, 1937—60 shillings per head.  
September, 1937—60-65 shillings per head.  
November, 1937—60-70 shillings per head.

The rates quoted in 1936 and 1937 were for cattle weighing over 1,000 pounds and occupying space 26 inches wide. No rates were quoted in the months omitted.

Exchange values are inserted at the end of this table giving monthly quotations from 1933 to 1937 for the pound sterling at Montreal; these may be used in connection with the above ocean rates to estimate accurately the rate in Canadian currency for any particular month.

Antérieurement à juin 1921, il n'existait pas de service régulier et les transports s'effectuaient par des navires quelconques à partir de \$50.00. De juin à août 1921, inclusivement, le tarif a oscillé entre \$40.00 et \$35.00; de septembre à décembre inclusivement, de \$30.00 à \$25.00; en 1922, il est tombé à \$25.00 et \$20.00, puis en 1923 à \$20.00 et \$15.00, remontant finalement à \$20.00. Ce tarif de \$20.00 ne maintenait encore en juin 1924. Ce taux a été en force jusqu'à la fin de février 1927, avec diminution de 10 p.c. sur les bêtes à cornes légères du 1er janvier 1926. Du 1er mars 1927 jusqu'au commencement de 1932, le taux est de \$15.00 par tête, avec diminution de 10 p.c. sur animaux de moins de 1,000 livres. En février 1932, le taux de West St. John a été réduit à \$12.00 par tête, avec la même diminution, et appliqué aux expéditions de Montréal en avril-mai et le reste de la saison. Ce taux a été en vigueur jusqu'au 1er septembre 1933, alors qu'il a été échangé à 57 shillings par tête. En octobre le taux s'est élevé à 60 shillings par tête, avec diminution de 10 p.c. sur les bêtes à cornes légères et il est resté en vigueur pendant 1934, quoique sur deux vapeurs spéciaux nolisés à la demande des expéditeurs de bêtes à cornes en octobre et novembre les compagnies de navigation nient chargé 65 shillings par tête. En janvier et février 1935 le taux était de 50 shillings par tête. Les exportations de bêtes à cornes au Royaume-Uni ont à peu près cessé de février 1935 à février 1936; à cours de cette période les taux ont été purement nominaux et pour les quelques bêtes à cornes expédiées le taux a été d'environ 50 shillings par tête. Pour 1936 et 1937 les taux sont les suivants:—

Février-avril 1936—50 shillings par tête.  
Mai-août 1936—50-55 shillings par tête.  
Septembre 1936—60 shillings par tête.  
Octobre-novembre 1936—50 shillings par tête.  
Février-avril 1937—50 shillings par tête.  
Mai-août 1937—60 shillings par tête.  
Septembre 1937—60-65 shillings par tête.  
Novembre 1937—60-70 shillings par tête.

Les taux cotés en 1936 et 1937 étaient pour les bêtes à cornes pesant plus de 1,000 livres et occupant un espace de 26 pouces de largeur. Les taux n'ont pas été cotés les mois omis.

Les valeurs du change sont insérées à la fin de ce tableau et donnent les cotes mensuelles du sterling à Montréal de 1933 à 1937; ces cotes doivent être employées de concert avec les taux océaniques ci-dessus à l'effet d'estimer avec exactitude le taux en monnaie canadienne pour tout mois en particulier.

## STATISTIQUE DU BÉTAIL ET DES PRODUITS ANIMAUX, 1937

### PREFACE

Le présent rapport est le dix-neuvième d'une série annuelle couvrant le bétail et les industries connexes au Canada. Le premier volume, paru en 1920, couvrait les années 1909-1919 de sorte qu'il est maintenant possible d'avoir une série ininterrompue des principales statistiques du bétail couvrant plus d'un quart de siècle. Dans cette compilation la coopération de la branche du Bétail et de l'Hygiène Animale du ministère de l'Agriculture a été d'une valeur inestimable. Le recensement annuel de l'industrie par le Bureau a aussi servi de base aux statistiques des manufactures dépendant des produits animaux.

L'inventaire du cheptel vif au Canada est fait le 1er juin et le 1er décembre de chaque année, et des informations sont aussi relevées sur les élevages projetés et les mises sur le marché par les fermiers. Ceci permet de réperer deux fois par année la marche de cette industrie. Quand ces statistiques primaires sont considérées conjointement avec les ventes de bestiaux, telles que compilées par la branche du Bétail du ministère de l'Agriculture, les données sur la disposition des abatages relevées par le recensement annuel de l'industrie et les statistiques du commerce intérieur et extérieur compilées par ce Bureau, on a un aperçu assez complet de l'industrie animale au pays.

Les données se classent sous six rubriques, savoir: bétail, produits animaux, situation internationale, commerce extérieur, prix, et taux de transport. Un résumé rétrospectif contenant les statistiques principales relatives au bétail et aux produits animaux fait l'objet de l'appendice.

Ce rapport a été préparé dans la branche de la Statistique Agricole du Bureau par Mlle M. E. Bouck, sous la direction de T. W. Grindley, Ph. D., chef de la branche.

## INTRODUCTION ET RESUME

**Cheptel vif.**—Le nombre estimatif d'animaux de ferme en juin 1937 comparativement à juin 1936 accuse une légère diminution de moutons et une augmentation de porcs, tandis que les bovins sont presque au même chiffre. Le nombre de vaches laitières est de 3,940,400 en 1937 et de 3,885,300 en 1936; autres bovins 4,900,100 et 4,955,300 respectivement; moutons 3,339,900 et 3,327,100 et porcs 3,963,300 et 4,145,000. Le total de toutes les espèces de volailles sur les fermes a diminué de 59,339,400 en 1936 à 57,510,100 en 1937.

*Relevé de décembre.*—Outre l'estimation de juin, au 1er décembre de chaque année depuis 1931 il est fait un relevé du nombre de bovins, de porcs, de moutons et de volailles sur les fermes à cette date, ainsi que des projets de mise sur le marché et des perspectives de production pour les six mois suivants. Ces relevés sont très utiles pour déterminer l'orientation générale de l'industrie. Le nombre de bovins sur les fermes au 1er décembre 1937 est estimé à 8,079,900 comparativement à 8,337,400 au 1er décembre 1936. Le nombre de porcs a diminué de 4,422,400 à 3,680,400 et le nombre de moutons a augmenté de 2,625,500 à 2,673,800 la même période. Les données recueillies indiquent une diminution probable de la production dans toutes les catégories pour le printemps de 1938, associée à une augmentation dans le nombre de bovins et de moutons mis sur le marché et à une diminution des ventes de porcs, comparativement à l'année dernière.

**Valeur du cheptel vif.**—La valeur moyenne sur la ferme de toutes les catégories de bestiaux et de volailles est plus élevée en 1937 qu'en 1936. La valeur des vaches laitières augmente de \$37 à \$40 par tête; autres bovins de \$23 à \$25; moutons de \$5.42 à \$5.61; porcs de \$10.98 à \$12.31 et volailles de 68 cents à 75 cents.

La valeur totale du cheptel vif des fermes est calculée en multipliant la valeur moyenne par tête par le nombre de bestiaux sur les fermes, d'après les estimations que donnent les relevés de juin de chaque année. Voici les valeurs de 1937, avec les chiffres de 1936 entre parenthèses pour fins de comparaison: vaches laitières, \$156,467,000 (\$143,316,000); autres bovins \$123,731,000 (\$112,247,000); moutons, \$18,741,000 (\$18,077,000); porcs \$48,802,000 (\$45,488,000). La valeur totale des troupeaux de ces groupes s'élève à \$347,741,000 comparativement à \$319,128,000 en 1936. En 1937, la valeur totale de toutes les volailles au Canada est de \$42,954,000 comparativement à \$40,366,000, et ce montant joint au total précédent donne un total global de \$390,695,000 pour 1937 contre \$359,494,000 en 1936, pour les catégories mentionnées ci-dessus.

Les tableaux I, II et III donnent le nombre d'animaux de ferme et de volailles au Canada, par province, pour les années 1933 à 1937, ainsi que la valeur moyenne par tête et la valeur totale sur la ferme. Le tableau IV montre, au moyen d'une série de nombres-indices, les progrès relatifs de l'élevage des bestiaux et de la production des grandes cultures, les deux branches principales de l'industrie agricole. Les calculs sont basés sur les moyennes de la période quinquennale 1921-25 et de la période quinquennale qui précède immédiatement 1937.

**Situation en 1937.**—Un nouveau record a été établi en 1937 dans la mise sur le marché des bovins, des veaux et des porcs par l'intermédiaire des parcs à bestiaux, des salaisons et pour l'exportation directe. L'écoulement des veaux en particulier a surpassé de beaucoup le niveau de toute autre année, se chiffrant à 859,258 contre une production record de 680,062 en 1936. Ce volume record de ventes, joint à des prix beaucoup plus élevés que ceux de l'année précédente, a rapporté un revenu considérablement supérieur au cultivateur pour ces catégories d'animaux de ferme. Le marché des Etats-Unis s'est montré un débouché très favorable pour les bêtes à cornes et les veaux toute l'année et a absorbé en outre plus de 3,000,000 de livres de bœuf. Même après que le contingentement de bœufs exportés à tarif réduit eût été fourni, le marché resta suffisamment attrayant pour permettre de continuer les exportations. Le bacon s'est vendu à bons prix au Royaume-Uni pendant la plus grande partie de l'année, et une rareté de porcs aux Etats-Unis a stimulé l'activité du marché. Pour la première fois dans l'histoire, les Etats-Unis ont importé plus de porcs qu'ils en ont exporté. Le commerce d'exportation

du bacon a absorbé quarante pour cent des abatages totaux de pores canadiens et l'offre n'a pas été suffisante pour satisfaire à toutes les exigences du marché pendant l'année. Le graphique de la page 86 indique la marche des prix du porc à Chicago et à Toronto les années 1933 à 1937, ainsi que le prix du bacon canadien au Royaume-Uni. Les abatages inspectés et les ventes commerciales de moutons et d'agneaux ont diminué comparativement à 1936 bien que les prix aient été meilleurs.

**Ventes.**—Un tableau comparatif des ventes et des prix sur les principaux marchés les cinq dernières années est présenté à la page 12. Le tableau V donne des renseignements détaillés sur les ventes des bestiaux, par semaine, sur les principaux marchés. Le tableau VI présente un résumé annuel des ventes par catégorie, et le tableau VII un résumé de l'écoulement aux divers parcs à bestiaux.

Le tableau VIII indique les comtés et les districts d'où les animaux ont été expédiés en premier lieu. Outre les consignations aux parcs à bestiaux, les expéditions directes aux salaisons et pour l'exportation sont indiquées. Le nombre de pores expédiés directement aux salaisons dépasse de beaucoup le nombre expédié par l'entremise des parcs à bestiaux en Ontario et en Alberta et le plus gros des pores de toutes les provinces, sauf le Québec et la Saskatchewan, est allé aux salaisons, et il en est de même pour les bovins dans les Provinces Maritimes, les veaux dans les provinces Maritimes et l'Alberta et les moutons dans la Nouvelle-Ecosse, l'Île du Prince-Edouard, le Manitoba et l'Alberta, de sorte que l'importance de ces expéditions est évidente. Le résumé suivant indique les ventes faites dans chacune des principales provinces qui s'occupe de l'élevage des bestiaux:

	Bœufs	Veaux	Pores	Moutons
Québec.....	46,571	138,773	342,912	129,511
Ontario.....	418,862	302,328	1,758,351	248,205
Manitoba.....	151,613	101,276	255,646	83,196
Saskatchewan.....	445,494	166,080	569,723	101,986
Alberta.....	311,506	139,240	986,206	219,559

En ces dernières années, les camions automobiles ont fait une vive concurrence aux chemins de fer dans le transport des bestiaux sur le marché et il est parfois impossible d'identifier l'origine de ces expéditions par comté ou par district lorsqu'elles atteignent le parc à bestiaux ou la salaison.

Le tableau IX indique le mouvement interprovincial et d'exportation des bestiaux tandis que le mouvement d'une province à l'autre, par province de destination, est consigné au tableau X. Voici les expéditions totales en 1937 avec les chiffres de 1936 entre parenthèses pour fins de comparaison: bovins 878,867 (756,512); veaux 358,917 (255,991); pores 911,097 (900,185); moutons 315,553 (262,013). La Saskatchewan est le plus gros expéditeur de toutes les catégories d'animaux et aussi le plus gros expéditeur de bœufs et de pores. L'Ontario vient en tête pour les expéditions de veaux et l'Alberta pour les expéditions de moutons.

**Abatages.**—En 1937, les abatages dans les établissements inspectés accusent une augmentation dans le nombre de bœufs, de veaux et de pores et une diminution dans le nombre de moutons. Les totaux de 1937 et de 1936 sont les suivants: bœufs 923,961 (920,229); veaux 702,405 (602,616); moutons 821,758 (830,975); pores 3,802,141 (3,562,534). Les renseignements détaillés par province et par mois sont consignés au tableau XI.

**Produits animaux.**—En 1936, la production de beurre de crèmerie s'élève à 250,931,777 livres, la plus grosse production depuis l'établissement de l'industrie. Le prix moyen par livre est de 22.98 cents et la valeur totale du beurre augmente de \$52,228,133 en 1935 à \$57,662,160 en 1936. L'estimation préliminaire de la production pour 1937 est de 246,387,300 livres ayant une valeur de \$63,217,300. La production de fromage de fabrique augmente de 100,427,390 livres ayant une valeur de \$10,570,309 en 1935 à 119,123,483 livres évaluées à \$15,565,813 en 1936; l'estimation préliminaire de 1937 est de 128,444,300 livres, évaluées à \$17,845,300. Le prix moyen de 1936 est de 13.07 cents la livre comparativement à 10.53 cents la livre en 1935. La production et la valeur du beurre de crèmerie et du fromage de fabrique par province les années 1933 à 1936 sont données au tableau XII.

La valeur totale de tous les produits de salaison et d'abattoir est de \$181,419,311 en 1937 contre \$156,971,640 l'année précédente. Les quantités et les valeurs des principaux articles qui composent ces totaux sont données par province au tableau XIII, de même que les données relatives aux abatages et aux matériaux employés par l'industrie.

Le tableau XIV donne les quantités des principales denrées alimentaires entreposées au froid, par province et par mois, pour l'année 1937.

Les inspections d'œufs pour l'expédition en dehors de la province ou du pays en 1937 sont couvertes par le tableau XV. Les expéditions de l'Est du Canada s'élèvent à 54,216 caisses dont 24,159 ont été exportées, et celles de l'Ouest du Canada à 197,628 caisses dont 28,276 ont été exportées, soit un total de 251,844 caisses expédiées, dont 52,435 caisses pour l'exportation.

Tous ceux qui désirent se procurer des renseignements statistiques sur les expéditions de viande entre provinces ou en dehors du Canada peuvent s'adresser au Bureau.

**Consommation.**—La consommation de viandes au Canada en 1937 est estimée à 1,417,000,000 livres, soit une diminution de 64,000,000 de livres sur l'estimation de l'année précédente. Les chiffres du bœuf et du porc accusent des diminutions et ceux des moutons une augmentation. La consommation de bœuf par tête est de 58.89 (60.48) livres; porc 62.35 (67.98) livres; mouton et agneau 6.16 (5.86) livres; les chiffres entre parenthèses sont ceux de 1936.

Les chiffres correspondants pour les autres produits animaux importants sont les suivants: volailles, 201,822,040 livres ou 18.15 livres par tête; beurre 363,759,626 livres ou 32.71 livres par tête; fromage 39,287,906 livres ou 3.53 livres par tête; œufs 238,957,298 douzaines ou 21.49 douzaines par tête. Les tableaux XVI, XVII et XVIII donnent tous les renseignements en détail, ainsi que les chiffres des années précédentes pour fin de comparaison.

**Situation internationale.**—Une étude de la production de bestiaux et du commerce des bestiaux et des produits animaux dans les principaux pays du monde est faite aux tableaux XIX et XX.

L'année 1936 est la dernière pour laquelle il existe des renseignements relativement complets sur le nombre de bestiaux dans les divers pays, mais le tableau XIX comprend aussi les chiffres révisés pour les années 1933 à 1935 et, quand c'est possible, les chiffres de 1937.

Les principaux pays d'élevage de bêtes à cornes, par ordre d'importance, avec le nombre d'animaux signalés et l'année pour laquelle les renseignements sont donnés sont les suivants: Indes 161,381,100 (1935); Etats-Unis 65,930,000 (1937); Union des Républiques Socialistes Soviétiques 50,900,000 (1937); Brésil 40,513,900 (1935); Argentine 33,100,500 (1937); Chine 22,647,000 (1935); Allemagne 20,469,000 (1937); France 15,754,700 (1937); Australie 13,911,700 (1935); Union Sud-Africaine 11,081,200 (1936); Pologne 10,568,900 (1937); Mexique 10,083,000 (1930); et Canada 8,840,500 (1937).

Les principaux pays qui s'occupent de l'élevage des moutons avec le nombre déclaré sont les suivants, par ordre d'importance: Australie 112,173,400 (1937); Union des Républiques Socialistes Soviétiques 66,600,000 (1937); Etats-Unis 52,918,000 (1937); Argentine 43,790,200 (1937); Indes 42,624,100 (1935); Union Sud-Africaine 39,866,400 (1936); Nouvelle-Zélande 31,305,800 (1937); Royaume-Uni 25,540,900 (1937); Chine 20,957,000 (1935); Espagne 19,093,300 (1933); Turquie 16,449,000 (1937); Perse 16,018,600 (1934); et Uruguay 15,405,600 (1932). En 1937, il n'y avait que 3,339,900 moutons et agneaux sur les fermes du Canada.

Voici les principaux pays d'élevage du porc avec le nombre d'animaux déclarés: Chine 62,639,000 (1935); Etats-Unis 44,418,000 (1937); Union des Républiques Socialistes Soviétiques 25,700,000 (1937); Allemagne 23,805,100 (1937); Brésil 23,182,500 (1935); Pologne 7,690,500 (1937); France 7,117,300 (1937); Espagne 5,411,500 (1933); Mandchoukouo 5,352,000 (1937); Royaume-Uni 4,452,600 (1937); Argentine 3,975,700 (1937); et Canada 3,963,300 (1937).

Le tableau XX donne les chiffres du commerce pour les principaux pays en 1936 et quand c'est possible pour 1937. Les chiffres de 1936 ont été révisés depuis la publication du dernier numéro de ce rapport mais les chiffres de 1937 sont encore sujets à révision.

**Commerce extérieur du Canada.**—La situation du commerce extérieur des bestiaux est encore meilleure cette année que l'année précédente. Les exportations de bœufs et de veaux ont atteint un niveau plus élevé qu'en toute autre année depuis l'année de crise 1919; elles se

<sup>1</sup> Moutons et chèvres.

chiffrent à 321,760 têtes évaluées à \$15,677,093 comparativement à 285,414 têtes évaluées à \$12,497,193 en 1936. Les exportations sur les Etats-Unis s'élèvent à 306,958 têtes évaluées à \$14,577,506 et celles sur la Grande-Bretagne à 9,610 têtes évaluées à \$858,347. Les exportations de moutons ont un peu baissé comparativement à l'année précédente, mais les exportations de porcs sont les plus élevées de la dernière décade, se chiffrant à 82,863 têtes évaluées à \$1,348,764 comparativement à 76,488 têtes évaluées à \$1,256,572 en 1936. Sur le total des exportations 75,802 têtes sont allées aux Etats-Unis. Les renseignements détaillés sur le nombre et la valeur des animaux sur pied exportés et importés en ces cinq dernières années sont consignés au tableau XXI. Le tableau XXII indique les ports d'expédition des animaux.

La situation de l'exportation des viandes est satisfaisante également cette année, particulièrement en ce qui concerne le porc. Les exportations de porc en 1937 se chiffrant à 219,141,500 livres évaluées à \$36,731,544 contre 174,492,800 livres évaluées à \$28,097,156 en 1936; les exportations sur la Grande-Bretagne montent de 155,489,100 livres à 193,001,300 livres et les exportations sur les Etats-Unis de 13,597,700 livres à 19,705,000 livres. Les exportations de bœuf sur tous les pays en 1937 s'élèvent à 17,265,200 livres comparativement à 12,416,300 livres en 1936 et la valeur est de \$1,338,941 comparativement à \$829,819. Parmi le bœuf exporté en 1937, 9,737,900 livres sont expédiées sur la Grande-Bretagne et 3,005,900 livres sur les Etats-Unis. Les exportations de mouton et d'agneau augmentent de 231,800 livres évaluées à \$38,603 en 1936 à 283,500 livres évaluées à \$52,695 en 1937. Les exportations de fromage augmentent en volume de 81,890,300 livres à 88,955,300 livres et la valeur de \$11,347,125 à \$13,062,330. Les exportations de beurre en 1937 s'élèvent à 4,096,600 livres évaluées à \$1,147,274 contre 5,128,800 livres évaluées à \$1,178,916 en 1936. Les exportations de saindoux et d'œufs augmentent un peu comparativement à 1936 et celles de viandes en conserves et de volailles habillées augmentent considérablement. Les exportations de laine diminuent de 9,102,762 livres évaluées à \$2,171,334 en 1936 à 4,812,701 livres évaluées à \$1,396,381 en 1937, et les importations augmentent de quelque 2,000,000 de livres, produisant une importation nette de 19,613,557 livres contre 13,675,009 livres en 1936.

Les renseignements complets sur le commerce extérieur du Canada en denrées alimentaires sont donnés au tableau XXIII qui comprend les chiffres des importations britanniques totales de ces produits.

En 1937, il n'y a pas eu d'importations d'œufs en coquille inspectés.

**Prix.**—Les prix des animaux de toutes catégories enregistrent une augmentation en 1937 comparativement à l'année précédente. Les prix des bœufs sont plus élevés qu'en toute autre année depuis 1931 et les prix des veaux, des porcs, et des moutons et des agneaux sont plus élevés qu'en toute autre année depuis 1930. La différence, par cent livres, entre les prix moyens de 1937 et de 1936 sur neuf des principaux marchés est de 70 cents pour les bœufs, de 45 cents pour les veaux, 35 cents pour les porcs et de 55 cents pour les moutons et les agneaux.

Les prix de la viande ont suivi les prix des animaux sur pied. Les prix du bœuf ont manifesté la hausse la plus brusque de l'année, mais les prix du veau, du porc et de l'agneau sont également plus élevés, de même que ceux des autres produits animaux, y compris le saindoux, le beurre, le fromage, les peaux et la laine.

Le résumé suivant des prix de gros des viandes et des denrées alimentaires en 1936 et 1937 présente un certain intérêt:

—	Unité	Montréal		Toronto		Winnipeg		Vancouver

Les renseignements complets touchant les prix des bestiaux et des produits animaux, tant en gros qu'en détail, pour 1937 sont consignés aux tableaux XXIV et XXV et les prix des bestiaux à Chicago sont inclus dans le tableau XXVI pour fins de comparaison.

**Tarif du transport des marchandises.**—Le tarif du transport des bestiaux par rail des points d'expédition aux parcs à bestiaux et des parcs à bestiaux jusqu'aux ports du littoral pour l'exportation sont consignés aux tableaux XXVII à XXXII; le tableau XXXIII donne un aperçu du tarif océanique du transport des bestiaux et le tableau XXXIV le tarif océanique du transport du beurre et du fromage pour l'année 1937.

**Appendice.**—L'appendice de ce rapport donne un aperçu du progrès agricole, d'après les données fournies par les divers recensements décennaux depuis 1871. Il couvre les chiffres du cheptel vif ainsi que les ventes et les abatages, la production de beurre et de fromage de ferme, de laine et d'œufs, les principales statistiques des industries laitières et des salaisons et enfin le commerce des animaux et des produits animaux.

**Revenu et richesse agricoles du Canada.**—D'après les calculs faits par le Bureau et publiés dans le numéro de mars 1938 du Bulletin Mensuel de la Statistique Agricole, la valeur courante du capital des fermes au Canada en 1937 est estimée à \$4,722,583,000. Sur ce total les bestiaux figurent pour \$554,698,000 et les volailles sur les fermes pour \$42,954,000, un total de \$597,652,000. La valeur brute estimative de la production agricole pour 1937 est de \$1,051,698,000. Les ventes d'animaux de ferme contribuent de \$140,989,000; la laine de \$2,972,000 les produits laitiers de \$228,403,000; les volailles et les œufs de \$51,766,000; un total de \$424,130,000 provenant directement des bestiaux et de leurs produits. Le tableau page 1 contient la répartition, par province, du capital et des revenus attribuables aux bestiaux, de même que les chiffres révisés pour 1935 et 1936.
