PREFACE

This report is the thirty-fourth in an annual series covering live stock and animal products in Canada. The first volume, issued in 1920, covered the years 1909 to 1919 and subsequent volumes have maintained a continuous annual record of the operations of the live-stock industry in Canada. Historical and summary statements have been included since 1939 which are valuable in affording a long-time view of the industry. Newfoundland entered Confederation March 31, 1949, but, for the most part, current statistical data are not available. Except for external trade statistics and estimates of meat production and consumption for the years 1949-1952, all data in this report refer to the other nine provinces only. Estimates of live-stock numbers and values for the period 1942 to 1951 and related series, such as meat and wool production, are subject to revision to conform with beginning and ending census bench-marks.

The information has been assembled from various sources in the Dominion Government. The Marketing Service and the Production Service of the Department of Agriculture have furnished records of commercial marketings and inspected slayings and the Board of Transport Commissioners has supplied data on freight rates. Acknowledgment is gratefully made for their helpful co-operation. Within the Bureau of Statistics information on the live-stock industry is compiled by the Labour and Prices Division, the Census of Industry and Merchandising Division, and the Agriculture Division. Basic data pertaining to numbers, prices and values of live stock and the production of animal products are collected in the Agriculture Division which has also acted as a co-ordinating agency in the editing of the publication.

PRÉFACE

Le présent rapport est le trente-quatrième d'une série annuelle sur le bétail et les produits animaux au Canada. Le premier volume, paru en 1920, portait sur les années 1909 à 1919 et les volumes subséquents ont maintenu un relevé continu de l'exploitation de l'industrie du bétail au Canada. Des états historiques et sommaires y paraissent pour les années écoulées depuis 1939. Ils contribuent à donner une vue à long terme de l'industrie. Terre-Neuve fait partie de la Confédération depuis le 31 mars 1949; toutefois, dans la plupart des cas les statistiques courantes ne sont pas encore disponibles. Sauf pour les statistiques du commerce extérieur et les estimations de la production et de la consommation de viande au cours des années 1949-1952, toutes les données du présent rapport ne portent que sur les neuf autres provinces. Les estimations du nombre et de la valeur des bestiaux pour la période de 1942 à 1951 et les données connexes telles que pour la production de viande et de laine sont sujettes à révision pour correspondre aux bornes-repères du début et de la fin du recensement.

Les renseignements ont été recueillis de divers services du gouvernement fédéral. Le Service des marchés et le Service de la production du ministère de l'Agriculture ont fourni les relevés des livraisons commerciales et des abatages inspectés et la Commission des transports, les données relatives au tarif de transport des marchandises. Leur précieuse collaboration est vivement appréciée. Au Bureau de la statistique, les renseignements sur l'industrie du bétail sont dépourvus par la Division du travail et des prix, la Division du recensement de l'industrie et du commerce et la Division de l'agriculture. Les données fondamentales relatives au nombre, aux prix, à la valeur du bétail et aux produits animaux sont recueillies par la Division de l'agriculture, qui agit en qualité d'organisme de coordination pour la publication de ce rapport.

1. Prices from 1890 to 1918 are taken from the *Toronto Globe*; from 1890 to 1910 they are averages of quotations on the first market day of each month and from 1911 to 1918 averages of quotations on the first market day of each week. From 1919 to 1952 prices are weighted averages compiled by the Dominion Department of Agriculture. From 1890 to 1939 prices are on a live basis and from 1940 to 1952 on a dressed basis. Until 1934 all hogs were graded alive; in that year carcass grading was inaugurated and in October, 1940, live grading was discontinued. The price per cwt. of dressed hogs is approximately $\frac{1}{3}$ that of live hogs. — Les prix de 1890 à 1918 ont été extraits du *Toronto Globe*; ceux de 1890 à 1910 sont les moyennes des cotés le premier jour de marché de chaque mois et de 1911 à 1918 ils sont les moyennes des cotés le premier jour de marché de chaque semaine. De 1919 à 1952, les prix sont les moyennes pondérées compilées par le ministère fédéral de l'Agriculture. De 1890 à 1939 les prix sont pour les animaux sur pieds et de 1940 à 1952 ils sont pour les animaux habillés. Jusqu'à 1934 tous les porcs étaient classés vivants; la même année le classement des carcasses a été inauguré et en octobre 1940, le classement des animaux vivants a été discontinué. Le prix par cwt des porcs habillés est d'environ $\frac{1}{3}$ fois celui des porcs vivants.

TABLEAU 94. Viandes et saindoux: Consommation au Canada, 1949-1952, et moyennes quinquennales 1935-1939

Note. All meats other than canned are on basis of cold dressed carcass weight; canned meats are in terms of product except in the summary calculation for all meats where they have been converted to fresh equivalent. Figures for the years 1935-1948 will be found at pp. 70-73 of *Live Stock and Animal Products Statistics, 1949*. Data for 1952 are based on information obtained from the Census of 1951 and data for the years 1942-1951 are being revised in line with census figures. Pending completion of revisions, estimates for the period 1942-1951 are not fully comparable with those of 1952.

Nota. Toute la viande autre qu'en boîte est sur la base du poids de la carcasse froide habillée; la viande en boîte est donnée comme produit excepté dans le calcul sommaire pour toute viande où elle a été convertie en l'équivalent de viande fraîche. Les chiffres pour les années 1935-1948 paraissent aux pp. 70-73 de *Statistique du bétail et des produits animaux, 1949*. Les chiffres de 1952 sont basés sur les renseignements tirés du recensement de 1951 et ceux des années 1942-1951 sont actuellement révisés d'après les données du recensement. D'ici la révision complète, les estimations pour la période 1942-1951 ne peuvent se comparer entièrement avec celles de 1952.
