PREFACE

This report is the forty fourth in an annual series covering livestock and animal products in Canada. The first volume, issued in 1920, covered the years 1909 to 1919 and subsequent volumes have maintained a continuous annual record of the operations of the livestock industry in Canada. Some historical and summary statements have been included to afford a long-time view of the industry. Newfoundland entered Confederation March 31, 1949, but, for the most part, current statistical data for Newfoundland are not available. Except for external trade statistics and estimates of meat production and consumption for the years 1949-1962, all data in this report refer to the other nine provinces only.

Historical tables of the semi-annual estimates of livestock numbers on farms and annual estimates of meat and wool production, for which the Census of Agriculture provides benchmark data, have been revised for the period between the 1956 and 1961 Censuses. A revision symbol indicates changes from previously published data in all appropriate tables of this volume.

Information has been assembled from various departmental sources. Commercial marketing and inspected slaughter of livestock are as reported by Production and Marketing Branch of the Department of Agriculture. Freight rate data relating to rail movement of livestock and meat was supplied by the Board of Transport Commissioners. Within the Dominion Bureau of Statistics information on the livestock industry is compiled by the Prices Division, the Industry and Merchandising Division, the International Trade Division, and the Agriculture Division. Basic data pertaining to numbers, prices and value of livestock and the production of animal products are compiled in the Agriculture Division, which is the co-ordinating agency in the editing of the publication.

Dominion Statistician.

PRÉFACE

Le présent rapport est le quarante quatrième rapport annuel sur le bétail et les produits animaux au Canada. Le premier volume, paru en 1920, portait sur les années 1909 à 1919. Les volumes subséquents constituent un relevé ininterrompu de l'industrie du bétail au Canada. Des états historiques et sommaires y paraissent qui contribuent à donner une vue à long terme de l'industrie. Terre-Neuve fait partie de la Confédération depuis le 31 mars 1949; toutefois, dans la plupart des cas, les statistiques courantes ne sont pas encore disponibles. Sauf pour les statistiques du commerce extérieur et les estimations de la production et de la consommation de viande au cours des années 1949-1962, toutes les données du présent rapport ne portent que sur les neuf autres provinces.

Les tableaux chronologiques et les estimations semestrielles relatifs au nombre de bestiaux dans les fermes ainsi que les estimations quant à la production de viande et de laine, dont le recensement de l'agriculture donne les chiffres de base, ont été révisés pour la période intercensale de 1956 à 1961. Un signe conventionnel de révision indique les changements au regard des chiffres publiés antérieurement dans tous les tableaux appropriés du volume.

Les renseignements proviennent de divers ministères. Les livraisons commerciales et les abatages inspectés de bestiaux sont ceux déclarés par le Service de la production et des marchés du ministère de l'Agriculture. La Commission des transports a fourni les données relatives au tarif de transport des bestiaux et de la viande. Au Bureau de la statistique, les renseignements sur l'industrie du bétail sont compilés par la Division des prix, la Division de l'industrie et du commerce, la Division du commerce international, et la Division de l'agriculture. Les données fondamentales relatives au nombre, aux prix, à la valeur du bétail et aux produits animaux sont recueillies par la Division de l'agriculture qui est l'organisme qui co-ordonne la publication de ce rapport.

WALTER E. DUFFETT,
Statisticien du Dominion.

N.B. Prices from 1890 to 1918 are taken from the *Toronto Globe*; from 1890 to 1910 they are averages of quotations on the first market day of each month and from 1911 to 1918 averages of quotations on the first market day of each week. From 1919 to 1962 prices are weighted averages compiled by the Canada Department of Agriculture. From 1890 to 1939 prices are on a live basis and from 1940 to 1962 on a dressed basis. Until 1934 all hogs were graded alive; in that year carcass grading was inaugurated and in October, 1940, live grading was discontinued. The price per cwt. of dressed hogs is approximately 1 1/4 that of live hogs.

N.B. Les prix de 1890 à 1918 ont été extraits du *Toronto Globe*; ceux de 1890 à 1910 sont les moyennes des cotes le premier jour de marché de chaque mois et de 1911 à 1918 ils sont les moyennes des cotes le premier jour de marché de chaque semaine. De 1919 à 1962 les prix sont les moyennes pondérées calculées par le ministère fédéral de l'Agriculture. De 1890 à 1939 les prix sont pour les animaux sur pieds et de 1940 à 1962 ils sont pour les animaux habillés. Jusqu'à 1934 tous les porcs étaient classés vivants; la même année le classement des carcasses a été inauguré et en octobre 1940, le classement des animaux vivants a été discontinué. Le prix par cwt. des porcs habillés est d'environ 1 1/4 fois celui des porcs vivants.

N.B. Prices from 1890 to 1921 are taken from the *Toronto Globe*; from 1890 to 1910 they are averages of quotations on the first market day of each month, for 1911 and 1912, averages of quotations on the first market day of each week, and from 1913 to 1921 averages of monthly quotations. From 1922 to 1962 prices are weighted averages compiled by the Canada Department of Agriculture.

N.B. Les prix de 1890 à 1921 ont été extraits du *Toronto Globe*; ceux de 1890 à 1910 sont les moyennes des cotes le premier jour de marché de chaque mois, de 1911 à 1912, les moyennes des cotes le premier jour de marché de chaque semaine et de 1913 à 1921, les moyennes des cotes mensuelles. De 1922 à 1962 les prix sont les moyennes pondérées calculées par le ministère fédéral de l'Agriculture.
