FUR PRODUCTION, SEASON 1958-1959

PRODUCTION DE FOURRURES, SAISON 1958-1959

The wildlife pelt production and value statistics included in this report are as supplied by branches or agencies of the various provincial and territorial governments which compile statistics for their respective areas on the basis of royalty payments, export taxes etc. Where such facilities for collection of statistics locally do not exist, as in Prince Edward Island, data on purchases of pelts originating there are solicited from individual fur dealers.

Certain species of animals are not subject to royalty or other pelt taxes in some provinces and production is not recorded and consequently not covered in this publication. For instance, information on squirrel pelt production in Ontario is not available and therefore the Ontario and Canada data on squirrel are incomplete. Other pelts not completely accounted for are: bear, rabbit and wolf.

Data on fur farm pelt production included in this report generally relate to the previous calendar year rather than the wildlife fur year ending June 30 and are covered in greater detail in the *Report on Fur Farms*, catalogue number 23-208. It should be noted that while great effort is made to obtain replies from all fur farms in an annual census of the industry, it is never possible to achieve this result fully in all provinces. Therefore the data reported are partially estimated. Fur farms other than chinchilla are licensed in most provinces and provincial departments provide a complete mailing list based on licenses issued. Some provinces also license chinchilla producers but notable exceptions are Ontario, Manitoba, New Brunswick and Prince Edward Island. Where license lists are not available lists of producers are obtained from other sources but are less complete. Therefore, it must be noted that data on chinchilla are likely to be less complete than for other animals raised on fur farms. Average values for pelts produced on fur farms are calculated from reports submitted by fur farmers in a sample survey.

For the fur season 1958-1959 the reported production of wildlife pelts was 4,377,398 compared to 5,490,597 for the season 1957-1958 while the value declined to \$9,707,035 from \$10,549,147. Both the number and value of ranch-raised pelts produced were higher in 1958-1959 than in 1957-1958, the number of pelts increased to 993,182 from 949,722. The value of fur farm

La production et la valeur des fourrures provenant de la chasse, indiquée dans le présent rapport, sont fondées sur les données fournies par les services et les organismes des divers gouvernements provinciaux et territoriaux qui les établissent pour leur propre région d'après le paiement de redevances, taxes d'exportation, etc. Là où, comme dans l'Île-du-Prince-Édouard, il n'existe aucun moyen de réunir cette statistique, les chiffres sont obtenus des marchands de fourrures.

Certaines provinces n'exigent aucune redevance ou autres droits sur les peaux de certaines espèces et n'en enregistrent pas la production, dont, en conséquences, la présente publication ne peut tenir compte. On ignore, par exemple, le nombre de peaux d'écureuils que produit l'Ontario; la statistique de cette province et du Canada sur l'écureuil demeure donc incomplète. Les renseignements sur les peaux d'ours, de lapins et de loups sont également incomplets.

Les données de l'élevage sont celles de l'année civile précédente, plutôt que celles de la saison de chasse, qui se termine le 30 juin. On en trouvera le détail dans le rapport intitulé *Les fermes à fourrure* (no. de catalogue 23-208). À noter que, en dépit de tous les efforts déployés pour obtenir une réponse de chacun des éleveurs, lors du recensement annuel de l'industrie, il n'est jamais possible d'obtenir un résultat complet dans toutes les provinces. Il s'ensuit que certains chiffres ne sont que des estimations. La plupart des provinces émettent des permis d'élevage (sauf dans le cas du chinchilla) et les ministères provinciaux en fournissent la liste complète. Certaines provinces accordent également des permis aux éleveurs de chinchillas mais, à cet égard, l'Ontario, le Manitoba, le Nouveau-Brunswick et l'Île-du-Prince-Édouard sont de notables exceptions. Faute de listes de permis, on se sert de listes incomplètes, qui proviennent d'autres sources. Les données sur le chinchilla sont donc vraisemblablement les moins complètes de toutes. On calcule la valeur moyenne de la production de peaux d'élevage, d'après les rapports d'un relevé-échantillon.

Au cours de la saison 1958-1959, au regard d'un an plus tôt, le produit de la chasse a diminué de 5,490,597 à 4,377,398 peaux et sa valeur, de \$10,549,147 à \$9,707,035. D'une année à l'autre, le nombre et la valeur des peaux d'élevage se sont accrus (993,182 peaux contre 949,722). Sans le myopotame pour lequel on ne possède d'estimation ni pour l'une, ni pour l'autre année, la valeur a

pelts production, exclusive of nutria for which no value estimate was available for either year, at \$16,094,360 for the year 1958-1959 was higher than the value of \$15,785,962 for the year 1957-1958. Ranch-raised pelts equalled 62 per cent of the total value of pelts produced in 1958-1959 compared to 60 per cent in 1957-1958, 57 per cent in 1956-1957, 56 per cent in 1955-1956 and 43 per cent in 1954-1955.

The ten principal kind of pelts taken according to their value in 1958-1959 were: 982,783 ranch mink pelts valued at \$15,968,133; 328,584 beaver pelts at \$3,353,031; 146,453 wild mink pelts at \$2,311,590; 2,171,739 muskrat pelts at \$1,846,277; 1,262,006 squirrel pelts at \$499,238; 26,539 white fox pelts at \$529,886; 15,120 otter pelts at \$348,477; 255,139 ermine pelts at \$246,982; 18,047 marten at \$109,788 and 4,850 fisher at \$84,038.

The value of undressed furs imported during the season 1958-1959 amounted to \$12,257,272 compared to \$10,573,668 in the previous season. Similarly, \$24,436,763 worth of undressed pelts were exported in 1958-1959 compared to \$24,518,859 for the year 1957-1958.

monté de \$15,785,962 à \$16,094,360. Durant l'année 1958-1959, la valeur des peaux d'élevage a égalé 62 p. 100 de la valeur de la production totale (60 p. 100 durant 1957-1958, 57 p. 100 durant 1956-1957, 56 p. 100 durant 1955-1956 et 43 p. 100 durant 1954-1955).

Voici, par ordre de valeur, les dix principales espèces de peaux levées durant 1958-1959: vison d'élevage, 982,783 (\$15,968,133); castor, 328,584 (\$3,353,031); vison sauvage, 146,453 (\$2,311,590); rat musqué, 2,171,739 (\$1,846,277); écureuil, 1,262,006 (\$499,238); renard blanc, 26,539 (\$529,886); loutre, 15,120 (\$348,477); hermine, 255,139 (\$246,982); martre, 18,047 (\$109,788) et pékan, 4,850 (\$84,038).

Au cours de la saison 1958-1959, la valeur des importations de peaux non apprêtées s'est élevée à \$12,257,272, au regard de \$10,573,668 un an plus tôt; mais la valeur des exportations n'a été que de \$24,436,763, au regard de \$24,518,859.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not applicable.
- nil or zero.

SIGNES CONVENTIONNELS

Signification des signes utilisés dans les tableaux de la présente publication:

- .. nombres indisponibles.
