VALUE OF RAW FURS PRODUCED IN CANADA—SEASONS 1939—1940 TO 1959—1960

VALEUR DES PEAUX BRUTES PRODUITES AU CANADA—SAISONS 1939—1940 À 1959—1960

# FUR PRODUCTION

## PRODUCTION DE FOURRURES

### SEASON - 1959-1960 - SAISON

The statistics of wildlife pelt production and value included in this report are as supplied by branches or agencies of the various provincial and territorial governments which compile statistics for their respective areas on the basis of royalty payments, export taxes etc. Where such facilities for collection of statistics locally do not exist, as in Prince Edward Island, data on purchases of pelts originating there are solicited from individual fur dealers.

Certain species of animals are not subject to royalty or other pelt taxes in some provinces and production is not recorded and consequently not covered in this publication. For instance, information on squirrel pelt production in Ontario is not available and therefore the Ontario and Canada data on squirrel are incomplete. Other pelts not completely accounted for are: bear, rabbit and wolf.

Data on fur farm pelt production included in this report relate to the previous calendar year rather than the wildlife fur year ending June 30 and are covered in greater detail in the *Report on Fur Farms*, catalogue number 23-008. It should be noted that while great effort is made to obtain replies from all fur farms in an annual census of the industry, it is never possible to achieve this result fully in all provinces. Therefore the data reported are partially estimated. Fur Farms other than chinchilla are licensed in most provinces and provincial departments provide a complete mailing list based on licenses issued. Some provinces also license chinchilla producers but notable exceptions are Ontario, Manitoba, New Brunswick and Prince Edward Island. Where license lists are not available lists of producers are obtained from other sources but are less complete. Therefore, it must be noted that data on chinchilla are likely to be less complete than for other animals raised on fur farms. Average values for pelts produced on fur farms are calculated from reports submitted by fur farmers in a sample survey.

For the fur season 1959-1960 the reported production of wildlife pelts was 4,933,593 compared to 4,377,398 for the season 1958-1959 while the value increased to \$12,360,475 from \$9,707,035. Both the number and value of ranch-raised pelts were higher in 1959-1960 than in 1958-1959, the number of pelts increased to 1,066,705 from 993,133. The value of fur farm pelt

La production et la valeur des fourrures provenant de la chasse, indiquée dans le présent rapport, sont fondées sur les données fournies par les services et les organismes des divers gouvernements provinciaux et territoriaux qui les établissent pour leur propre région d'après le paiement de redevances, taxes d'exportation, etc. Là où, comme dans l'Île-du-Prince-Édouard, il n'existe aucun moyen de réunir cette statistique, les chiffres sont obtenus des marchands de fourrures.

Certaines provinces n'exigent aucune redevance ou autres droits sur les peaux de certaines espèces et n'en enregistrent pas la production, dont, en conséquences, la présente publication ne peut tenir compte. On ignore, par exemple, le nombre de peaux d'écureuils que produit l'Ontario; la statistique de cette province et du Canada sur l'écureuil demeure donc incomplète. Les renseignements sur les peaux d'ours, de lapins et de loups sont également incomplets.

Les données de l'élevage sont celles de l'année civile précédente, plutôt que celles de la saison de chasse, qui se termine le 30 juin. On en trouvera le détail dans le rapport intitulé *Les fermes à fourrure* (no. de catalogue 23-208). A noter que, en dépit de tous les efforts déployés pour obtenir une réponse de chacun des éleveurs, lors du recensement annuel de l'industrie, il n'est jamais possible d'obtenir un résultat complet dans toutes les provinces. Il s'ensuit que certains chiffres ne sont que des estimations. La plupart des provinces émettent des permis d'élevage (sauf dans le cas du chinchilla) et les ministères provinciaux en fournissent la liste complète. Certaines provinces accordent également des permis aux éleveurs de chinchillas mais, à cet égard, l'Ontario, le Manitoba, le Nouveau Brunswick et l'Île-du-Prince-Édouard sont de notables exceptions. Faute de listes de permis, on se sert de listes incomplètes, qui proviennent d'autres sources. Les données sur le chinchilla sont donc vraisemblablement les moins complètes de toutes. On calcule la valeur moyenne de la production de peaux d'élevage, d'après les rapports d'un relevé-échantillon.

Au cours de la saison 1959-1960, au regard d'un an plus tôt, le produit de la chasse a augmenté de 4,377,398 à 4,933,593 peaux et sa valeur, de \$9,707,035 à \$12,360,475. D'une année à l'autre, le nombre et la valeur des peaux d'élevage se sont accrus (1,066,705 peaux contre 993,133). Sans le myopotame pour lequel on ne possède d'estimation ni pour l'une, ni pour l'autre année, la valeur a monté

## FUR PRODUCTION

production, exclusive of nutria, for which no value estimate was available for either year, increased to \$18,842,976 from \$16,093,520 for the previous year. Ranch-raised pelts equalled 60 per cent of the total value of pelts produced in 1959-1960, compared to 62 per cent in 1958-1959, 60 per cent in 1957-1958, 57 per cent in 1956-1957 and 56 per cent in 1955-1956.

The ten principal kind of pelts taken according to their value in 1959-1960 were 1,054,741 ranch mink pelts valued at \$18,715,582; 344,766 beaver pelts at \$4,732,573; 169,631 wild mink pelts at \$2,948,404; 1,562,617 muskrat pelts at \$1,303,661; 2,241,771 squirrel pelts at \$1,032,937; 40,408 lynx pelts at \$704,613; 15,296 otter pelts at \$384,953; 14,457 white fox pelts at \$353,366; 276,111 ermine pelts at \$268,612 and 29,226 marten pelts at \$194,374. These accounted for 98.2 per cent of the total value of pelts produced.

The value of undressed furs imported during the season 1959-1960 amounted to \$11,110,356 compared to \$10,573,668 in the previous season. Similarly, \$25,690,188 worth of undressed pelts were exported in 1959-1960 compared to \$24,518,859 for the year 1958-1959.

de \$16,093,520 à \$18,842,976. Durant l'année, 1959-1960, la valeur des peaux d'élevage à égalé 60 p. 100 de la valeur de la production totale 62 p. 100 durant 1958-1959, 60 p. 100 durant 1957-1958, 57 p. 100 durant 1956-1957 et 56 p. 100 durant 1955-1956.

Voici par ordre de valeur, les dix principales espèces de levées durant 1959-1960 vison d'élevage 1,054,741 (\$18,715,582); castor, 344,766 (\$4,732,573); vison sauvage, 169,631 (\$2,948,404); rat musqué, 1,562,617 (\$1,303,661); écureuil, 2,241,771 (\$1,032,937); lynx, (loup-cervier) 40,408 (\$704,613); loutre, 15,296 (\$384,953); renard blanc, 14,457 (\$353,366); hermine 276,111 (\$268,612) et martre, 29,226 (\$194,374). Celles-ci ont compté pour 98.2 p. 100 de la valeur des peaux produites.

Au cours de la saison 1959-1960, la valeur des importations de peaux non apprêtées s'est élevée à \$11,110,356, au regard de \$10,573,668 un an plus tôt; et la valeur des exportations à été de \$25,690,188 au regard de \$24,518,859.

## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

## SIGNES CONVENTIONNELS

Signification des signes utilisés dans les tableaux de la présente publication:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
