VALUE OF RAW FURS PRODUCED IN CANADA—SEASONS 1944-1945 TO 1961-1962

VALEUR DES PEAUX BRUTES PRODUITES AU CANADA—SAISONS 1944-1945 À 1961-1962

# FUR PRODUCTION

## PRODUCTION DE FOURRURES

SEASON - 1961-62 - SAISON

The statistics of wildlife pelt production and value included in this report are supplied by branches or agencies of the various provincial and territorial governments which compile statistics for their respective areas on the basis of royalty payments, export taxes, etc. Where such facilities for collection of statistics locally do not exist as in Prince Edward Island, data on purchases of pelts originating there are solicited from individual fur dealers.

Certain species of animals are not subject to royalty or other pelt taxes in some provinces and production is not recorded and consequently not covered in this publication. For instance, information on squirrel pelt production in Ontario is not available and therefore the Ontario and Canada data on squirrel are incomplete. Other pelts not completely accounted for are: bear, rabbit and wolf.

Data on fur farm pelt production included in this report relate to the previous calendar year rather than the wildlife fur year ending June 30 and are covered in greater detail in the "Report on Fur Farms", Catalogue No. 23-208. It should be noted that while great effort is made to obtain replies from all fur farms in an annual census of the industry, it is never possible to achieve this result fully in all provinces or for all the various species of animals kept on fur farms. Mink and fox farms are licensed in all provinces except Prince Edward Island and New Brunswick and provincial departments provide a complete mailing list based on licenses issued. Some provinces also license chinchilla producers but notable exceptions are Ontario, Manitoba, New Brunswick and Prince Edward Island, however, the coverage of these farms through listings obtained from other sources appears to be reasonably complete. There is some evidence to indicate that nutria production has been expanding in Ontario but since the production is not licensed by the province it has been difficult to obtain complete lists of producers. Continuing efforts are being made to obtain more adequate coverage and thus complete data on nutria production for this province.

Average values of pelts produced on fur farms are calculated from reports submitted in annual sample surveys. In 1960 and 1961 these surveys did not yield sufficient information to establish prices for fox and nutria pelts. In order to arrive at a value of total pelt production, prices

La production et la valeur des fourrures provenant de la chasse, indiquée dans le présent rapport, sont fondées sur les données fournies par les services et les organismes des divers gouvernements provinciaux et territoriaux qui les établissent pour leur propre région d'après le paiement de redevances, taxes d'exportation, etc. Là où, comme dans l'Île-du-Prince-Édouard, il n'existe aucun moyen de réunir cette statistique, les chiffres sont obtenus des marchands de fourrures.

Certaines provinces n'exigent aucune redevance ou autres droits sur les peaux de certaines espèces et n'en enregistrent pas la production, dont, en conséquences, la présente publication ne peut tenir compte. On ignore, par exemple, le nombre de peaux d'écureuils que produit l'Ontario: la statistique de cette province et du Canada sur l'écureuil demeure donc incomplète. Les renseignements sur les peaux d'ours, de lapins et de loups sont également incomplets.

Les données de l'élevage sont celles de l'année civile précédente, plutôt que celles de la saison de chasse, qui se termine le 30 juin. On en trouvera le détail dans le rapport intitulé les fermes à fourrure (numéro de catalogue 23-208). A noter qu'en dépit de tous les efforts déployés pour obtenir une réponse de chacun des éleveurs lors du recensement annuel de l'industrie, il n'est jamais possible d'aboutir à un résultat complet dans toutes les provinces, ni d'obtenir des données à l'égard de toutes les espèces d'animaux gardés dans les fermes d'élevage. Toutes les provinces, sauf l'Île-du-Prince-Édouard et le Nouveau-Brunswick, émettent des permis d'élevage du vison et du renard, et les ministères provinciaux fournissent une liste postale complète des permis délivrés. Certaines provinces accordent aussi des permis aux éleveurs de chinchillas, mais l'Ontario, le Manitoba, le Nouveau-Brunswick et l'Île-du-Prince-Édouard sont, à cet égard, de notables exceptions; cependant, la liste de ces fermes, que l'on obtient d'autres sources, paraît être assez complète. La production de nutria en Ontario se serait accrue, mais comme la province n'accorde pas de permis pour ce genre d'élevage, il a été difficile d'obtenir la liste complète des éleveurs. Les efforts se poursuivent en vue d'obtenir des résultats plus complets et pour compléter les données sur la production de nutria dans cette province.

Les calculs de la valeur moyenne de la production de peaux d'élevage se fondent sur les rapports de relevés-échantillons annuels. En 1960 et 1961 l'insuffisance des renseignements obtenus lors de ces enquêtes n'a pas permis d'établir les prix des peaux de renards et de nutrias. Pour obtenir la valeur

per pelt, for fox and nutria were estimated at \$10.00 and \$2.00 respectively for both years. The sample survey schedules were revised in 1961 to eliminate selling commissions, dressing charges and association fees from the prices reported. Since such selling and handling charges may not have been completely taken into consideration in calculating average value to the producers in 1960 the prices for the two years are not fully comparable.

For the fur season 1961-62 the reported production of wildlife pelts was 4,474,413 compared to 5,019,260 for the season 1960-61 while the value declined to \$10,358,341 from \$11,703,797. The number of ranch-raised fur bearing animals pelleted was 1,285,406 compared to 1,218,100 a year earlier. The value of fur farm pelt production increased to \$18,580,019 from \$17,033,290. Mink accounted for 99.1 per cent of the value of fur farm production and fur farm production accounted for 64.2 per cent of total production.

The ten principal kinds of pelts taken according to their total value in 1961-62 were: ranch mink, 1,269,050 pelts valued at \$18,405,102; beaver, 386,823 pelts at \$4,249,632; wild mink, 147,011 pelts at \$1,992,629; muskrat, 1,524,363 pelts at \$1,334,229; squirrel, 1,869,940 pelts at \$681,969; (excluding Ontario); white fox, 45,358 pelts at \$534,907; lynx, 47,625 pelts at \$448,052; otter, 17,202 pelts at \$387,371; marten, 36,102 pelts at \$201,809 and ermine, 148,714 pelts at \$135,288. These accounted for 98.1 per cent of the total value of pelts produced.

The value of undressed furs exported during the season 1961-62 amounted to \$25,667,233 compared to \$22,991,263 in the previous season. Similarly, \$19,907,278 worth of undressed pelts were imported in 1961-62 compared to \$16,942,758 for the year 1960-61.

#### SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

#### SIGNES CONVENTIONNELS

Signification des signes utilisés dans les tableaux de la présente publication:

- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.

de la production totale on a évalué, respective-  
à \$10 et \$2, pour les deux années, le prix de la peau  
de chacun de ces animaux. En 1961, on a revu les  
questionnaires des relevés-échantillons afin d'en  
exclure la commission du vendeur, les frais d'apprétiage  
et les cotisations des associations. Comme il se  
peut que l'on n'ait pas totalement tenu compte de  
ces frais de vente et de manutention dans le calcul  
de la valeur moyenne au producteur en 1960, les  
prix des deux années ne peuvent se comparer intégralement.

Au cours de la saison 1961-1962 le produit de la chasse s'est établi à 4,474,413 peaux, au regard de 5,019,260 la saison précédente, mais la valeur a baissé de \$11,703,797 à \$10,358,341. Le nombre de peaux d'élevage a été de 1,285,406, contre 1,218,000 un an plus tôt. La valeur de la production a augmenté de \$17,033,290 à \$18,580,019. Le vison a répondu pour 99.1 p. 100 de la valeur des peaux d'élevage, et les fermes d'élevage ont produit 64.2 p. 100 du rendement total.

Voici, par ordre de valeur, les dix principales espèces de peaux levées en 1961-1962: vison d'élevage, 1,269,050 (\$18,405,102); castor, 386,823 (\$4,249,632); vison sauvage 147,011 (\$1,992,629); rat musqué, 1,524,363 (\$1,334,229); écureuil, 1,869,940 (\$681,969); (sauf l'Ontario); renard blanc, 45,358 (\$534,907); lynx (loup cervier), 47,625 (\$448,052); loutre, 17,202 (\$387,371); martre, 36,102 (\$201,809) et hermine, 148,714 (\$135,288). Celles-ci ont contribué 98.1 p. 100 de la valeur des peaux produites.

Au cours de la saison 1961-1962, la valeur des exportations de peaux non apprêtées s'est élevée à \$25,667,233, au regard de \$22,991,263 la saison précédente, et la valeur des importations a été de \$19,907,278, contre \$16,942,758.
