## INTRODUCTION

For the 1980-81 fur season the value of pelts was \$119,390,381 down 10.2% from the 1979-80 level. The value of wildlife pelts sold during the season 1980-81 amounted to \$72,011,315 or 60% of the total value. The value of fur farm pelt production decreased to \$47,379,066 from \$48,039,708.

Data on wildlife pelt production included in this report are supplied by the various provincial and territorial governments which compile statistics for their respective areas on the basis of royalty payments, export taxes, etc. Where such facilities for collection of statistics locally do not exist, data on purchase of pelts are solicited from fur dealers, etc.

Data on fur farm pelt production included in this report relate to the previous calendar year rather than the wildlife fur year ending June 30 and are covered in greater detail in the Report on Fur Farms (Catalogue 23-208). This information except for prices, is obtained from an annual census of the fur farm industry. Mink and fox farms are licensed in all provinces except Prince Edward Island and New Brunswick and provincial departments provide mailing lists based on licenses issued.

Ranch mink pelt price data are obtained from Canada Mink Breeders Association, for Canada as a whole; therefore, they do not reflect differences in pelt values between provinces.

The value of undressed fur exported during the 1980-81 season decreased to \$134,808,000 from \$178,574,000 in the previous season. Imports increased from \$140,236,000 to \$152,163,000.

## INTRODUCTION

La valeur des fourrures de la saison 1980-81 s'établit à \$119,390,381 une diminution de 10.2% du niveau atteint en 1979-80. La valeur des peaux de gibier à fourrure de la saison 1980-81 s'élève à \$72,011,315 soit 60% de la valeur totale. La valeur de la production des peaux d'élevage a diminué de \$48,039,708 à \$47,379,066.

Les données sur la production de fourrures provenant d'animaux sauvages, figurant dans la présente publication proviennent des services et organismes des gouvernements provinciaux et territoriaux qui les établissent pour leurs régions respectives en fonction du paiement des redevances, des taxes à l'exportation, etc. Lorsqu'il n'existe aucun moyen de recueillir la statistique dans la région, les chiffres relatifs aux achats de fourrures sont obtenus des négociants en fourrures et autres.

Les données de cette publication sur la production de fourrures dans les fermes d'élevage sont celles de l'année civile précédente plutôt que la saison des fourrures close le 30 juin. Ces données sont plus détaillées dans le Rapport sur les fermes à fourrures (n° 23-208 au catalogue). Les renseignements, sauf dans le cas des prix, sont tirés d'un recensement annuel de l'industrie. Toutes les provinces, sauf l'Île-du-Prince-Édouard et le Nouveau-Brunswick, accordent des permis aux exploitants de fermes de vison et de renard, et les ministères fournissent des listes d'adresses fondées sur le nombre de permis délivrés.

Les données sur les prix des peaux des fermes de visons sont obtenues de l'Association canadienne des éleveurs de vison pour l'ensemble du Canada, et ne peuvent donc pas indiquer les écarts de valeur des fourrures entre les provinces.

La valeur des peaux brutes exportées au cours de la saison 1980-81 a diminué à \$134,808,000 de \$178,574,000 qu'elle était la saison précédente. Les importations ont augmenté de \$140,236,000 à \$152,163,000.
