INTRODUCTION

Beginning with the February issue of this publication, our coverage of establishments freezing fish and storing frozen fishery products was revised. This was a result of a survey made in 1955 on the Cold Storage Facilities for fish and of a subsequent analysis of special reports obtained in 1956. A number of establishments storing small amounts of fish were eliminated from our reporting list, whenever the amounts involved from month to month did not significantly alter the provincial or regional picture. On the other hand some establishments not previously reporting were added, resulting in a net increase in the number incorporated into this report.

Figures of stocks in this publication (Table 1) refer to the same establishments in both years and are therefore comparable. Reference to figures previously published for 1956 will indicate that our volume coverage was increased. We attempt to cover approximately ninety-eight per cent of the Canadian totals and about ninety-five per cent or more within each province or area.

Cumulative freezings (Table 2) are not strictly comparable, because the January figures incorporated into the totals could not be revised for 1956.

EXPLANATION OF SYMBOLS

- Nil
- (X) Less than three firms reporting this item. The figures, therefore, cannot be shown separately, but are included under "Unclassified."

COLD STORAGE HOLDINGS OF FISH - OCTOBER 31, 1957

The total reported stocks of frozen fish were 73.8 million pounds at the end of October, a decline of 17 per cent compared with 1956. Bait, cod fillets, Pacific salmon and halibut were the main species contributing to the decrease.

The freezings of fishery products dropped by 18 per cent compared with October of the preceding year and the cumulative freezings for the period January-October were 3 per cent less this year than in 1956. Most significant was the decline in Pacific salmon freezings in the current year.

Fresh-Frozen Sea Fish -

The stocks of fresh-frozen sea fish fell by 13 per cent to 47.6 million pounds from 53.8 million in the preceding year. The stocks of groundfish fillets (including blocks) declined by 20 per cent to 20.2 million pounds from 25.2 million in 1956. Most significant was the drop in the holdings of the ordinary cod fillets. The inventories of Pacific halibut and salmon were also substantially less than a year ago.

The holdings of fresh-frozen sea fish dropped substantially in Newfoundland and Quebec, but remained at about the same level as last year in the Maritimes and British Columbia.

Freshwater Species, Smoked Fish and Bait -

The stocks of the freshwater species, at 9.4 million pounds, were virtually unchanged in total from those of 1956. Those of smoked products climbed by 27 per cent to 3.0 million pounds from 2.4 million last year, finnan haddies and kippered herring being the two major products held in greater amounts. Most significant was the drop in bait holdings by 50 per cent to 7.7 million pounds from 15.4 million.

Freezings of Fish

The freezings of fish in October were reported at 15.6 million pounds, a decline of 18 per cent compared with the same month of 1956. The most significant change applied to the Pacific salmon which fell to 627,000 pounds from 2,408,000 a year ago. Bait freezings also decreased to 2.5 million pounds from 3.8 million in 1956. The frozen groundfish fillets, at 9.0 million pounds, were virtually the same as those of the same month of the preceding year.

Cumulative freezings for the period January-October, at 205.0 million pounds were about 3 per cent less than for the previous year. A substantial decline was shown in the freezings of Pacific salmon and bait; however this was partially offset by increased freezings of groundfish fillets, inland species and various products.

N.B. - This report is compiled from schedules submitted by 274 firms. However, 6 of these establishments have failed to report on time for October 1957.
