Price \$2.00 a year

Vol. 40, No. 6

INTRODUCTION

Beginning with the February issue of this publication, our coverage of establishments freezing fish and storing frozen fishery products was revised. This was a result of a survey made in 1955 on the Cold Storage Facilities for fish and of a subsequent analysis of special reports obtained in 1956. A number of establishments storing small amounts of fish were eliminated from our reporting list, whenever the amounts involved from month to month did not significantly alter the provincial or regional picture. On the other hand some establishments not previously reporting were added, resulting in a net increase in the number incorporated into this report.

Figures of stocks in this publication (Table 1) refer to the same establishments in both years and are therefore comparable. Reference to figures previously published for 1956 will indicate that our volume coverage was increased. We attempt to cover approximately ninety-eight per cent of the Canadian totals and about ninety-five per cent or more within each province or area.

Cumulative freezings (Table 2) are not strictly comparable, because the January figures incorporated into the totals could not be revised for 1956.

EXPLANATION OF SYMBOLS

- Nil
- (X) Less than three firms reporting this item. The figures, therefore, cannot be shown separately, but are included under "Unclassified."

COLD STORAGE OF FISH - JUNE 30, 1957

The total reported stocks of frozen fish were 57.9 million lb. at the end of June, 9 per cent higher than last year. The increase is mainly accounted for by heavier inventories in both sea and freshwater species.

The freezings of fishery products in June increased by 6 per cent from 27.6 million lb. in 1956 to 29.3 million in the current year.

Fresh-Frozen Sea Fish -

The inventories of fresh-frozen sea fish, at the end of June, increased by 6 per cent to 34.3 million lb. from 32.4 million a year ago. The stocks of dressed halibut rose to 10.6 million lb. from 9.7 million in the preceding year; those of Pacific salmon rose to 4.2 million lb. from 1.9 million.

Freshwater Species and Smoked Fish -

The stocks of fresh-frozen freshwater species rose to 6.6 million lb. from 3.5 million in the preceding year. The main species held in greater amounts were Perch and Whitefish.

The inventories of frozen-smoked fish had a slight rise to 2.9 million lb. from 2.6 million in the preceding year. However, the stocks of bait and animal foods decreased by 4 per cent from 14.6 million lb. in 1956 to 14.0 million in the current year.

Freezings of Fish -

The freezings of fish were reported at 29.3 million lb. in June against 27.6 million lb. for the same month in 1956. The freezings of groundfish fillets, at 16.2 million lb. were almost 3 million lb. or 20 per cent greater than in the preceding year. The cumulative freezings to date was 99.4 million lb. against 94.8 million for the same period in 1956 a rise of 5 per cent.
