Price \$2.00 a year

Vol. 40, No. 8

INTRODUCTION

Beginning with the February issue of this publication, our coverage of establishments freezing fish and storing frozen fishery products was revised. This was a result of a survey made in 1955 on the Cold Storage Facilities for fish and of a subsequent analysis of special reports obtained in 1956. A number of establishments storing small amounts of fish were eliminated from our reporting list, whenever the amounts involved from month to month did not significantly alter the provincial or regional picture. On the other hand some establishments not previously reporting were added, resulting in a net increase in the number incorporated into this report.

Figures of stocks in this publication (Table 1) refer to the same establishments in both years and are therefore comparable. Reference to figures previously published for 1956 will indicate that our volume coverage was increased. We attempt to cover approximately ninety-eight per cent of the Canadian totals and about ninety-five per cent or more within each province or area.

Cumulative freezings (Table 2) are not strictly comparable, because the January figures incorporated into the totals could not be revised for 1956.

EXPLANATION OF SYMBOLS

- Nil
- (X) Less than three firms reporting this item. The figures, therefore, cannot be shown separately, but are included under "Unclassified."

COLD STORAGE HOLDINGS OF FISH - AUGUST 31, 1957

The total reported stocks of frozen fish were 77.4 million pounds at the end of August, a decline of 3 per cent compared with 1956. Pacific salmon, halibut and whitefish were held in greater amounts this year than last, but this was more than offset by smaller stocks of groundfish fillets and of bait fish.

The freezings of fishery products in August were down by 3 per cent compared with 1956, the groundfish fillets declining by 9 per cent. However, the cumulative freezings from the beginning of the year were virtually unchanged compared with the past year.

Fresh-Frozen Sea Fish -

The stocks of fresh-frozen sea fish declined by 3 per cent, to 50.9 million pounds from 52.3 million in 1956. The groundfish fillets declined by 14 per cent, to 23.4 million pounds from 27.4 million a year ago. However, this was partially offset by increased holdings of salmon and halibut from the West Coast. Salmon and halibut (dressed) stocks were respectively 19 per cent and 12 per cent higher than in 1956.

The holdings of fresh-frozen sea fish declined substantially in the province of Newfoundland, to 6.5 million pounds from 10.9 million a year ago. However, this was partially offset by higher inventories in other areas, mainly British Columbia.

Freshwater Species and Smoked Fish -

The stocks of fresh-frozen freshwater species increased by 24 per cent, to 8.0 million pounds from 6.4 million. The main species contributing to the increase was whitefish. The stocks of whitefish were 2.4 million pounds, against 1.5 million in 1956.

The inventories of smoked fish were slightly higher than in 1956 but those of bait declined by 29 per cent, to 7.8 million pounds from 11.0 million a year ago.

Freezings of Fish -

The freezings of fish in August were reported at 32.5 million pounds, a decline of 3 per cent compared with the same month of 1956. The freezings of groundfish fillets, at 18.2 million pounds were 9 per cent or almost 2 million pounds less than a year ago. Cumulative freezings for the first eight months of the year were 165.0 million pounds, only slightly more than last year. It is noteworthy that the cumulative freezings of groundfish fillets (including blocks), at 91.1 million pounds, were virtually the same as in the past year.
