Fisheries Section

C O N T E N T S

Starting with this issue, our report known as "COLD STORAGE HOLDINGS OF FISH" is entitled "FISH FREEZINGS AND STOCKS". The tables included in this report were recasted to give information on fish freezings on an area basis as well as in total. It is noteworthy that Table 1, for Canada, is more detailed on products than the subsequent ones by areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

	<u>Page</u>
Table 1. Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2. Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3. Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4. Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5. Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6. Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8
Table 7. Freezings and Stocks of Frozen Fishery Products, British Columbia	10

EXPLANATION OF SYMBOLS

- nil
- less than 500 or negligible
- less than three firms reporting (and figures included under "n.o.p." or "other").
- p preliminary

LOW STOCKS OF FROZEN FISH AT JANUARY 31, 1958

The frozen fish stocks, at January 31, showed a substantial drop compared with those of a year ago. They were reported at 42,712,000 pounds, against 65,810,000 at the end of 1956, thus showing a decline of 35 per cent. Edible products - i.e. excluding bait and animal foods - were down by 31 per cent to 32,889,000 pounds from 47,900,000. Pacific salmon and groundfish fillets from the Atlantic Provinces were frozen in reduced amount during 1957, compared with the preceding year, and this is reflected into the stock level.

Stocks of Fish

The stocks of frozen-fresh sea fish fell by 37 per cent at the end of January to 24,079,000 pounds from 38,316,000 in 1957. Combined figures for groundfish fillets and blocks were down to 10,125,000 pounds, compared with 14,609,000 a year ago, due mainly to reduced holdings of packaged cod and haddock fillets. The stocks of Pacific salmon and halibut were also substantially less than in 1957.

The holdings of the freshwater species fresh-frozen, reported at 5,637,000 pounds, were one million pounds less than a year ago. Perch, pike and sauger were the main species held in smaller amounts. However, partially offsetting the decline, was a rise in the holding of whitefish to 2,035,000 pounds, from 1,174,000 in 1957.

Smoked fish products were reported at 1,751,000 pounds, against 2,029,000 in the previous year. Most significant was the drop in bait holdings to 5,733,000 pounds from 13,423,000.

Freezings of fishery products

Fish freezings in January were up by 15 per cent to 7,953,000 pounds from 6,905,000 during the same month of the preceding year, due mainly to the increased groundfish fillets production on the Atlantic Coast. The packaged or "ordinary" fillets freezings from groundfish for the month were 3,433,000 pounds versus 2,347,000 in the same month of 1956.

Final figures on freezings of fish for the year 1957 are given in this report, with comparative data for the previous year. The freezings of fish and fishery products in 1957 fell by 4.5 per cent to 223,523,000 pounds from 234,072,000 in the preceding year. Those of packaged or "ordinary" groundfish fillets were substantially reduced on the East Coast to 73,872,000 pounds, from 86,886,000 in the previous year. The drop was much more pronounced in the province of Newfoundland than in the other Atlantic provinces. The British Columbia salmon freezings were reported at 9,765,000 pounds, against 14,995,000 in 1956, and this was due to a reduced catch of Chum, Coho and Spring salmon. The Newfoundland bait figure fell to 5,664,000 pounds from 17,245,000 thus substantially affecting totals. Partially offsetting these losses, were increases in the freezings of fish blocks in the Maritime Provinces and Quebec, of the British Columbia halibut, of scallops, etc. Inland species were frozen in similar amounts in the past two years.

N.B. - This report is compiled from schedules submitted by 274 firms. However, four of these establishments failed to report on time for January 1958.
