C O N T E N T S

Starting with January 1958, the tables included in this report (previously "COLD STORAGE HOLDINGS OF FISH") were recasted to give information on fish freezings on an area basis as well as for the whole country. It is noteworthy that Table 1, for Canada, refers to a greater number of products than the subsequent ones for the provinces or areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

	<u>Page</u>
Table 1. Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2. Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3. Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4. Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5. Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6. Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8
Table 7. Freezings and Stocks of Frozen Fishery Products, British Columbia	10

EXPLANATION OF SYMBOLS

- nil
- less than 500 or negligible
- less than three firms reporting (and figures included under "n.o.p." or "other")
- p preliminary

INVENTORIES OF FROZEN FISH, APRIL 1959

There were 38,854,000 pounds of frozen fish on hand on April 30, 1959. This is 14 per cent more than the 33,974,000 pounds in storage at the same date a year ago and five per cent more than was on hand at the end of March. Stocks of frozen fresh sea fish at 22,807,000 pounds were 53 per cent greater than at April 30 last year and 14 per cent larger than those of a month ago. While there was an increase of 29 per cent in the holdings of fresh frozen inland fish since April 1958 there was a decline of 8 per cent since March of this year.

Stocks of Frozen Fish by Products

The holdings of frozen Atlantic cod fillets (including blocks), currently set at 2,781,000 pounds, increased 58 per cent since the end of March when there were 1,756,000 pounds on hand. The supply this month is 43 per cent greater than at the same date in 1958 when there were 1,944,000 pounds on hand. Stocks of haddock fillets, including blocks, also increased substantially during the month and amounted to 6,803,000 pounds at the end of April 1959. The present holdings are 91 per cent greater than those of a month ago and 172 per cent more than at the end of April 1958. Redfish fillets declined 23 per cent since March and the holdings now amount to 712,000 pounds. The inventories this year however are substantially greater than the 424,000 pounds held at the end of April a year ago. The holdings of frozen halibut continue to decline. A drop of 29 per cent since the end of March brings the supply to 2,013,000 pounds. This is 7 per cent less than the 2,158,000 pounds held at the same date in 1958. Pacific salmon stocks now amount to 4,543,000 pounds, some 21 per cent less than was held at the end of March. The present inventories however, are much larger than they were at the end of April 1958 when 2,000,000 pounds were on hand.

Freezings of Fishery Products

Total freezings of fish during the month at 15,289,000 pounds were 11 per cent lighter than they were during April 1958. Since the beginning of the year 43,395,000 pounds were frozen or 10 per cent less than for the same period a year ago. Production of frozen Atlantic cod fillets (including blocks) amounted to 2,252,000 pounds this year compared with 3,887,000 pounds for April 1958. This brings the freezings for the first four months of 1959 to 6,853,000 pounds or one third less than for the same period a year ago. Freezings of haddock fillets (including blocks) on the other hand, rose sharply to 6,883,000 pounds. This is substantially more than was frozen in April 1958 and brings the total for the period January to April to 15,567,000 pounds an increase of 17 per cent over last year. Halibut freezings are also above the 1958 level. April freezings this year amounted to 454,000 pounds compared with 120,000 pounds a year ago. Comparable figures for the first four months of the year are 743,000 pounds and 403,000 pounds respectively. Frozen flatfish fillets production were substantially lower this year. In April freezings amounted to 370,000 pounds compared with 1,039,000 pounds a year ago. Freezings for the first four months of 1959 were 1,842,000 pounds or 32 per cent below the 1958 level.

N.B. - This report is compiled from schedules submitted by 249 firms. However twelve of these establishments failed to report on time for April 30th, 1959.
