FISH FREEZINGS AND STOCKS

JULY 1959

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division

6512-501-79

Price \$2.00 per year

Vol. 42—No. 7

The Queen's Printer and Controller of Stationery, Ottawa, 1959

C O N T E N T S

Starting with January 1958, the tables included in this report (previously "COLD STORAGE HOLDINGS OF FISH") were recasted to give information on fish freezings on an area basis as well as for the whole country. It is noteworthy that Table 1, for Canada, refers to a greater number of products than the subsequent ones for the provinces or areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

	<u>Page</u>
Table 1. Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2. Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3. Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4. Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5. Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6. Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8
Table 7. Freezings and Stocks of Frozen Fishery Products, British Columbia	10

EXPLANATION OF SYMBOLS

- nil
- less than 500 or negligible
- less than three firms reporting (and figures included under "n. o. p." or "other")
- p preliminary

INVENTORY AND PRODUCTION OF FROZEN FISH

Inventories of frozen fish at the end of July amounted to 71,828,000 pounds. This represents an increase of 10 per cent since last month when there were 65,043,000 pounds in storage. Holdings at the same date a year ago were 20 per cent lighter at 59,607,000 pounds. Freezings during July were only slightly heavier than they were a year ago. In total, 38,692,000 pounds were frozen during the past month compared with 38,429,000 pounds. Since January 1959, 145,516,000 pounds of frozen fish were produced compared with 152,219,000 pounds for the same period in 1958.

Inventories

On July 31, there were 51,101,000 pounds of fresh frozen sea fish on hand throughout Canada. This represents an increase in stock of 19 per cent since the end of June and is 23 per cent more than was held on the same date a year ago. Frozen cod fillet stocks (including blocks) rose sharply during the month and amounted to 14,334,000 pounds compared with 8,308,000 pounds at the end of June. Inventories of frozen haddock fillets (including blocks), on the other hand, were slightly lighter than they were a month ago at 6,623,000 pounds compared with 6,692,000 pounds. However, the supply this year is much heavier than it was a year ago when 1,383,000 pounds were on hand. There were only 963,000 pounds of frozen redfish fillets in storage on July 31st which represents a decline of 26 per cent since June and 53 per cent since the end of July a year ago. Inventories of dressed British Columbia halibut rose 14 per cent since June 30 to 13,768,000 pounds. This year's supply is 36 per cent greater than that of a year ago when 10,111,000 pounds were on hand. While sole and other small fish fillet stocks were 18 per cent lighter at the end of July at 1,855,000 pounds than in 1958, inventories rose 21 per cent since last month when 1,531,000 pounds were on hand. Pacific salmon held in storage at the end of July amounted to 4,609,000 pounds or 10 per cent more than at the end of June. There was also slightly more salmon on hand this year than a year ago when 4,451,000 pounds were on hand. Inventories of frozen inland species also increased somewhat during the month from 4,531,000 pounds to 5,025,000 pounds.

Production

During the month of July 38,692,000 pounds of fish were frozen in Canada. This is only slightly more than the 38,429,000 pounds produced during the same month a year ago. For the first seven months of 1959 freezings amounted to 145,516,000 pounds which is 4 per cent less than was produced from January to July in 1958. Production of Atlantic cod fillets, (including blocks) was substantially heavier during the month of July this year. Freezings this year amounted to 19,798,000 pounds compared with 14,286,000 pounds a year ago. Since January, however, the output in 1959 is slightly below the 1958 level at 42,187,000 pounds (42,701,000 pounds). While freezing of haddock fillets (including blocks) during July dropped somewhat below the 1958 level at 734,000 pounds, the output since the beginning of the year is 20 per cent greater at 20,382,000 pounds. July freezings of dressed British Columbia halibut were one third heavier at 3,197,000 pounds than in July 1958 bringing production since January to 15,257,000 pounds (13,815,000 pounds).

N.B. - This report is compiled from schedules submitted by 250 firms. However 13 of these establishments failed to report on time for July 31st; six of these being B.C. firms; three, Ontario; one, New Brunswick; one, Nova Scotia; one, Manitoba and one, Alberta.
