Price \$2.00 per year

Vol. 42—No. 8

C O N T E N T S

Starting with January 1958, the tables included in this report (previously "COLD STORAGE HOLDINGS OF FISH") were recasted to give information on fish freezings on an area basis as well as for the whole country. It is noteworthy that Table 1, for Canada, refers to a greater number of products than the subsequent ones for the provinces or areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

	<u>Page</u>
Table 1. Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2. Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3. Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4. Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5. Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6. Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8
Table 7. Freezings and Stocks of Frozen Fishery Products, British Columbia	10

EXPLANATION OF SYMBOLS

- nil
- less than 500 or negligible
- less than three firms reporting (and figures included under "n. o. p." or "other")
- p preliminary

INVENTORY AND PRODUCTION OF FROZEN FISH

At the end of August, 81,526,000 pounds of frozen fish were held in storage in Canada. Inventories on the same date a year ago amounted to 67,305,000 pounds and at the end of July, to 77,095,000 pounds. Freezings for the month of August at 25,464,000 pounds were 29 per cent lighter than for the same month in 1958. This brings production since the beginning of the year to 172,772,000 pounds or eight per cent below the level of output for the first eight months of 1958.

Inventories

Stocks of frozen fresh sea fish held in storage throughout Canada showed an increase of eight per cent since the end of July. The inventories amounting to 58,422,000 pounds are 25 per cent greater than they were a year ago when 46,757,000 pounds were on hand. Atlantic cod fillets (including blocks) increased from 15,477,000 pounds on July 31 to 19,478,000 pounds at the end of August. This year's stock exceeds that of a year ago by 81 per cent. Holdings of haddock fillets (including blocks) declined 8 per cent during the month to 6,236,000 pounds. However, this year's supply exceeds that of a year ago by 4,888,000 pounds. The inventory of red-fish fillets increased substantially from 1,033,000 pounds at the end of July to 2,293,000 pounds at the end of the current month. The present supplies, however, are only slightly heavier than they were a year ago when 2,247,000 pounds were on hand. Pacific halibut stocks dropped two per cent during the month to 14,344,000 pounds. The holdings this year, however, are well above the 1958 level at the same date when 12,175,000 pounds were on hand. Small flatfish fillet stocks increased slightly since July to 2,033,000 pounds. Holdings, however, are well below those of a year ago when 2,437,000 pounds were on hand. There were 5,447,000 pounds of Pacific salmon on hand at the end of August this year. This is 17 per cent more than the end-of-month stocks for July but 32 per cent less than holdings for August 1958. There were 6,519,000 pounds of frozen fresh inland fish on hand at the end of the current month. A month ago 5,172,000 pounds were on hand while last year 5,832,000 pounds were in storage.

Production

Freezings during August this year were 29 per cent lighter than they were during August 1958. Production during the past month amounted to 25,464,000 pounds to bring the total since the beginning of the year to 172,772,000 pounds. Production for the first eight months of the year is 8 per cent lighter than in the same period a year ago. The August output of frozen fresh sea fish this year is 25 per cent lighter than in 1958 at 20,611,000 pounds (27,572,000 pounds). Production since the beginning of the year, however, has declined only five per cent. Freezing of Atlantic cod fillets (including blocks) amounted to 11,584,000 pounds during August this year compared with 9,911,000 pounds during the same month a year ago. Production since the beginning of the year is four per cent greater than in 1958 during the same period. The August production of haddock fillets (including blocks) was 10 per cent lighter than in 1958 but since the beginning of the year the output was 20 per cent heavier than for the first 8 months last year. August freezings of Pacific halibut are well below the 1958 level at 682,000 pounds (2,580,000 pounds). Pacific salmon is also down sharply at 1,578,000 pounds (5,464,000 pounds) while Pacific halibut freezings for the first 8 months are only 2 per cent lighter than in 1958, salmon is down 49 per cent at 5,549,000 pounds (10,953,000 pounds).

N. B. - This report is compiled from schedules submitted by 250 firms. However, eight of these establishments failed to report in time to be included in this report; one from Prince Edward Island, one from Nova Scotia, two from New Brunswick, one from Quebec, one from Ontario, one from Manitoba and one from British Columbia.
