Price \$2.00 per year

Vol. 43—No. 6

The Queen's Printer and Controller of Stationery, Ottawa, 1960

CONTENTS

Starting with January 1958, the tables included in this report (previously "COLD STORAGE HOLDINGS OF FISH") were recasted to give information on fish freezings on an area basis as well as for the whole country. It is noteworthy that Table 1, for Canada, refers to a greater number of products than the subsequent ones for the provinces or areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

	<u>Page</u>
Table 1. Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2. Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3. Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4. Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5. Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6. Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8

EXPLANATION OF SYMBOLS

- nil
- less than 500 or negligible
- less than three firms reporting (and figures included under "n.o.p." or "other")
- p preliminary

FROZEN FISH, June 1960.

Inventories of frozen fish increased substantially since the end of May and stocks of both sea and fresh water fish now stand at 66,729,000 pounds. Current holdings are two per cent greater than the 65,097,000 pounds held on the same date a year ago. There were 34,702,000 pounds of fish and fish products frozen during the month compared with 36,873,000 pounds during June 1959, a decrease of six per cent. For the first six months of 1960, 105,707,000 pounds were frozen which is one per cent less than was produced during the same period last year.

Stocks of Frozen Fish, by Products

There were 46,199,000 pounds of frozen sea fish products held in storage on the last day of June 1960. This is 28 per cent more than the May inventory of 36,122,000 pounds and eight per cent above the June 1959 stocks of 42,809,000 pounds. There were 12,966,000 pounds of frozen Atlantic cod fillets (including blocks) on hand on the last day of June this year, compared with 8,308,000 pounds on the same date last year. This represents an increase of 56 per cent. At the end of May 1960 there were 8,209,000 pounds in storage. Inventories of frozen haddock fillets (including blocks) decreased almost a million pounds since the end of May and now stand at 6,727,000 pounds. However, the current supply shows little change from that of a year ago when there were 6,695,000 pounds on hand. Stocks of Pacific halibut, including dressed fish, fillets and steaks, on June 30 of this year showed an anticipated increase over the May inventories and now stand at 11,980,000 pounds. This represents an increase of 45 per cent since last month but is six per cent below the 1959 holdings of 12,796,000 pounds. Supplies of small flatfishes, including all flounders and soles, increased substantially during the month and current inventories now stand at 3,898,000 pounds compared with 2,428,000 pounds at the end of May. This represents an increase of 61 per cent. There were only 1,531,000 pounds on hand at the end of June last year. While Pacific salmon supplies are 50 per cent heavier than they were a month ago they are still well below the 1959 level at the same date. There were 1,731,000 pounds on hand on June 30 this year compared with 4,187,000 pounds a year ago. Stocks of fresh water fish were also below the 1959 level at the end of June at 3,141,000 pounds. However, there was a five per cent increase since last month when 2,984,000 pounds were in storage.

Freezings of Fishery Products

Production of frozen fish products during June amounted to 34,702,000 pounds and brings the total for the first six months of the year to 105,707,000 pounds. June freezings are 6 per cent below the 1959 level of 36,873,000 pounds but the total for the period January to June is only one per cent less than that of the same period last year. The output, in June this year of Atlantic cod fillets (including blocks) was 19 per cent greater than that of a year ago and amounted to 11,810,000 pounds. Since January, 24,675,000 pounds have been frozen compared with the 22,389,000 pounds produced in the first six months of 1959. Haddock fillets (including blocks), on the other hand, show a substantial drop from 2,046,000 pounds during June 1959 to 973,000 pounds this year. The reduced output brings the total for the year to date to 13,724,000 pounds or 30 per cent below the 1959 level of 19,651,000 pounds. June freezings of Pacific halibut at 5,266,000 pounds were 29 per cent lighter than those of the same month last year. The output of the year now stands at 11,835,000 pounds compared with 12,845,000 pounds for the first six months of 1959. Production of fillets of flounders and soles during June amounted to 3,752,000 pounds or 37 per cent more than the 1959 total of 2,743,000 pounds. The 1960 output to date stands at 10,084,000 pounds compared with that of last year for the same period of 6,390,000 pounds. Freezings of Pacific salmon for the month of June were 15 per cent lighter than they were a year ago at 1,068,000 pounds. The total for the year now amounts to 1,537,000 pounds (1,795,000 pounds).
