ROGER DUHAMEL, F.R.S.C. Queen's Printer and Controller of Stationery, Ottawa, 1960

CONTENTS

Starting with January 1958, the tables included in this report (previously "COLD STORAGE HOLDINGS OF FISH") were recasted to give information on fish freezings on an area basis as well as for the whole country. It is noteworthy that Table 1, for Canada, refers to a greater number of products than the subsequent ones for the provinces or areas. It is therefore not always possible to obtain from the report all the figures accruing to product totals given in Table 1.

Figures on freezings and on stocks are given in the following combined tables:

		Page
Table 1.	Freezings and Stocks of Frozen Fishery Products, Canada	2
Table 2.	Freezings and Stocks of Frozen Fishery Products, Newfoundland	4
Table 3.	Freezings and Stocks of Frozen Fishery Products, Maritime Provinces	5
Table 4.	Freezings and Stocks of Frozen Fishery Products, Québec	6
Table 5.	Freezings and Stocks of Frozen Fishery Products, Ontario	7
Table 6.	Freezings and Stocks of Frozen Fishery Products, Prairie Provinces and Northwest Territories	8
Table 7.	Freezings and Stocks of Frozen Fishery Products, British Columbia	10

EXPLANATION OF SYMBOLS

- \- nil
- -- less than 500 or negligible
- --- less than three firms reporting (and figures included under "n.o.p." or "other")
- p preliminary

FROZEN FISH - September 1960

Inventories of frozen fish show a seven per cent increase over those of September, 1959 but remain practically unchanged since August this year and now stand, at 88,191,000 pounds. There were 26,794,000 pounds of fish and fish products frozen during the month compared with the 22,297,000 pounds frozen in September last year. For the first nine months of 1960, 205,071,000 pounds were frozen which is four per cent more than was produced in the same period last year.

Stocks of Frozen Fish, by Products

There were 64,031,000 pounds of frozen sea fish products held in storage on the last day of September, 1960. This is eight per cent more than the previous year's inventory of 59,051,000 pounds for September, but remains at almost the same level as that of last month at 64,902,000 pounds. There were 23,030,000 pounds of frozen Atlantic cod fillets (including blocks) on hand on the last day of September this year, compared with the 18,508,000 pounds the same date last year. This represents an increase of 24 per cent. At the end of August, 1960 there were 23,461,000 pounds in storage. Inventories of frozen haddock fillets (including blocks) at 4,663,000 pounds decreased over two million pounds from last year's 7,018,000 pounds. They also show a 12 per cent drop since last month when there were 5,319,000 pounds on hand. Current stocks of Pacific halibut including dressed fish, fillets and steaks at 13,161,000 pounds remain at almost the same level as the corresponding month last year when there were 13,382,000 pounds in storage. This month's inventory is two per cent less than the August holdings of 13,634,000 pounds. Supplies of small flatfishes including all flounders and soles increased substantially over last year's stocks in September. The 4,418,000 pounds now on hand however are 10 per cent below August's inventories of 4,395,000 pounds. Supplies of Pacific salmon at 7,409,000 pounds are 33 per cent heavier than they were in September last year and are 22 per cent greater than those of last month. Stocks of fresh water fish are 17 per cent below the 1959 level at the end of September at 6,320,000 pounds. However there was a 29 per cent increase since last month when 4,902,000 pounds were in storage.

Freezings of Fishery Products

Production of frozen fish products during September amounted to 26,794,000 pounds and brings the total for the first nine months of the year to 205,071,000 pounds. September freezings are 20 per cent higher than the 1959 production of 22,297,000 pounds but the total for the period January to September is only four per cent greater. The output, in September this year of Atlantic cod fillets (including blocks) was 30 per cent less than that of a year ago and amounted to 5,826,000 pounds. Since January 58,604,000 pounds have been frozen compared with the 64,289,000 pounds produced in the same period in 1959. Haddock fillets (including blocks) show a marked increase over 1959 at 2,404,000 pounds. September freezings of Pacific halibut of 1,400,000 pounds also show a substantial increase over last year's 549,000 pounds. Production of fillets of flounders and soles during September amounted to 2,001,000 pounds or 23 per cent more than the 1959 total of 16,330,000 pounds. September freezings of Pacific salmon at 3,563,000 pounds were 172 per cent higher than they were a year ago. The total for the year now amounts to 12,144,000 pounds compared with 6,857,000 pounds for the same period in 1959.

N.B. - This report has been compiled from questionnaires sent to 254 firms, however 26 of these establishments failed to report on time.
