FROZEN FISH OCTOBER 1962

Total inventories of frozen fish in Canada at the end of October 1962 amounted to 34,565,000 pounds. This represented a five per cent drop since September 30th when 89,242,000 pounds were on hand. The October holdings this year, however, are three per cent greater than the 81,961,000 pounds held in storage on October 31, 1962. Included in the total inventory on October 31 this year were 57,139,000 pounds of sea fish products. This is eight per cent less than the 62,436,000 pounds held a month ago but is 10 per cent more than the 51,809,000 pounds on hand at the end of October last year. Stocks of inland fish this month at 8,958,000 pounds are 15 per cent heavier than they were on September 30 and 10 per cent above the October 1961 level of 8,176,000 pounds. Total frozen fish production in October this year at 24,266,000 pounds is one per cent above the 24,012,000 pounds frozen during the same month last year. The October output brings the 10-months' total to 268,942,000 pounds or 10 per cent above the 243,647,000 pounds produced in the same period a year ago. Freezings of sea fish during the past month at 17,940,000 pounds were 26 per cent heavier than the 14,230,000 pounds produced in October 1961. During the period January to October, 202,672,000 pounds were frozen this year compared with 175,827,000 pounds last year. The production of frozen inland fish in October this year at 1,844,000 pounds is practically the same as that of a year ago. The output since the beginning of the year at 12,597,000 pounds, however, is 35 per cent greater than the 9,333,000 pounds frozen during the 10-months' period last year.

Stock of Frozen Fish, by Products - There were 20,921,000 pounds of frozen Atlantic cod fillets (including blocks) on hand on October 31 compared with 24,702,000 pounds at the end of September, a drop of 15 per cent. Current inventories however are 28 per cent greater than they were at the end of October a year ago when 16,338,000 pounds were on hand. Stocks of haddock fillets (including blocks) also declined since last month and now stand at 2,071,000 pounds, a drop of seven per cent. This year's October holdings are 28 per cent lighter than the 2,892,000 pounds held last year at the same date. Pacific halibut stocks declined 14 per cent since the last report from 12,322,000 pounds to 10,797,000 pounds. The present inventories, however, are still three per cent greater than the 10,530,000 pounds on hand a year ago. Although there was an increase of 10 per cent in the stocks of flounder and sole fillets (including blocks) since the end of September, the 3,870,000 pounds in storage on October 31 this year are 28 per cent below the 1961 holdings on the same date a year ago of 5,392,000 pounds. Pacific salmon stocks declined six per cent since the end of September last from 8,248,000 pounds to 7,727,000 pounds. The present holdings, however, are 24 per cent above the October 1961 level of 6,227,000 pounds.

Freezings of Fishery Products - The October output of Atlantic cod fillets (including blocks) this year at 6,573,000 pounds was 43 per cent greater than that of a year ago when 4,591,000 pounds were frozen. This months' production brings the total for the year to 81,717,000 pounds or 22 per cent above the 66,898,000 pounds frozen during the period January to October 1961. There were 1,137,000 pounds of haddock fillets (including blocks) produced during October 1962 compared with 623,000 pounds for the same month last year. The 10-months' freezings for both years are 26,085,000 pounds and 25,948,000 pounds respectively. There were 258,000 pounds of Pacific halibut frozen during October to bring the total for the year to date to 19,698,000 pounds. The corresponding figures for 1961 were 128,000 pounds and 20,760,000 pounds respectively. The October production of flounder and sole fillets (including blocks) this year at 2,649,000 pounds was 29 per cent below the 1961 level for the same month of 3,725,000 pounds. Since January there were 19,180,000 pounds frozen this year compared with 18,348,000 pounds last year an increase of five per cent. Pacific salmon freezing in October of 1,201,000 pounds brings the total for the year to 14,437,000 pounds which represents a 29 per cent increase over the 11,187,000 pounds frozen last year.

Note: This report was compiled from questionnaires sent to 300 firms of which 11 failed to reply on time.
