P Preliminary figures.	- Nil or zero.
.. Figures not available.	-- Less than 500 or negligible.
... Figures not appropriate or not applicable.	--- Less than three firms reporting.

## FROZEN FISH REPORT AUGUST 1962

Total stocks of frozen fish on August 31 amounted to 83,143,000 pounds. This represents an increase of two per cent since the end of July when 81,616,000 pounds were on hand but is 6 per cent below the August level in 1961 of 88,551,000 pounds. August inventories of frozen sea fish at 58,756,000 pounds are six per cent higher than the July holdings of 55,467,000 pounds while stocks of inland fish at 6,788,000 pounds are up 15 per cent since last month. Total freezing during August amounted to 38,758,000 pounds or 5 per cent more than the 36,861,000 pounds produced during the same month last year. Freezings for the first eight months of 1962 at 214,264,-000 pounds are 12 per cent higher than the out-put for the same period a year ago when 190,591,000 pounds were frozen. Included in the August total this year were 30,892,000 pounds of sea fish which is 25 per cent above the 1961 level of 24,734,000 pounds. Freezings of inland fish this month, on the other hand, are down slightly to 1,212,000 pounds from 1,260,000 pounds.

Stocks of Frozen Fish, by Products - Supplies of cod fillets (including blocks) remain practically unchanged since the end of July at 23,299,000 pounds. This is 35 per cent more than the August 1961 stocks of 17,281,000 pounds. Haddock fillets (including blocks) are up two per cent since last month at 2,135,000 pounds. The present inventories however, are 56 per cent below those of a year ago when 4,657,000 pounds were on hand. August stocks of Pacific halibut, including all forms show an increase of eight per cent over those of a month ago at 11,995,000 pounds. Present inventories are well below the 13,487,000 pounds held a year ago. There was very little change in the supplies of flounder and sole fillets (including blocks) since July but current holdings of 2,840,000 are 40 per cent below the 1961 level of 4,721,000 pounds. Pacific salmon increased considerably during the month and now stands at 8,195,000 pounds. This is 54 per cent more than was held at the end of July and 19 per cent more than the August stocks a year ago.

Freezings of Fishery Products - The August out-put of cod fillets (including blocks) at 13,923,000 pounds was 29 per cent above the 1961 level for the same month when 10,793,000 pounds were produced. The past months' production brings the total for the year to date to 66,113,000 pounds, an increase of 25 per cent over last year's cumulative total of 53,071,000 pounds. Freezings of haddock fillets during August this year at 1,423,000 lbs. were substantially heavier than those of a year ago of 661,000 pounds. The out-put for the first 8 months of 1962 at 24,204,000 pounds is 2 per cent below the 1961 level. Production of frozen Pacific halibut products in August this year at 2,870,000 pounds was 19 per cent heavier than that of the same month last year but the out-put for the year to date is 11 per cent below that of 1961 at 17,797,000 pounds. Freezings of flounder and sole fillets (including blocks) during August this year amounted to 2,390,000 pounds compared with 1,731,000 pounds a year ago, an increase of 38 per cent. Production since the beginning of the year amounted to 14,135,000 pounds and 12,764,000 respectively. Pacific salmon freezings during August at 4,876,000 pounds were 25 per cent heavier than they were a year ago to bring the total for the year to date to 10,837,000 pounds (8,199,000 pounds).

---

Note: Some of the comparisons made in this report are not strictly valid due to an increase in reporting firms this year.

This report was compiled from questionnaires sent to 300 firms of which 32 failed to reply on time.
