

Published by Authority of the Hon. James A. MacKinnon, M.P., Minister of Trade and Commerce
DOMINION BUREAU OF STATISTICS

MONTHLY REVIEW OF CANADIAN FISHERIES STATISTICS JUNE 1947

(Prepared in collaboration with Dominion and Provincial Fisheries Departments)

Dominion Statistician:
Chief, Fisheries and Animal Products Statistics:

Herbert Marshall
W. H. Lanceley

12-403X

FISHING INDUSTRY MAKES ADJUSTMENTS

Fishery statistics for the first six months of 1947 indicate that the industry on the Atlantic coast is definitely adjusting its production and processing program to meet current market requirements. The industry enjoyed strong markets for all its products throughout the war years, but as the fisheries of the United Kingdom and North-Western European countries recovered, the European demand has declined, except for certain relief requirements. Markets for frozen fish products have weakened, not only because of the reduced overseas demand, but also due to competition from Newfoundland and Iceland in the United States market.

Since the demand for the canned and salted forms of fish remain relatively strong both in the normal export markets and for relief purposes, a considerable diversion of production from frozen into cans and salt is evident in the figures for the first six months of 1947. Landings of cod, the principal Atlantic Coast species, amounted to 74,178,000 lb. as compared with 121,758,000 lb. in the same period of 1946. Landings of all species of fish on both coasts amounted to 409 million pounds with a landed value of \$17.7 million compared with 434 million pounds valued at \$22.6 million in the first six months of 1946. The major decline in landed value has occurred on the Atlantic Coast where the value of the cod and lobster catches was sharply below that of last year. Unfavourable weather conditions were mainly responsible for the reduced lobster catch. The major Pacific Coast fisheries, with the exception of halibut, have not yet come to the season of main production.

No significant changes took place in the prices of fishery products during June, although the index of wholesale prices declined a further 8 points, while the index of prices of all foods increased by 4 points.

The sharp reduction in freezings of cod fillets in 1947 has tended to keep cold storage holdings of all fish at lower levels compared with those of 1946. At July 1, 1947 stocks of all kinds of frozen fish amounted to 35.5 million pounds as compared with 34.1 million pounds at the same date in 1946.

Government Relief Program

On June 24th, Fisheries Minister Bridges announced that up to \$8 million would be spent on the purchase of fishery products as part of the government's policy of providing relief to certain European countries. The Minister indicated that the fish purchases would include up to 10 million pounds of dried salted cod and related species; up to 40,000 barrels of pickled fish; up to 50,000 boxes of bloaters; up to 900,000 cases of west coast canned herring and up to 100,000 cases of eastern canned fish. At the same time it was announced that the Fisheries Prices Support Act, 1944 would be proclaimed at an early date. It is expected that the relief purchasing program and the operations of the Prices Support Act will provide an opportunity for the industry to maintain a high level of production throughout the current year and to proceed with its adjustment from wartime to peacetime conditions.

Publication of this report was delayed somewhat due to the reorganization of the Atlantic Coast field service of the Department of Fisheries.)

Price: 10 cents per copy.
\$1 per year.
