DOMINION BUREAU OF STATISTICS

MONTHLY REVIEW  
OF  
**CANADIAN FISHERIES STATISTICS**  
JULY 1947

(Prepared in collaboration with Dominion and Provincial Fisheries Departments)

Dominion Statistician:  
Chief, Fisheries and Animal Products Statistics:

Herbert Marshall  
W. H. Lanceley

FISH LANDINGS BELOW LAST YEAR

Total landings of sea-fish by Canadian fishermen during the first seven months of 1947 amounted to 538.7 million pounds compared with 599 million pounds in the same period of 1946.

Reduced prices to fishermen, particularly for cod, following a decline in export demands for frozen fish is reflected in the July statistics of fish landings. The catch of Atlantic cod in July 1947 amounted to 47.4 million pounds compared with 67.7 million pounds in the same month of 1946. The decline is most noticeable in Quebec and Nova Scotia. On the Pacific Coast the salmon run has commenced in volume with landings of 28.3 million pounds in July of this year compared with 20.9 million pounds last year. The total catch of salmon to the end of July is substantially above that of last year. The West Coast halibut catch was also better this year.

The value of the catch to fishermen during the first seven months of 1947 amounted to \$24.7 millions, a drop of \$5.6 millions from the returns of the same period of 1946. The decline was largely on the Atlantic Coast where returns from the cod and lobster catch have been sharply lowered as a result of the reduced catch and lower prices. Returns to fishermen in British Columbia are somewhat higher than last year.

In response to the strong demand for salted fish both from the traditional export markets and from the government's relief purchase program, a substantially greater percentage of the catch of Atlantic cod, hake and pollock is being processed in the salted forms. This represents a diversion from frozen products. Freezings of cod fillets in July of 1947 were sharply below those of the same month of 1946. As a result, stocks of cod fillets were comparatively low at August 1. There were no significant changes in the forms of sales of the main Pacific species, salmon and halibut.

No significant changes occurred in prices to fishermen as at retail during the past month. The composite index number of wholesale prices increased by 11.1 points over that of June largely as a result of higher quotations for halibut.

The total value of exports of fishery products up to the end of July at \$38.3 millions was close to the 1946 figure although there were considerable changes in the position of individual products. The value of exports of fresh and frozen cod fillets, whitefish and lobsters show reductions, while the value of exports of fresh and frozen halibut and salmon were substantially greater.

Total stocks of fresh, frozen and smoked fish at August 1 at 42.7 million pounds was only slightly above the total at August 1, 1946. Reduced holdings of fresh and frozen cod fillets were offset by higher stocks of smoked cod fillets, fresh haddock fillets and frozen halibut. Stocks of fresh frozen salmon and whitefish were also higher than at the same date of 1946.

Price: 10 cents per copy.  
\$1 per year.
