DOMINION BUREAU OF STATISTICS
MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
JANUARY 1948

(Prepared in Collaboration with Dominion and Provincial Fisheries Departments)

Dominion Statistician:	Herbert Marshall
Chief, Fisheries and Animal Products Statistics:	W. H. Lanceley

FISH LANDINGS HIGHER IN JANUARY

Total landings of fish and shellfish in the sea fisheries during January, 1948, amounted to 110,257,000 lb., valued at \$2,447,000. This was an increase of 24.6 p.c. in quantity and of 34.4 p.c. in value as compared with January, 1947. Much of the increase is attributable to Nova Scotia, where a strike of deep-sea fishermen was in progress a year ago, but the increase was general in all provinces.

On the Pacific Coast, of the total landings of 94.5 million lb., 93.3 million lb. consisted of herring, nearly three-quarters of which was destined for reduction. The herring catch increased by 21.1 p.c. over that of January, 1947.

Landings on the Atlantic Coast totalled 15.8 million lb., an increase of 62.8 p.c. over January, 1947. The only species of any importance showing decreases was hake.

Landings of inland fish in four provinces during the month totalled 4,521,200 lb., valued at \$603,667. The total was made up as follows: Manitoba, 4,416,200 lb., \$587,554; Quebec, 60,800 lb., \$8,310; Ontario, 43,300 lb., \$7,675; New Brunswick, 900 lb., \$128. Pickerel was the chief species taken in Manitoba (1,823,000 lb., \$376,995) followed by whitefish (446,600 lb., \$81,462). The January report is the first received for Ontario and is not a complete coverage of the fisheries of the province. Pickerel was the main species taken, with 15,500 lb., valued at \$3,720.

The total value of fisheries exports in 1947 at \$82,359,203 was 5 p.c. lower than the figure of \$86,572,684 recorded for 1946. Decreases were noted in fresh and frozen groundfish, both round and filleted, and also in smoked and pickled groundfish. Exports of dry-salted groundfish increased to the U.S.A., Trinidad, British Caribbean islands (except Jamaica), Cuba and other Caribbean and Latin American countries. There was a large increase in exports of fresh and frozen halibut to the United States and the same is true of fresh and frozen salmon. The United States took fewer fresh lobsters. Exports of inland fish to the same country also showed a decline.

Exports of pickled herring were only half those of 1946. Increases were noted in shipments to Barbados, Jamaica and the Leeward and Windward Islands. Relief shipments to Poland continued on a smaller scale and those to Czechoslovakia disappeared. Puerto Rico took only one-third as much as in 1946 and the U.S. about one-half. Pickled mackerel followed the general trends of pickled herring.

Total exports of canned fish were valued at \$31,510,497. This was an increase of 1.9 p.c. in quantity and of 3.5 p.c. in value over 1946. Increases were recorded in clams, herring, sardines and other sea fish, while haddock, pilchards, salmon and lobsters declined.

Wholesale and retail prices of fish products were generally higher than in December.

Price: 10 cents per copy, \$1 per year.
