MONTHLY REVIEW OF CANADIAN FISHERIES STATISTICS

JUNE 1949

Published by Authority of the Rt. Hon. C.D. Howe, Minister of Trade and Commerce

(Prepared by the Fisheries Section in collaboration with Dominion and Provincial Fisheries Departments)

12-403X

Price: 30 cents (\$2 per year)

FIRST SIX MONTHS REVIEWED

INCREASED LANDINGS OF CLAMS ON BOTH COASTS

During June, landings in the sea-fisheries of Canada (excluding Newfoundland) amounted to 118,579,000 lb., only 2.8 p.c. below the total for June, 1948. However, the cumulative catch for the first half of 1949 -- 469,403,000 lb. -- is still some 14.0 p.c. lower than that for the same period of last year, decreases having been registered thus far for almost all the major species on both coasts.

Total landings for the month in British Columbia were 11,431,000 lb., a decline of 22.3 p.c. from the figure for June, 1948. Over the six-month period a big increase in the landings of clams is noted. In the Pacific Coast fisheries June is usually a comparatively quiet month, owing to the lull between the end of the halibut and the commencement proper of the salmon season.

On the Atlantic Coast the total catch amounted to 107,148,000 lb., just 0.1 p.c. below the June, 1948, landings. However, the cumulative total is still 10.3 p.c. lower than for the same six months of last year. Herring and sardines continue to show the largest decreases, clams and quahaugs, and hake the largest increases.

Although the season is still fairly young, there are indications that larger quantities of Atlantic cod, pollock and hake are being salted and dried than was the case a year ago. It is worthy of note that almost half of the increased landings of Pacific clams is being canned.

Attention is drawn to the fact that in Table 8 figures showing imports from Newfoundland in 1949 are for the first three months of the year only.

Exports during the first five months of 1949 have decreased by some \$6.5 millions, or approximately 17.0 p.c., As has been noted in previous issues of the Review, the greatest drop has occurred in the amount of canned fish exported. Although it would seem that Caribbean and Latin American countries are taking more salted fish than they did a year ago it must be remembered that exports from Newfoundland are now included in Table 9.

The amount of fish held in cold storage at July 1st is greater than at July 1st, 1948, and at June 1st, 1949. There was an 'into-storage' movement for all classifications of 5.8 million pounds during the month.

Stocks of wet-salted cod are noticeably higher this year, while holdings of boneless salted fish have decreased appreciably.

After having risen during April, wholesale prices of fishery products dropped 7.5 points in May, whereas the index for all foods rose by 0.4.

June 1949

(Newfoundland NOT yet included)
