MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
SEPTEMBER 1949

EXPORT SITUATION SHOWS IMPROVEMENT

SARDINE LANDINGS INCREASE

Landings in the sea-fisheries of Canada (excluding Newfoundland) in September amounted to 121,489,000 lb., an increase of 12.5 p.c. over the September, 1948, catch. The cumulative total of 865,711,000 lb., however, is 7.0 p.c. lower than for the same nine-month period of last year.

The Atlantic Coast landings, at 79,429,000 lb., were 7.7 p.c. higher than those of September, 1948. The biggest increase for the month was registered in the sardine catch in New Brunswick, but the total to date for this fishery is still far below that for the same period of 1948. Landings of shellfish -- except scallops -- continue their increase both in volume and value.

On the Pacific Coast the September catch of 42,060,000 lb. was 23.0 p.c. higher than the figure for the same month of last year. There was a big increase in the total landings of salmon, a good run of pinks more than compensating for a decrease in the landings of chum. It is interesting to note that the 1948 catch of whales off Vancouver Island has already been exceeded.

There were no significant changes in the intended disposition of the catch.

On Page 8, Table 9 shows the cold storage stocks of fish in Newfoundland as at October 1, 1949. Statistics on the fisheries of that province are not yet available, but information from other sources would indicate that the 1949 season has not been as profitable as that of 1948.

Stocks of all frozen fish in Canada, apart from Newfoundland, amounted to 47,569,000 lb. on October 1, of which 44,429,000 lb. were frozen fresh and 3,140,000 lb. frozen smoked. These holdings were higher by 4,329,000 lb. frozen fresh and 27,000 lb. frozen smoked than those at October 1, 1948. Compared with September 1, 1949 figures they are lower by 1,591,000 lb. frozen fresh and 330,000 lb. frozen smoked. There was an "out-of-storage" movement for all classifications of 1.9 million pounds as compared with an opposite movement of 2.2 million pounds during September, 1948.

The exports situation may be summed up very briefly. There was an improvement during the month of August. Comparison with last year's totals shows that the deficit of \$5.2 million at the end of July had dropped to \$3.5 million at the end of August. Increases in foreign sales of other products were still not enough to offset the continued decline in exports of canned, and fresh and frozen fish.
